ADDITIONAL VIEWS

[To accompany S. 1094]

The Committee on Health, Education, Labor, and Pensions to which was referred the bill (S. 1094) to amend the Elementary and Secondary Education Act of 1965, and for other purposes, having considered the same, reports favorably thereon with an amendment and recommends that the bill (as amended) do pass.

I. PURPOSE, NEED FOR LEGISLATION, AND GOALS OF REAUTHORIZATION

The Strengthening America's Schools Act of 2013 (SASA) is a comprehensive reauthorization of the Elementary and Secondary Education Act of 1965 (ESEA). Its purpose is to once again, affirm the Federal focus on preK–12 education policy to ensure access and equity of educational opportunities for all students. The committee also intends this Act to update, improve and streamline programs under the ESEA for the next 5 years. SASA represents the Federal Government's continued commitment to preK–12 education, to students in disadvantaged situations, and recommits the Federal Government to the fundamental goals of the Elementary and Secondary Education Act as passed in 1965.

Equity and access to high quality education has been the purpose of Federal education law since the passage of ESEA in April 1965. ESEA, the first large-scale Federal education act, focused resources

on schools serving disadvantaged students and became the first of three legs in the Federal education footprint to address access and equity. Along with the Head Start Act of 1965 and the Educating All Handicapped Children Act of 1975 (now known as the Individuals with Disabilities Education Act), ESEA made the promise to prepare all children for school and provide educational opportunities for each of those children.

Since the original implementation of those three laws, much has improved. We now serve almost 1 million children each year through the Head Start and Early Head Start programs, enhancing the lives of those children and their families by providing services and supports that prepare those children for school. IDEA provides the over 6 million students with disabilities with access to school, something not guaranteed prior to its passage. ESEA, the first leg of Federal education legislation, has provided enormous support to schools, teachers, and communities aiming to ensure disadvantaged students have access to high quality education.

Despite these landmark efforts, much remains to be accomplished. Since the identification of a “rising tide of mediocrity” by the Reagan era report “A Nation at Risk,” we have seen a Federal focus on improving education outcomes, particularly for those students most at need. With the passage of the Improving America’s Schools Act (IASA) in 1994, the concepts of state-wide standards and setting goals for all students were introduced to Federal education policy. In 2001, Congress passed the No Child Left Behind Act (NCLB) which added accountability requirements to Federal education policy in pursuit of ESEA’s historic mission of supporting equitable access to education. With NCLB, our Nation said it was imperative that all students in every State, including those who are poor students, those who are minorities, those with disabilities, and those who are English learners, must have both the expectation to meet high academic standards and access to the teachers, materials, and other resources to have the opportunities to achieve those standards. No longer would students in one part of a State or even one part of a school district be subjected to lower expectations and fewer educational supports.

NCLB brought with it not only high expectations for all students but requirements that schools must communicate to families and communities about how well, or in some cases, how poorly, schools were meeting the goals of preparing students. That reporting had to occur not only for a State or a school district but for each school and for each group of students within a school. No longer would States or districts or schools be able to serve most of their students well. With NCLB each State education system was held accountable for the outcome for all students.

However, there were challenges with NCLB. The accountability goals established by NCLB were one-size-fits-all goals and did not take into consideration the needs of local districts. Likewise, in many cases the reporting requirements that made NCLB such a breakthrough were weakened by exempting thousands of schools from those requirements, thus denying families and communities crucial information by which to hold their local schools accountable. NCLB also contained a loophole that allowed valuable resources to be diverted from schools most in need of more support and used by schools with access to greater resources, thus denying the children

most in need the high quality education intended by the passage of ESEA in 1965.

Within this context, the committee set forth to build on the strengths of previous Federal education policy and to forge new, stronger, more flexible partnerships with States, local school districts and the communities where children learn. With reporting out the Strengthening America's Schools Act of 2013, it is the intent of the committee to forge these partnerships in order to jointly establish high expectations for all students and to provide States and local school districts with the resources and flexibility to meet those expectations, particularly for disadvantaged students.

To address the educational needs of the country and to create stronger partnerships that enhance the opportunities for children throughout the Nation, the Strengthening America's Schools Act of 2013 builds on the work of the past 37 years and upholds the original intent of the Elementary and Secondary Education Act of 1965.

Specifically, the SASA maintains the Federal commitment to equity and access to educational opportunities through continued transparency of data and the fair distribution of resources. State and local educational agencies will continue to be required to teach all students to rigorous standards that will prepare them for post-secondary education and for careers. Students will continue to be assessed in the areas of mathematics and reading, and results of those assessments will be reported to families and communities in order to provide them with information about the effectiveness of their local schools and the data to participate in the improvement of those schools. That assessment data will be reported by subgroups so that families and communities will also know how well schools are instructing all groups of students and will be able to target resources to those groups most in need.

SASA also closes a loophole in the requirement of local school districts to ensure schools in the poorest areas receive at least as much funding as those in wealthier areas. In the past, local educational agencies have been permitted to use average teacher salaries to calculate the distribution of funds to schools. Under SASA, schools will need to use actual salaries to determine the level of resources each school is receiving.

Decades of research have shown that providing high quality early education to children enhances their educational outcomes. SASA focuses greater attention than previous reauthorization bills on children during their early years, at the K–3 grades and before entry into school. The Act provides for greater access to high-quality literacy instruction in early childhood education programs and encourages States to provide full-day kindergarten if it is not yet available to families. SASA also encourages districts with the lowest performing schools to develop or expand early childhood education to increase the likelihood of children entering school ready to learn.

SASA sets a goal of ensuring that all students are college- and career-ready when they graduate from high school and targets Federal intervention to the poorest performing schools in each State. The bill aims for a Federal role that is more focused, provides States and local educational agencies with more flexibility, and strives for more efficiency. It does this by focusing on teaching and learning, not unnecessary testing and sanctioning. SASA elimi-

nates the Federal one-size-fits-all approach and replaces it with State-designed accountability systems, and allows States to identify their own performance targets and to design their own accountability systems to measure the academic growth of each child, and to include assessments in other subjects when measuring the performance of students.

SASA recognizes that, day-to-day, it is teachers and principals who make the difference in the lives of their students. To that end, the committee has crafted SASA in such a way as to support teachers as they become as effective as possible for the students they serve. SASA requires States to craft professional development processes that provide teachers and school leaders with feedback about their instruction and management. That information comes from multiple sources, including student achievement, supervisor or peer observations and other sources such as student feedback.

In addition, SASA would provide resources to improve teachers' skills in the STEM subjects and prepare more teachers to work with the diverse learners in America's schools, including students with disabilities and English learners. SASA also provides incentives to ensure that effective teachers and leaders are working with those children who are most in need.

SASA consolidates dozens of small programs into larger, more comprehensive grant programs to help leverage better teaching and learning. These new programs—such as high school reform; literacy; STEM; and successful, safe and healthy students—will be more focused to support better results and leverage more improvements, while also providing greater flexibility to parents, schools, and States to adopt the best approach to improving the education of their children. This flexibility also allows States and local educational agencies to determine which interventions best fit their needs.

While SASA consolidates many programs, it also maintains and improves programs designed to support special populations, including English learners, American Indian students, native Hawaiian students, native Alaskan students, neglected and delinquent children, children in foster care, and homeless students. The bill also supports students with disabilities as they participate in the general education experience and work to attain college- and career-readiness alongside their peers.

The SASA provides two other important tools for schools and for the communities they serve. The first is the expanded collection of critical data and a report, the *equity report card*, which will allow families to quickly determine how effective the school is at teaching children, the resources available to the school, and the school climate for learning. This information is a valuable tool for families and school personnel. The second is a prohibition on discrimination against students based on their sexual orientation, their perceived sexual orientation, or their association with another student based on their sexual orientation. This new protection will further enhance the learning environment of schools and allow for better academic outcomes for all students.

In closing, the committee understands the Federal Government provides only a fraction, approximately 10 percent, of the overall funding for elementary and secondary education in the United States. As such, SASA once again reminds States that they are free

to choose to no longer participate in or accept Federal support for education. If, however, States decide to accept Federal resources, they must comply with the requirements associated with those funds. This has been the approach of Congress since the original passage of the Elementary and Secondary Education Act in 1965. The role of the Federal Government in education was clearly articulated in that original bill. That role, to promote economic and social opportunity through access to high quality education, is what drives the programs in SASA.

II. LEGISLATIVE HISTORY AND COMMITTEE ACTION

PREVIOUS REAUTHORIZATION EFFORTS

During the 112th Congress, the Health, Education, Labor, and Pensions Committee, under the leadership of Chairman Harkin and Ranking Member Enzi, considered the Elementary and Secondary Education Reauthorization Act (S. 3578). In preparation for consideration of S. 3578, the committee held 11 hearings addressing ESEA issues.

On October 20, 2011, after a 2-day executive session to markup the bill, S. 3578 was adopted by a roll-call vote of 15 ayes and 7 nays. The bill was reported out of committee on September 20, 2012. The bill was not brought to the Senate floor and died with the conclusion of the 112th Congress.

HEARINGS

After S. 3578 was adopted by the committee, 7 additional hearings were held. Unlike the 11 hearings prior to consideration of S. 3578, these hearings addressed specific issues such as education technology, accelerated learning, and bullying in schools. The seven hearings culminated with a session examining the flexibility waiver process initiated by the Obama administration to address some of the concerns of States and districts related to the goals of NCLB. A brief description of each hearing, including witnesses, follows.

Beyond NCLB: Views on the Elementary and Secondary Education Reauthorization Act (November 8, 2011)

This hearing was held at the request of Senator Rand Paul and is the one exception to the issue specific approach the committee took to examine ESEA prior to the markup of S. 1094. This hearing was a roundtable with 10 witnesses. Its focus was on the overall impact of NCLB and what steps need to be taken to strengthen ESEA. Witnesses included:

- **Amanda Danks**, a lead teacher at Wm. S. Baer School in Baltimore City public schools (Baltimore, MD), who shared her experiences with assessment of students focusing on formative data collection, teacher professional development to create highly effective teachers, and the need for high expectations for all students.
- **Pam Geisselhardt**, a gifted and talented coordinator for Adair County schools (Columbia, KY), who spoke of the negative impact of NCLB on student instruction as it related to addressing the needs of students above and below the mean, and argued for more State and local control related to instruction of students and evaluation of teachers.

- **Terry Grier**, superintendent of Houston Independent School District (Houston, TX), who spoke about the importance of using professional development and teacher evaluation systems to retain highly effective teachers and replace poorly performing teachers.
- **Wade Henderson**, president and CEO of The Leadership Conference (Washington, DC), who described the need to reauthorize ESEA while retaining performance targets for schools, districts, and States. He also emphasized that the role of the Federal Government in education policy is to ensure equitable distribution of resources to less well-off students and communities.
- **Frederick (Fred) Hess**, resident scholar and director of education policy at the American Enterprise Institute (Washington, DC), who emphasized his point of view that the Federal Government should be responsible for collection of data and research related to education and should not be focusing on methods or strategies for improving the performance of teachers and schools.
- **Tom Luna**, Idaho superintendent of Public Instruction (Boise, ID), who emphasized the critical need of ensuring high quality, effective teachers are available in each classroom and using both evaluation and pay for performance as methods for attracting, retaining and improving teachers.
- **Katherine (Katy) Beh Neas**, senior vice president for Governmental Relations of Easter Seals (Washington, DC), who discussed the importance of including students with disabilities in the accountability process and the value of collecting and reporting school level data on the outcomes for students with disabilities.
- **Charles Seaton**, a teacher at Sherwood Middle School in Memphis City schools (Memphis, TN), who spoke about the importance of ensuring all teachers in each classroom are effective teachers and the use of a supportive teacher and school leader evaluation system to foster the development of effective teachers.
- **Jon Schnur**, co-founder and chairman of the board of New Leaders (New York, NY), who spoke about the need for high expectations for all students, the need for effective school leaders, the importance of performance targets for schools and districts, and more effective use of professional development funds.
- **Elmer Thomas**, principal at Madison Central High School of Madison County school district (Richmond, KY), who spoke about the importance of removing the requirement of adequate yearly progress and allowing the use of a growth model when determining the proficiency of students and the effectiveness of teachers.

The Promise of Accessible Technology: Challenges and Opportunities (February 2, 2012)

This hearing focused on the use of technology in schools, from preschool through postsecondary education, and how accessibility of that technology has an impact on student achievement. While not solely focused on PK–12 education, the witnesses spoke to the accessibility of technology used in schools and how technology can make curriculum accessible to all students. The hearing was composed of two panels. The single witness on the first panel was Eve Hill, the senior counselor to the Assistant Attorney General for Civil Rights at the Department of Justice (Washington, DC). She emphasized the quick and vast transformation that is taking place in schools related to technology and cautioned that schools, from

early childhood programs through universities, must take care in adopting technology that is accessible to all students, and to demand of vendors and manufacturers technology, software, and support services that are accessible to all students.

The second panel was composed of three witnesses, including:

- **Mark Riccobono**, the executive director of the Jernigan Institute of the National Federation of the Blind (Baltimore, MD), who spoke about the technology in schools being both the possible avenue for access to information for all students or a barrier to a rigorous education if the technology is not accessible.

- **John B. Quick**, superintendent of the Bartholomew Consolidated School Corporation (Columbus, IN), who described the importance of universal design for learning and how the adoption of accessible technology in his school district for all students has had positive outcomes for all students in terms of academic achievement as well as school attendance and positive social interactions. He reported that academic improvements have occurred not only in students with disabilities but also students eligible for free or reduced meals and students who are English learners.

- **Mark Turner**, the director of the Center for Accessible Media and the Accessible Technology Initiative of the California State University System (Long Beach, CA), who spoke about the power of schools to influence the accessibility of hardware and software through their purchasing decisions.

Effective Strategies for Accelerated Learning (April 18, 2012)

This full committee hearing focused on accelerated learning approaches including competency-based curricula, advanced placement courses, dual-credit courses, and early college high schools. This full committee hearing consisted of one panel composed of the following witnesses:

- **Thomas W. Rudin**, senior vice president for Advocacy in the Government Relations & Development at The College Board, reviewed the structure of advance placement courses, who takes them, and their impact on student achievement. He reviewed the participation rates and outcomes for students from low-income families and students of color.

- **Carolyn Bacon Dickson**, executive director for the O'Donnell Foundation, The Texas AP Incentive Program (Dallas, TX) and member of the Board of Directors for the National Math and Science Initiative focused on the importance of having well-trained, qualified, and effective teachers as instructors for accelerated learning experiences.

- **Peter Winograd**, director of the University of New Mexico Center for Policy Research (Albuquerque, NM) who focused on the impact of accelerated learning, the need for integrated data systems across preK–12 and post-secondary systems, and the need for collaboration within States between the preK–12 and postsecondary systems.

- **Marybeth Schubert**, executive director for New Mexico Advanced Programs Initiative (Santa Fe, NM) who spoke of the advantage accelerated learning provided for students regarding their ability to complete a college degree.

- **Joel Vargas**, vice-president for Jobs for the Future (Boston, MA) spoke of his organization's efforts to increase early college ex-

periences and to improve both the enrollment and retention of students from low-income families in post-secondary education programs.

Bully-Free Schools: How Local, State and Federal Efforts Can Help (June 8, 2012)

NCLB: Early Lessons from State Flexibility Waivers (February 7, 2012)

This hearing consisted of two panels. The first panel included Secretary of Education Arne Duncan. Secretary Duncan reported on the status of flexibility waivers for States that relieve them of some of the requirements of NCLB while requiring them to develop and implement college- and career-ready standards, develop and implement teacher and school leader evaluation systems, and enhance their student achievement accountability models.

The second panel of this hearing included the following witnesses:

- **Terry K. Holliday**, Kentucky commissioner of education (Lexington, KY), who testified to the need for reauthorization of ESEA and to the value of the NCLB flexibility waivers to allow his State to create a new, innovative accountability system based on more rigorous standards. He urged the committee to use the flexibility waiver process to inform the reauthorization of ESEA.
- **John B. King, Jr.**, New York commissioner of education (Slingerlands, NY), likewise emphasized the need for the reauthorization of ESEA and asked the committee to provide a framework and guidelines for setting goals and an accountability system.
- **Andrew R. Smarick**, partner at Bellwether Education Partners (Lawrenceville, NJ), argued for a reduced Federal footprint in education policy and suggested waiting to reauthorize ESEA. III. EXPLANATION OF BILL AND COMMITTEE VIEWS

TITLE I, PART A: ENSURING COLLEGE- AND CAREER-READINESS FOR ALL STUDENTS

The committee bill updates current law to reflect what has been learned in the 12 years since the No Child Left Behind Act (NCLB) was enacted, while maintaining the essential accountability elements under that iteration of the law.

STATE RESERVATIONS

The committee has changed the amount of funds a State can reserve from subpart 2 of part A from 4 percent to 6 percent in recognition of the fact that States must build capacity to provide local educational agencies with technical assistance to improve teaching and learning, and to provide support to LEAs to implement the responsibilities described in section 1116.

STATE PLAN AND STATE AND LOCAL REQUIREMENTS

Requirements for College- and Career-Ready Standards

The committee bill requires each State to adopt college- and career-ready standards. A child's education should lead to success in postsecondary education and the workforce. By 2014, it is projected that 75 percent of new jobs in America will require a postsecondary degree, and a college graduate today is projected to make 77 percent more per hour than a worker with a high school diploma. While the committee recognizes that not every high school graduate will attend a 4-year college, every high school graduate should be prepared for entering a post-secondary education program without the need for remediation and be ready to enter an entry level job in a high-need, high-demand profession.

The committee bill describes, in section 1111(a)(1)(A)(ii), three options for States to use to ensure that academic standards are "college- and career-ready": alignment with credit-bearing coursework at public institutions of higher education, alignment with career and technical education standards consistent with the State performance measures developed in accordance with the Carl D. Perkins Career and Technical Education Act of 2006, and appropriate career skills. The committee also allows for States to adopt standards that have been developed and voluntarily adopted by a significant number of States. States must implement content standards in reading or language arts and mathematics by December 31, 2014, and adopt academic achievement standards by the beginning of the 2015–16 school year.

The committee bill protects States' rights in defining academic content and achievement standards while also ensuring that States are setting high academic expectations for all students. Section 1111(a)(1)(A)(ii) requires the State to demonstrate, as part of their title I plans, that their academic content and achievement standards are aligned with the expectations of college- and career-readiness.

Section 1111(a)(1)(H) reinforces that the Secretary or any other Federal officer or employee may not mandate, direct, or control a State's academic content or achievement standards. The committee understands that the Secretary of Education will continue to review evidence submitted by the States related to the quality of their academic standards. The Department of Education has released guidance to States that details the evidence that can be submitted and the committee intends for this practice to continue as States adopt college- and career-ready standards.

The committee intends for the term "appropriate career skills" in section 1111(a)(1)(A)(ii)(III) to encompass higher-order thinking skills, including but not limited to the ability to apply knowledge to new situations, think critically, problem solve, communicate orally and in writing, exhibit creativity and innovate, as well as digital literacy and the ability to use workplace technology effectively. These are essential skills for students to develop in order to succeed after graduation from high school. These are also the skills that will enable graduates to succeed in private-sector training environments that account for most post-secondary training in the United States.

In section 1111(a)(1)(A)(ii)(IV) the committee intends for standards developed and adopted by a consortium of States to meet the requirement for college- and career-ready standards.

Alternate Academic Achievement Standards for Students with the Most Significant Cognitive Disabilities

It is the intent of the committee to ensure that all students are held to the highest possible standards in order to be prepared for entry into postsecondary education and careers. The committee recognizes, with section 1111(a)(1)(D), that general education standards are not appropriate for a very small percentage of students with the most significant cognitive disabilities. This group of students comprises less than 1 percent of the overall student population. The committee's intent is to ensure that a parallel, challenging, appropriate, and aligned set of standards are available for this group of students. The committee also intends for students with disabilities who do not have the most significant cognitive disabilities to be held to the general education standards with the supports, accessibility, and accommodations they need to achieve such standards, including multi-tier systems of support. This includes students with learning disabilities, mild and moderate intellectual disabilities and multiple disabilities that include cognitive disabilities.

Because of the advances in assessment construction and the determination of accommodations that do not lessen the reliability and validity of assessments, the committee has placed an explicit prohibition on the development and use of any alternate academic standards other than those to be used with students with the most significant cognitive disabilities. The committee understands that to create additional alternate academic standards would decrease academic expectations for a large subset of students and reduce their likelihood of graduating with a standard high school diploma.

English Language Proficiency Standards

The committee bill requires States to adopt high-quality English language proficiency (ELP) standards by December 31, 2015. States must also demonstrate that the standards are aligned with the State's academic content standards in reading or language arts; ensure proficiency in English for each of the domains of speaking, listening, reading, and writing; identify at least 4 levels of English proficiency; and ensure that the ELP standards are updated not later than 1 year after the State adopts any new academic content standards in reading or language arts.

Early Learning Guidelines and Early Grade Standards

The committee recognizes the critical importance of early learning and its contribution to the positive long-term outcomes for children. If a State chooses to use title I–A funds to support the early education of low-income children, a State must certify that it has in existing culturally, linguistically, and developmentally appropriate guidelines that describe what young children from birth to 5 should know and be able to do before they enter kindergarten. Such guidelines must be informed by research and developed in consultation with other relevant departments and agencies in the State that support early childhood education programs. Further,

the committee asks States that use Title I–A to develop, or certify the existence of, developmentally appropriate standards for students in the early elementary grades to ensure that such standards reflect how children develop and learn the requisite skills and content from the early grades onward.

Academic Assessments

As States transition to college- and career-ready standards, States are required under section 1111(a)(2) to implement assessments aligned to those standards. Current assessments are unlikely to accurately measure the knowledge and skills needed to succeed in the globally competitive economy. To address the need for new assessments aligned to college- and career-ready standards, many States have joined together to develop higher quality assessments. The committee bill requires that statewide assessments continue to be administered annually in reading or language arts and math for grades 3 through 8, and at least once during grades 10 through 12. State assessments must also include English language proficiency assessments. If a State chooses to use them, these assessments must also include alternate assessments for students with the most significant cognitive disabilities.

Statewide assessments must continue to be administered in science at least once during grades 3 through 5, 6 through 9, and 10 through 12, and States must disaggregate and report on student achievement data.

The next generation of statewide assessments must align with college- and career-ready standards and thus measure the knowledge, skills, and competencies students need to succeed in the 21st century. These assessments should involve multiple measures of student academic achievement, including measures that assess higher-order thinking skills and understanding, and should be capable of measuring student academic growth.

The committee bill includes language to allow States to use multiple assessments over the course of the year to measure student knowledge, so long as the scores from these assessments culminate in a score equivalent to that of a single summative assessment. States are permitted to use portfolios, projects, extended performance tasks, and other valid and reliable methods as part of the process of assessing student proficiency through multiple measures.

Assessments should be developed and implemented with the intent of including all students, including those with disabilities and those who are English learners. Assessments should be developed, from inception, using the principles of universal design. They should also be developed with accommodations that result in valid and reliable measure of student proficiency while permitting the greatest possible access for students with disabilities.

Computer adaptive assessments that measure, at a minimum, whether each student is meeting or exceeding the on-track level of performance for the State academic content standards for the student's grade level, may be used. A State may measure the student's level of performance in the grades above or below the student's grade level, which may include a student's growth at such levels, so long as grade-level items are used for determining if a student is on track for college- and career-readiness. Computer adapted assessments would still need to reliably and validly test all students

on the full-range of grade-level content and at the same levels of cognitive complexity.

A common and recurring criticism of NCLB is that it has led to too much student testing. The committee bill maintains current law and continues to require only one annual assessment in both reading or English language arts and mathematics, and a science assessment in each grade span. To address the criticism about over-testing, this bill requires States to regularly analyze assessment and accommodations practice and use, and to eliminate duplicative assessments identified by such analyses. With this data, the committee intends for States and LEAs to use this data to accurately determine the source of required assessments and to find the opportunities to reduce the testing load on schools, teachers and students. In addition, in the reporting section of title I (section 1111(d)(3)), the bill requires States and LEAs to inform families and communities what assessments are required of students and whether that requirement is Federal, State or local.

The committee sees significant value in providing additional transparency in reporting. Thus the bill requires cross-tabulation of data to be made publicly available regarding student academic performance and graduation rates for each school, LEA and the State for every combination of two of the subgroups described in subsection (a)(2)(B)(x), such that data for all permutations of two subgroups will be reported. States may, but will not be required to, cross-tabulate performance data for permutations of three or more subgroups.

Assessing English Learners

States must include in the academic assessment of reading or language arts (using tests written in English) any student who has attended school in the United States (not including Puerto Rico) for 3 or more consecutive school years. An LEA may, on an individual basis, assess such students identified as English learners in a language other than English for no more than 2 years, if such student has not yet reached a level of English language proficiency sufficient to yield valid and reliable information on what such a student knows and can do on reading or language arts tests written in English. Continuation of these policies will provide the information needed to determine if English learners are college- and career-ready.

Each State must also ensure that, by 2015–16, English learners will be assessed for their level of English proficiency. English proficiency assessments must be aligned with the State’s English language proficiency standards and reflect academic language necessary for students to graduate high school college- and career-ready.

Alternate Assessments for Students With the Most Significant Cognitive Disabilities

The committee has provided States with the option, in section 1111(a)(2)(E), to create alternate assessments to measure the academic proficiency of students with the most significant cognitive disabilities on alternate academic achievement standards. Based on research that indicates students with the most significant disabilities comprise less than 0.6 percent of the student population, it is

the intent of the committee that no more than 1 percent of all students in an LEA and no more than 1 percent of the students in the State would be assessed using alternate assessments. The committee recognizes that in some LEAs there are concentrations of students with the most significant disabilities and this 1 percent limitation does not extend to individual schools.

State-designed Accountability Systems

The committee intends for each State to design and implement a single state-wide school, LEA, and State accountability system to designate the effectiveness of each entity. The accountability system must be able to differentiate the effectiveness of all schools and LEAs in the State regarding the proficiency of students in English language arts/reading, mathematics, and English language proficiency, as well as student growth. For high schools, the accountability systems must also be able to differentiate the effectiveness of schools and LEAs regarding graduation rates. The accountability systems must be able to report results for the total student population within a school, LEA or the State, as well as to disaggregate the results for the subgroups of students by each major racial and ethnic group, English proficiency status, disability status, and economic status. Schools, LEAs and States must report academic results for all subgroups with 15 or more students in a subgroup.

Academic Growth

It is the intent of the committee to ensure that assessment of student academic skills includes not only grade-level proficiency but also student academic growth. State accountability systems must be able to report the number and percentage of students meeting or exceeding grade-level standards, the number and percentage of students below grade-level academic proficiency and achieving sufficient academic growth, and the number and percentage of students below grade-level proficiency and not achieving sufficient academic growth.

The committee has defined academic growth in order to acknowledge the significant effort and accomplishment of the many educators throughout the country who provide high quality instruction that significantly advances student academic achievement. A State may define sufficient academic growth as achievement that will result in the student being grade-level proficient within 3 years, being grade-level proficient within a grade space (i.e., 3–5, 6–8, 9–12), or a similar rigorous definition negotiated between the State and the Secretary.

Performance Targets

The committee recognizes that the single, one-size goal of NCLB and the accompanying penalties were harmful to the ability of schools to effectively serve all students. The committee, however, is resolute that schools, LEAs and States must set ambitious goals that include continuous, aggressive improvement in student academic proficiency. The committee knows that educators throughout the country are working to instruct students so they are academically proficient. An essential part of the process of reaching proficiency is setting goals, tracking those goals, and adapting strate-

gies and interventions from data collected to determine how effective a school, LEA and State is at meeting their goals.

Some educators and policymakers contend that transparency of effectiveness is sufficient to ensure continuous improvement of effective academic instruction. The committee, however, believes that goals for all groups of students, with a timeline, in combination with transparency of effectiveness results in far better outcomes for students, schools, and districts.

The committee, therefore, has required in this bill that all States must set annual performance targets for schools, LEAs and the State itself. The performance targets must apply to all subgroups of students and must result in the same outcome for all students within the same period of time. The performance targets must also be ambitious, resulting in significant increases in the number and percentage of students academically proficient in each subgroup. The performance targets must include students' grade-level proficiency, student academic growth, English language proficiency and growth, and, for high schools, graduation rates. For the purposes of the accountability system, no more than 1 percent of the students with the most significant cognitive disabilities may be assessed and their results considered in the accountability system using the State's alternate assessment.

States may choose to track and report other measures of academic effectiveness. The committee recognizes that such variables as participation and achievement in Advanced Placement courses or college enrollment rates can be useful measures of student success, however, the variables of student proficiency, growth, graduation, and English proficiency are intended to be the primary measures of success of a school with students and all subgroups of students.

States may choose their performance targets from one of three categories. They may choose to continue the goals they have set in their approved flexibility plans granted by the Department of Education to allow relief from some of the provisions of NCLB. They also may set performance targets based on all students achieving academic proficiency to the level that the top 10 percent of their students achieve during the first year of implementation of this Act. Alternatively, States may choose to set their own performance targets that are as ambitious as either of the first two options, and must be negotiated with the Secretary.

State Plans

For any State wishing to receive title I, part A funds, a State plan describing how the State and its LEAs will meet the requirements of this Act, and how the State will coordinate the activities with related Federal programs, is required. The committee particularly urges SEAs that provide funding for kindergarten to create a plan to expand the availability of full-day kindergarten throughout the State. Also as part of the plan, SEAs are urged to create a plan to assist LEAs in identifying and serving students who are gifted and talented.

The committee's intent is for the first State plans to be submitted 1 year after enactment of this Act and every 4 years subsequent.

Equitable Distribution

Research shows that teachers are the most important in-school factor driving student achievement. The committee believes that LEAs should do all they can to use data to address inequities in teacher quality between schools. The committee strongly believes that LEAs should be most concerned with the distribution of effective teachers across schools in order for all children to have access to high quality instruction.

During the first year of the implementation of this Act, SEAs must include in their State plans a process for ensuring equitable distribution of effective teachers among all schools. Recognizing that all SEAs will not have teacher evaluation systems in place, SEAs may use other variables to substitute for teacher effectiveness. These may include teacher qualifications, length of teacher experience, and teacher subject certification. By the 2015–16 school year, all SEAs must begin to use teacher evaluation data, as described in title II, part B, to determine equitable distribution of effective teachers.

State Parent and Family Engagement Plan

The committee believes there is great value in the involvement of parents in their children's education. The committee bill (section 1111(c)) strengthens current law by expanding such involvement to appropriate family members. This shift is intended to acknowledge the role that non-custodial family members play in the life of a child. States are required to develop a statewide parent and family engagement strategy, which must prioritize increasing engagement in high-need LEAs and schools. States are responsible for ensuring coordination of parent and family engagement activities across the State, including between the State and the State Advisory Council on Early Childhood Education and Care described in the Head Start Act and, as applicable, between the State and the Parent and Family Information and Resource Center described in title IV, as well as among the Federal, State, and local levels. The committee is particularly interested in coordination between States and State Advisory Councils on Early Childhood Education and Care, as alignment of these activities is a key leverage point for increasing school readiness among young children. Finally, States must provide technical assistance and professional development to high-need LEAs regarding parent and family engagement.

ANNUAL STATE REPORT CARDS

One of the most important advances in accountability that was the result of NCLB was the collection of data regarding student academic proficiency and the requirement to report that data publicly in a manner consumable by parents, families and the general public. The committee whole-heartedly supports the continuation of reporting student academic proficiency and believes the reporting of other data will help hold States, LEAs and schools accountable to their stakeholders and will ensure they are held accountable for *all* students served.

SASA continues the data collection and reporting requirements from NCLB and adds a number of significant requirements.

Equity Report Card

Most significantly, SASA requires SEAs and LEAs to create an “*Equity Report Card*” (ERC). This is intended to be an easily understandable report of key characteristics of a school or LEA that can be compared among schools across a State in order to give parents and family members the ability to determine which school might be best for their children. The ERC must include five pieces of information: student proficiency by subgroup, school funding by sources, high school graduation rates, educational opportunities available at a school (e.g., pre-kindergarten, International Baccalaureate programs), and school climate information. SEAs and LEAs may choose to include other variables, however, these five variables should be clearly identifiable to parents and families.

School Athletic Data

Through an amendment offered by Senator Murray, the committee has added the requirement for schools to report the resources expended on athletics by gender. The committee’s intent is that: (1) information on equipment shall include any equipment replacement schedule; (2) uniform information shall include any uniform replacement schedule; (3) facilities shall include medical facilities, locker rooms, fields, and gymnasiums; (4) total expenditures for the team from all sources shall include school funds and funds provided by any other entities, such as booster organizations; (5) the employment status of coaches, trainers and medical personnel shall include whether such person is assigned to the team full-time or part-time, and whether such person is a head or assistant coach, trainer or medical services provider; and (6) the total salary expenditures for coaches, the total number of coaches, and for each coach an identification of such coach’s gender, employment status (including whether such coach is assigned to the team full-time or part-time, and whether such coach is a head or assistant coach), and duties other than coaching, shall be collected. Salary is only to include institutional pay.

Military-connected Student Data

Also by an amendment offered by Senator Murray, the committee added collection of information regarding students who are military-connected. The committee’s opinion is that this group of students is often highly mobile and information about their enrollment and outcomes is critical to serving them well. For the purposes of the data collection and reporting, “military-connected students” are defined as public school students with parents or guardians who serve in the Active Duty, National Guard or Reserve Forces.

FEDERAL PARAMETERS FOR STATE-DESIGNED ACCOUNTABILITY SYSTEMS

The committee recognizes that accountability systems that are more tailored to the needs and strengths of States and LEAs may be more successful at leveraging improvements in student achievement than the one-size-fits-all approach of the *No Child Left Behind Act*. However, it is important that in designing these systems certain principles be maintained. The committee bill includes Federal parameters for State-designed accountability systems that

offer flexibility while, at the same time, requiring States to set expectations for progress towards student college- and career-readiness.

Included in these requirements are systems that are capable of identifying schools not meeting subgroup performance targets, schools that are under-performing for more than 3 years, and schools that are the lowest achieving schools in the State in terms of student academic proficiency and, for high schools, graduation rate.

One problem with NCLB was its focus on schools that were chronically underperforming at the expense of schools that may have been performing well overall but were not serving one particular subgroup of students well. The committee intends for accountability and consequences to be applied to all schools for all subgroups, thus the requirement in section 1111(a)(3)(C) to create performance targets for every subgroup in every school. Beginning in the 2015–16 school year, every school not meeting its annual performance target for a subgroup for 2 years in a row must, in conjunction with its LEA, create a locally designed intervention to improve student achievement in that subgroup. If the school continues to not meet performance targets in the same subgroup for 3 additional years the school must work with the SEA to improve subgroup performance. The committee emphasizes that underperformance of a subgroup at schools successful with the balance of their students is a concern and must be addressed by the school, the LEA and, ultimately, the SEA.

Priority Schools

Beginning in 2015–16, SASA requires SEAs to identify the lowest achieving 5 percent of elementary schools in the State, the lowest achieving 5 percent of secondary schools in the State, each public high school with a graduation rate less than 60 percent, and each school that has been a focus school for the previous 6 years. LEAs must notify parents if their child's school is identified as a priority school. States must compile the list of priority schools and make it publicly available. Schools that are identified as priority have a 5-year period for turnaround. States may apply to the Secretary for a waiver of the requirements for priority schools if they determine that all schools are performing at a satisfactory level based on student achievement and, at the high school level, graduation rates.

This bill envisions LEAs playing a critical role in setting supporting conditions for priority schools to improve. LEAs must conduct a needs analysis for each identified school. LEAs must collaborate with parents, the community, teachers and other school personnel, and may work with an external partner, to determine which school strategies to implement in each identified school. LEAs must also implement a series of policies and practices to help these schools succeed, such as providing school staff with professional development based on the needs analysis, conducting regular teacher and principal evaluations, and providing time for collaboration among instructional staff.

LEAs are also required to provide instructional staff with timely access to student data and to use such data to implement a research-based instructional program that analyzes student progress

and performance and includes appropriate interventions for students. Recognizing that some elementary schools may be low-performing because students enter kindergarten below grade level and may have trouble catching up, the bill requires that, in the case of an elementary school with kindergarten entry, the needs analysis specifically measure school readiness of entering students. If school readiness is an issue, the LEA and school must coordinate with appropriate early childhood education programs and develop a plan to improve or expand early childhood options.

Focus Schools

SASA also requires SEAs to identify Focus schools, those schools that are not priority schools and that are in the 10 percent of schools with the greatest achievement gaps among subgroups. In addition, focus schools will also be identified from non-priority schools that are in the 10 percent of high schools with the greatest graduation rate gaps among subgroups.

In order to address these gaps in student achievement and graduation rates, the LEA, in accordance with the school, must develop and implement a measurable, data-driven plan to improve student outcomes.

The committee believes it is reasonable to expect a narrowing of any identified achievement gap within a 3-year period. Therefore, this bill puts additional pressure on LEAs that have not seen improvements by making any LEA with an achievement gap school that has been identified for three consecutive years ineligible for any priority, preference or special consideration for any grant, subgrant or other ESEA-funded program.

Multi-Tier Systems of Support

The committee encourages States and LEAs to develop and adopt the use of multi-tier systems of supports (MTSS) for students. These are comprehensive systems of differentiated supports that include evidenced-based instruction, universal screening, progress monitoring, formative assessments, and research-based interventions matched to student needs upon which educational decision-making using student data can occur. The committee also encourages the use of the principles of universal design for learning (UDL) and school-wide positive behavioral interventions and supports (PBIS) to create positive conditions for learning. The use of these approaches is beneficial for priority and focus schools as well as for schools not meeting the performance targets for subgroups of students.

State Reservation for School Improvement

To build State and LEA capacity for turning around low-performing schools, this bill allows the flexibility for States to continue to reserve up to 4 percent of their title I, part A, funds to carry out State and LEA responsibilities under section 1116. Ninety-five percent of the reserved amount must be used to carry out school improvement, either through subgrants or, with an LEA's agreement, directly by the State.

Public School Choice

In order to provide families with access to high quality education for their children, LEAs must provide students enrolled in priority schools with the option to transfer to another public school operated by the LEA, unless such an option is prohibited by State law. LEAs must provide this option not later than 3 months before the first day of the school year following identification. LEAs must also give transfer priority to the lowest achieving children from low-income families.

Transferring students must be enrolled in classes and other activities in the same manner as all other children at the public school. LEAs must allow a child who transfers to another public school to remain in that school until the child has completed the highest grade in such school.

School Improvement Strategies

The committee is sensitive to complaints about the prescriptive nature of the accountability provisions in the No Child Left Behind law. The committee also recognizes that the strict one-size-fits-all approach that was represented by AYP provisions has not led to improvement in many identified schools, particularly as the number of identified schools increase as the 2014 proficiency deadline approaches. To address these concerns, the committee bill focuses the federally prescribed interventions only for priority schools. The committee believes these schools are in need of significant change because many of them have been failing to improve student achievement for decades. To improve student achievement in schools identified as priority schools, the committee bill requires LEAs to implement an evidenced-based turnaround strategy in each identified school. To address many of the concerns the committee has heard about requiring specific models, including those models currently in place under guidance for the School Improvement Grant (SIG) program, the bill provides LEAs multiple models from which to select, including flexibility for rural LEAs. It also adds a set of LEA-level requirements to make the success of the strategies more likely. The six improvement strategies include:

Transformation Strategy: The transformation strategy requires LEAs to replace the principal (if the principal has served in that role for more than 2 years) with a principal who has a record of success in increasing student achievement, or with a principal who is specially trained in turning around low-performing schools. This element is shared with the strategic-staffing and turnaround models. The committee believes that staff working in priority schools must be committed to implementation of the transformation strategy. Therefore, under this strategy, existing instructional and school leadership staff must reapply for their positions, and all instructional and school leadership staff hiring must be done at the school through mutual consent for at least the duration of the 5-year turnaround period. The term “mutual consent” means a process through which the principal or hiring team and the instructional staff member or school leadership staff member agree to the placement at a school. The principal or hiring team must be permitted to select instructional and school leadership staff for the school from an unrestricted pool of internal and external can-

didates based on an assessment of the qualifications of the individual candidates.

Turnaround Strategy: This strategy also recognizes the importance of human capital in turning around priority schools. As in the transformation and strategic staffing models, it requires that the school replace the principal (if the principal has served in that role for more than 2 years) with a principal who has demonstrated a record of success in increasing student achievement or is specially trained in turning around low-performing schools. It also requires that all of the teachers in the school be determined to be effective instructors and that not more than 65 percent be retained.

Whole School Reform Strategy: The whole school reform strategy requires the implementation of an evidence-based strategy that ensures whole school reform. It must include a partnership with a strategy developer offering a school reform program that has demonstrated at least a moderate level of evidence, as shown by more than one well-designed or well-implemented experimental or quasi-experimental study, and demonstrated that the program will have a statistically significant effect on student outcomes. The committee expects the Department of Education to determine which strategies meet these requirements, which could include use of the What Works Clearinghouse. The committee recognizes that a limited number of models have achieved this level of evidence, but hopes that strategy developers will begin to undertake the evaluation necessary for their reforms to qualify.

Restart Strategy: Under the restart strategy, priority schools must convert to a charter, innovative, or magnet school. The committee believes that providing LEAs with the opportunity to convert a priority school to a magnet school or to create a new, innovative school, particularly in States that do not have charter school laws, provides additional flexibility to LEAs. In fact, schools in Lansing, MI; Cambridge, MA; Fort Meyers, FL; and Clark County, NV have improved performance in struggling schools by converting those schools into magnet schools. Schools that are converted to charter schools must work in partnership with a nonprofit charter school operator, a nonprofit charter management organization, or a nonprofit education management organization that has a demonstrated record of improving student achievement for students similar to those served by the school.

The committee recognizes that restarting a school is disruptive for students enrolled in the school that is being converted and believes LEAs must prioritize the learning needs of the students in these schools. Therefore, LEAs that implement the restart strategy must ensure that the new school serves the same grade levels as the original school and enrolls any former student of the original school who wishes to attend. Additional students would be admitted by a random lottery system if more students apply for admission than can be accommodated.

School Closure Strategy: The school closure strategy requires LEAs to close the priority school and enroll the students in other schools, which may include charter schools that are within reasonable proximity to the closed school. The committee expects LEAs to enroll these students in high-performing schools not schools slightly better than the closed school.

Department of Education-Approved Strategy: In recognition that there may be State level circumstances that influence the ability to turnaround school performance, the committee crafted SASA to allow States to offer a school improvement strategy for priority schools that is both evidence-based and has been approved by the Department of Education. The committee expects the Department of Education to approve only comprehensive evidence-based models that include a combination of key elements. The committee's intent is that this model cannot be used for the provision of private-school vouchers.

Improvement in Priority Schools

The committee recognizes that some priority schools will improve at a faster rate than others. States may want the flexibility to shift resources among schools during the identification period. Therefore, SASA provides that, at any time during the 5-year period, schools that have improved sufficiently would not continue to be identified by the State as a priority school. These schools may continue to receive such grant funds as are necessary for the full period of the grant so that these improvements can be sustained. However, the committee believes that schools that continue to be classified as a priority school after 3 years must implement the restart or school-closure strategy to ensure significant change in governance. A waiver can be obtained from the Secretary if the community conducts a needs assessment and determines a model different from closure or restart is likely to improve academic achievements at the school.

Professional Development Activity Reports

The committee recognizes the vast amount of excellent intervention work that is taking place in schools throughout the country. In order to collect and disseminate information regarding effective school improvement practices, SASA requires that LEAs collect information about how title II, part A professional development funds are used to improve school performance in priority schools that do not receive School Improvement Grants, and the outcomes from the practices. SEAs are required to disseminate these practices in order for all schools to benefit from the investment of professional development funds.

School Improvement Funds

The committee bill continues to support priority schools from two different sources—authorization of the School Improvement Grant (SIG) program and the required 4-percent set aside from title I, part A, funds at the State level for technical assistance and support for LEAs. Entities that may receive grant funds from the SIG include a State, a LEA that receives funds under this part and serves at least one eligible school, a consortium of such LEAs, or an educational service agency that serves at least one LEA.

States that receive school improvement funds must use 95 percent of these funds to carry out school improvement activities for eligible schools by either (1) awarding subgrants, on a competitive basis, to eligible entities for these activities; or (2) if the State chooses and the LEA agrees, directly providing the activities to the eligible school and LEA, or arranging for other entities to provide

such activities to the school. Subgrants are awarded for a 5-year period.

LEAs must meet certain key conditions in order to receive funds. They must demonstrate that they have:

- adopted human-resource policies that prioritize the recruitment, retention, and placement of effective staff in eligible schools;
- ensured that eligible schools have access to resources to implement the school improvement strategies described above;
- identified opportunities to reduce duplication, increase efficiency, and assist eligible schools in complying with reporting requirements of State and Federal programs;
- facilitated alignment and coordination between early childhood education and care programs and services serving students who will attend eligible schools that are elementary schools; and
- developed an early warning indicator system that monitors school-level data, and alerts the eligible school when a student indicates slowed progress toward high school graduation, so that the school can provide appropriate student interventions.

Regarding the early warning indicator system, research has shown that before actually dropping out, most students at risk send strong “signals” that they are having trouble in school. One study found that almost half of dropouts sent “warning signals” as early as sixth grade. These signals can be found in standard data that LEAs keep on their students.

States may withhold funds from schools for the final 2-year period if they have not made progress on “leading indicators.” This new definition of “leading indicators” highlights the importance of academic indicators (other than test scores) and school climate issues. Tracking leading indicators is important because improving student outcomes and closing achievement gaps takes time, and these data can therefore serve as intermediate measures of school improvement before the results show up in indicators like student test scores.

Blue Ribbon Schools

The committee believes that it is important for States to have the opportunity to identify and reward schools that are top performers. This bill allows States to identify Blue Ribbon Schools as the top 5 percent of the State’s public elementary schools and secondary schools based on the percentage of students who are on track to college- and career-readiness for English or language arts, and mathematics and, in the case of high schools, the school’s graduation rate. States must also look at the performance of student subgroups and, if the State chooses to measure student growth, the percentage of students attaining growth, and school gains. Schools identified as persistently low-achieving schools and achievement gap schools cannot be identified as Blue Ribbon Schools. States may reserve up to one-half percent of their title I, part A, funds to distribute rewards, on a competitive basis, to LEAs that serve one or more Blue Ribbon Schools so that the LEA may provide awards to such schools.

In addition to the possible financial reward, States must provide Blue Ribbon Schools with increased autonomy over the school’s budget, staffing, and time, and allow each blue ribbon school to have flexibility in the use of any funds provided to the school under

this Act for any purpose allowed under this Act, consistent with civil rights laws. LEAs must agree to use the award funds to improve student achievement and provide technical assistance to the lowest-achieving schools in the State that have characteristics similar to the Blue Ribbon School.

Centers of Excellence for Early Childhood Education

The committee recognizes the critical importance that high-quality early childhood education programs can play in the healthy cognitive, physical, social, and emotional development of children. SASA authorizes a new program, similar to one authorized in the Head Start Act, which recognizes and rewards early childhood education programs that have a demonstrated track record of preparing children for kindergarten. This program asks the Nation's governors to nominate outstanding early childhood education programs for grants distributed by the Secretary that can be used by programs to expand their reach in the community, and to provide technical assistance and dissemination of best practices to other early childhood education programs in its area and the State.

Green Ribbon Schools

SASA also creates a new category of recognition for exemplary schools by allowing the Secretary to set criteria for outstanding performance in such areas as reducing environmental impact, improving student and personnel health and wellness, and providing sustainability education. The Secretary may also establish an award program recognizing excellence in classified school employees.

PARENT AND FAMILY ENGAGEMENT

The committee bill envisions several key changes to the provisions of section 1118, relating to parent and family engagement. The lens of current law is expanded to encompass family members, in addition to parents and those who act in loco parentis. This change is intended to acknowledge the role that non-custodial family members play in the life of a child, and to encourage LEAs to strategically engage these adults. The bill includes requirements for LEAs to collaborate with community-based organizations, employers, and other entities in the development and implementation of parent and family engagement strategies, and for parent and family engagement compacts to describe outreach to community stakeholders. These changes recognize research on the critical role that non-custodial family members, mentors, and other caring adults can play in the positive development of children, and especially children from low-income and minority communities.

HIGHLY QUALIFIED TEACHER DEFINITION

This bill includes a revised definition of a highly qualified teacher which codifies existing flexibility for certain types of teachers so that LEAs can effectively staff their schools. The definition incorporates existing regulations that make clear that a teacher enrolled in an alternate route to certification program is considered highly qualified, as long as the teacher has passed the State subject matter certification or licensure test; is making satisfactory progress towards obtaining full certification within 3 years; and is partici-

pating in a high-quality, State-approved teacher preparation program.

The definition also provides flexibility for teachers in rural areas who teach multiple subjects, allowing them to be considered highly qualified if they have met the definition for at least one core academic subject and become highly qualified in the additional subjects within 3 years. The definition clarifies that a science teacher who holds a broad field science or an individual field science certification or licensure can be deemed by the State as highly qualified. The definition also aligns the definition of a highly qualified special education teacher with the definition included in the Individuals with Disabilities Education Act (IDEA).

The committee also provides a special rule for small, rural, and remote schools so that teachers in these schools are permitted to meet the highly qualified teacher requirement through distance learning and team teaching. The off-site teacher must be highly qualified in the subject being taught, be responsible for 50 percent of direct instruction, monitoring student progress, and assigning students' grades. The on-site teacher must be highly qualified in at least one other subject, must be present in the classroom throughout the period of distance learning, and must provide instructional support.

SASA also recognizes certain very specialized instruction and exempts those teachers from meeting the highly qualified teacher definition. These exemptions are:

- A teacher of Native American, Alaska Native, or Native Hawaiian language or culture, whether the teacher is teaching on a permanent, part-time, or occasional basis; and
- A teacher who is a Native elder or other authority on American Indian, Alaska Native, or Native Hawaiian history who provides instruction in such subject, whether on a periodic or one-time basis.

A teacher may also be considered highly qualified if the teacher is a participant in an exchange visitor program.

Finally, the committee signals its strong belief that teacher effectiveness is paramount by allowing States to deem teachers with high ratings under a rigorous teacher evaluation system to be considered highly qualified.

FISCAL REQUIREMENTS AND COMPARABILITY

The original intent of title I was to provide additional resources to States and LEAs for the education of disadvantaged children. In order to meet that intent, the law has required State and local funds be spent comparably between title I and non-title I schools, so that Federal dollars are supplementary.

To ensure this comparability of resource expenditure is taking place, SASA requires LEAs to use actual teacher salaries when calculating the resources expended at a given school. This provision of SASA closes a long-time "loophole" in the comparability requirements where average teacher salaries were used instead of actual teacher salaries. The committee recognizes that there is research that indicates significant disparities in spending between title I and non-title I schools. The committee's intent in section 1120 is to ensure title I dollars are provided to schools with concentrated

poverty as a supplement to a comparable allocation of State and local funds. This will ensure that taxpayer dollars serve the students for whom they are intended. In addition, the accounting of real per-pupil expenditures will increase transparency about the allocation of resources. The committee expects this data to be accessible to parents, taxpayers, LEAs, States and policymakers at all levels of government. Recognizing that States and LEAs will need time to put the appropriate fiscal mechanisms and data systems in place for school level expenditures and other data to be reported accurately, LEAs will not be required to comply with these changes until the 2015–16 school year.

In closing the so-called comparability loophole, the committee's intent is not to require LEAs to transfer school personnel in order to comply with the comparability requirement. The comparability provisions require that title I schools do not have fewer total State and local resources than the average of non-title I schools in a LEA. LEAs must consider all resources, not just salaries.

COORDINATION REQUIREMENTS

Similar to current law, the committee bill encourages LEAs to coordinate with early childhood education and care programs and providers, including Head Start agencies and providers of services under Part C of IDEA, on a variety of matters. Activities identified include transfer of records, with parental consent, from early childhood education and care programs to local schools; ongoing communication between early childhood education and care program staff and school staff for the purpose of ensuring developmentally appropriate instruction and shared expectations; joint training opportunities for early childhood education and care program staff and school staff; the development of transition procedures to improve school readiness for children; and parent-education efforts that help parents of young children understand the expectations of, and services offered by, the school in which their child will enroll.

EDUCATION TECHNOLOGY

It is the committee's view that the development and implementation of education technology programs and activities continue to be important allowable uses of title I funds. While technology can never replace effective teachers, the committee believes that educational technology can help provide differentiated instruction and personalized learning to meet each student's unique needs; engaging and updated content; timely information that educators can use to improve instruction and decisionmaking; enhanced parental engagement through the provision of online information; and access to courses often not otherwise available.

Therefore, the committee supports States, LEAs, and schools that choose to use title I program funds for technology and digital learning to best meet title I program goals and requirements.

Grants for State Assessments

The committee recognizes that the requirement of the new statewide accountability and assessments systems will be significant for States.

Therefore, a one-time doubling of funds for States to use to improve their assessment systems has been provided as described in section 1141.

TITLE I, PART B: PATHWAYS TO COLLEGE

Subpart 1: Secondary School Reform

The committee recognizes that in today's increasingly global economy, it is critical that students graduate from high school prepared and ready to succeed in college and the workforce. Unfortunately, many of our Nation's high school students do not graduate on time, or do not graduate at all. Additionally, low-income and minority students graduate at significantly lower rates than their peers. The Pathways to College Program supports the implementation of innovative and effective secondary school reforms both LEA-wide and in high schools with graduation rates below 75 percent that do not receive SIG funds. The bill requires grant applicants to implement reform strategies in the feeder middle schools serving these high schools because the committee recognizes that many of the issues facing at-risk youth begin in middle school.

The committee intends the definition of "Competency-based learning model" be aligned with the following principles of competency-based education: (1) Students advance upon mastery; (2) Competencies include explicit, measurable, transferable learning objectives that empower students; (3) Assessment is meaningful and a positive learning experience for students; (4) Students receive timely, differentiated support based on their individual learning needs; and (5) Learning outcomes emphasize competencies that include application and creation of knowledge, along with the development of important analytical skills. In addition, grantees shall include a plan to ensure that the practices implemented meet these principles of competency-based learning.

The committee recognizes that some local educational agencies allow all students in a LEA the choice between which public high school they wish to attend upon matriculating from an elementary or middle school. In the case where a majority of the students at an elementary school or middle school do not go on to attend any single high school in the LEA, the committee intends for the definition of "feeder middle school" to be interpreted as an elementary or secondary school where a cumulative majority of students in the school go on to attend any of the eligible secondary schools in the LEA.

The committee also intends that high schools in receipt of Secondary School Reform Grants that offer dual-enrollment coursework must offer such coursework free of charge to low-income students.

Subpart 2: Accelerated Learning

The committee bill maintains support for Advanced Placement (AP) and International Baccalaureate (IB) courses, while also providing more options for States and LEAs in achieving the goals of access to college-level coursework for low-income students. Changes to the definition of an AP or IB examination would allow States and localities the option to choose another evidence-based program model that increases student access to rigorous courses in core aca-

demic subjects, is benchmarked to college readiness, provides aligned end-of-course assessments, and includes educator resources to improve instruction.

The committee bill incorporates language enacted by Congress in the America COMPETES Act of 2007 and maintained in the reauthorization of that Act in 2010. With these provisions, Congress has already acknowledged much advancement from evidence-based program models showing large increases in academic success for students who had access to rigorous high school core courses benchmarked to college readiness. The language in the committee bill is intended to provide more students with the opportunity for achieving college-readiness through rigorous courses than is provided in current law.

TITLE II: SUPPORTING TEACHER AND PRINCIPAL EXCELLENCE, CONTINUOUS IMPROVEMENT, AND SUPPORT FOR TEACHERS AND PRINCIPALS

Professional Growth and Improvement

The committee feels strongly that the Federal focus should shift from teacher qualifications to teacher effectiveness. Teacher and principal evaluation systems are key to improving teaching practice and student learning and can be linked back to teacher preparation programs so that LEAs can make better decisions about which programs they partner with to hire teachers. The committee also feels strongly that such systems should be grounded in helping educators improve their instruction, through improved professional development. As such, the bill requires districts to develop professional growth and improvement systems that include teacher and principal evaluations based on a set of limited, but critical, parameters, as well as professional development aimed at addressing deficiencies identified through evaluations. These evaluation systems must provide meaningful feedback to teachers and principals; establish multiple categories of teacher and principal performance; evaluate teachers regularly using multiple measures; be regularly reviewed to ensure that they provide meaningful differentiation; and include training for evaluators. Evaluations must be based on academic achievement and growth, classroom observations, and other measures that inform teacher performance (for teachers) and on academic achievement and growth, instructional leadership, and, if districts choose, other measures of principal performance (for principals). The evaluation systems must be able to provide meaningful feedback to teachers and principals in a timely manner and provide data to inform decisions about professional development activities. These parameters are critical to efficient teacher and principal evaluation systems, and the committee believes the Federal Government must promote alignment to these parameters.

The committee is aware that many States and LEAs have already developed systems either on their own or as a requirement of a Federal grant or ESEA flexibility applications (aka, "waivers"). It is important to the committee that, where possible, this bill does not alter the hard work already conducted by States in this arena. As such, States and LEAs with systems approved by the U.S. Department of Education are not required to alter the components of their current teacher and principal evaluation systems. Additionally, it is the committee's intention that the implementation of new

systems does not alter the rights and remedies secured by educators through their local collective bargaining agreements.

The committee believes strongly that incentivizing States and LEAs to implement robust teacher and principal evaluation systems tied to professional development is one of the most important policies in this bill that will improve teaching and school leadership across the country and lead to better student outcomes.

Uses of Funds

The bill makes several important changes to title II, part A, which has historically been used by LEAs for professional development and to provide schools with additional teachers.

The bill, for the first time, requires LEAs to use some of their title II–A funds for professional development and specifically requires LEAs to spend 20 percent of their money to provide professional development in the lowest performing schools. Additionally, the bill includes a definition of professional development that will drive better investments in this area. By including a tighter definition, this bill will help ensure that Federal funds will be expended on professional development that will improve teaching practice and student learning. Districts will conduct professional development activities that are evidence-based and aligned with the results of evaluations in order to improve student academic achievement and increase students’ abilities to meet college- and career-ready standards. The committee also intends for LEAs to collaborate with local early childhood programs and has allowed for early childhood educators to be included in LEA professional development activities.

This bill otherwise streamlines the list of allowable activities in title II, part A, intentionally limiting them to activities that are likely to have the greatest positive impact on teaching and learning. For example, for the first time, developing and implementing evaluation systems is included as one of the high-impact activities that LEAs may fund using title II dollars. In not making this a required use of funds, the committee recognizes that LEAs may already be using Federal and State resources to conduct this work.

The bill also sets parameters on how LEAs may use these funds for class-size reduction. If LEAs choose to use funds to hire additional teachers to reduce class sizes, these teachers must teach in the early grades (kindergarten to third) and class sizes must be reduced to a size where research has proven that students will benefit. The largest and most rigorous class size study, the Tennessee Student Teacher Achievement Ratio, or STAR experiment, demonstrated that reducing class sizes in kindergarten through third grade to between 13 and 17 students led to statistically significant student achievement gains, and that these gains were more pronounced for minority and economically disadvantaged students. Followup studies showed that these gains persisted for students who had attended smaller classes.

This committee wishes to emphasize the importance of equity and ensuring that students have access to effective teachers. States and LEAs are encouraged to use their title II, part A, funds to address any inequities that may exist in the distribution of teachers based on their qualifications and, where information is available,

on their effectiveness at producing positive academic outcomes for students.

The committee also recognizes the significance of high-quality mentoring for new teachers and principals. Title II, part A, includes a definition to ensure that funds spent for this purpose will support strong mentoring programs and practices. Mentoring is essential to retaining teachers as their decisions to remain in teaching are often affected by the quality of the support teachers receive in their first years. And, as teacher evaluation systems continue to develop, LEAs can use title II, part A funds to focus their efforts on retaining top performers.

Other allowable activities include establishing beginning teacher induction programs, creating career ladders, increasing teacher capacity to evaluate student work, and recruiting teachers for high-need schools and subject areas.

The committee also intends that States and LEAs have the flexibility to identify their local teaching and learning needs and use Federal funds accordingly. In keeping with this intent, high-need subjects such as “mathematics” and “science” may be defined to include other STEM-related subjects, such as computer science, engineering and other related subjects.

Training Academies

The bill also allows participating States to set aside 1 percent of their title II, part A funds to support the creation and oversight of teacher and principal training academies. These academies must be rigorously selective in who they admit, emphasize clinical training methods to prepare teachers and principals, and tie graduation to improving student academic achievement. In return for accepting this level of accountability, academies will be free from burdensome, input-based regulations. States will be required to establish a special entity to oversee teacher and principal training academies that has the authority to shut down low-performing programs.

Principals

Extensive research shows that school leadership is second only to teacher quality among school-related factors that influence student achievement. While teacher quality has the greatest impact on achievement, principal quality determines whether schools can attract and retain effective teachers. Historically, States and LEAs have used very little of their title II, part A, funds to support the professional development or training of principals. As such, the bill ensures that of the 2 percent to 5 percent States set-aside for State-level activities, the improvement of principal performance is among the few activities in which a State must invest. In recognition of the importance of school leadership, the committee also includes support for principals as one of the activities that LEAs may direct their title II, part A, funds towards. Effective principals are critical to attracting and retaining effective teachers in schools, particularly those serving the most disadvantaged students. LEAs need to do as much as possible to get strong leaders into these schools, and Federal funds can help in this regard.

Additionally, the bill creates the Principal Recruitment and Training Program as subpart 5 of title II, part A, to recruit, train and support principals in schools that are high-need, persistently

low-achieving, achievement gap, or rural schools. This program replaces the current school leadership program. The Principal Pathways program improves upon current law by focusing on recruitment and training practices that have been demonstrated to strengthen school leadership.

The new program improves the rigor of the application process for school leadership grants. There is a priority for entities that have a record of success in preparing principals who go on to improve student outcomes in eligible schools. In addition, the program increases the accountability of grantees for achieving results. Grantees will compete to renew their grants and scale up their efforts based on their record of improving student outcomes. Grantees will also use data on the performance of their programs for continuous improvement.

The committee also recognizes that it is essential to build the leadership capacity necessary to turn around persistently low-achieving schools. The program will establish a school turnaround leadership academy with a focus on recruitment, training, placement and support of leaders specifically focused on turning around persistently low-achieving schools and dissemination of research and information on effective school turnaround leadership.

Teacher Pathways to the Classroom

Title II, part B of the committee bill replaces the Transitions to Teaching program, which was targeted at programs preparing alternate route teachers, with the Teacher Pathways to the Classroom program, which no longer focuses on how teachers enter the classroom, but rather improving their effectiveness in teaching students. The most recent research indicates that the pathways to the classroom, whether it is a traditional, alternate route or residency model, are not predictive of the teachers' success in the classroom. What matters is the quality of the preparation program. A 2009 randomized study by Mathematica Policy Research found no statistically significant difference in performance between students of teachers prepared through alternate routes compared to those prepared through traditional routes to teaching.

Given this research, the committee believes that Federal funding should be provided to teacher preparation programs based on the quality of the teaching candidates it produces, as opposed to the characteristics of the teaching program itself. The competitive grant program in this bill allows high-performing teacher preparation programs to compete for Federal funding to recruit and train new teachers in high-need subjects and fields to teach in high-need schools. High-quality traditional route programs will be able to compete on equal footing with alternate route programs with proven records of success, such as Teach for America and the Teaching Fellows programs operated by The New Teacher Project, as well as teacher residency programs with a strong record of producing candidates that increase student achievement.

Teacher of High-need Subjects

The committee intends, in section 2201(b)(2), that States and LEAs have the flexibility to identify their local teaching and learning needs and use Federal funds accordingly. In defining mathematics and science as high-need subjects, the committee intends to

include other STEM-related subjects, such as computer science, engineering and other related subjects.

Teacher Incentive Fund Program

The committee bill authorizes the Teacher Incentive Fund (TIF), a program that was first authorized in 2006 through Title V, Part D of the Departments of Labor, Health and Human Services, and Education, and Related Agencies Appropriations Act. However, the committee makes a number of important changes to the program. The TIF program currently provides grants to States and LEAs to develop or improve performance-based compensation systems for teachers and principals. As an authorized program in ESEA, TIF will provide competitive grants to States and districts to develop, implement, improve, or expand strategies, including performance-based incentives, to increase the number of highly-effective teachers and principals in high-need schools. Priority will be given to grantees who target placing highly-effective teachers and principals in priority schools or who have already developed a professional growth and improvement system, as described in title II, part A. The committee strongly believes that the TIF program, as a competitive grant program, can lead the way in driving improvements in distributing effective teachers across States and LEAs and that using data gleaned from sound evaluation systems for the distribution of the most effective educators, is the obvious next step in our attempt to close the achievement gap and ensure equal educational opportunities for all students.

Education Technology

The committee maintains that professional development about and through technology is helpful in meeting the goal of college- and career-readiness for students. Therefore, the committee encourages States, LEAs, schools, and other entities involved in the preparation and professional development of educators to ensure teachers and administrators have the knowledge and skills to effectively use technology and digital resources to improve teaching, learning, and administration.

TITLE III: LANGUAGE INSTRUCTION AND ACADEMIC CONTENT INSTRUCTION FOR ENGLISH LEARNERS AND IMMIGRANT STUDENTS

The changes reflected in title III are designed to better leverage funds to supplement the use of evidenced-based programs and practices, including professional development, to support the acquisition of English and the ability for English learners to graduate college- and career-ready. Key reforms include updating the formula used to allocate resources to more accurately provide resources to the school and LEAs serving English learners; requiring States to maintain existing investments in educational supports for English learners; and calling attention to long-term English learners to ensure that underserved students receive additional instructional supports. In order to allow for better service delivery to students at all levels of English proficiency, States and LEAs are encouraged to continue to monitor the progress of English learners throughout their school careers, including early childhood education and care settings, and recognize the developmental nature of second language acquisition.

States are no longer required to assess progress according to established annual measurable achievement objectives, but they are still responsible for ensuring that English learners attain English proficiency and find ways to demonstrate such proficiency in core academic subjects.

This title also authorizes national projects, including partnerships to support the pursuit of advanced degrees for individuals and in fields that will support improved quality and increased access to programs designed to support the learning and development of English learners. It is the intent of these strategies to support capacity building efforts to identify and better disseminate effective strategies for supporting the learning and development of English learners.

Local Plans

The committee bill recognizes the importance of well-developed local plans for implementing supports for English learners. The committee especially emphasizes the importance of creating strong community and family engagement to serve English learners. Because of limited resources, the committee emphasizes that local plans should target funds to schools with the highest need. Local plans should also ensure that all teachers of English learners are fluent (i.e., written and oral communication skills) in the language of instruction.

State Activities

The committee intends for States to support LEAs and therefore, SEAs may use up to 10 percent of their grant allotment, to conduct activities that will assist LEAs to better serve English learners.

Local Evaluation and Accountability

The committee bill describes in section 3121, the evaluation requirements for eligible entities that receive a subgrant from a State educational agency. An entity must provide an evaluation to the agency at the conclusion of every second fiscal year during the lifetime of a subgrant. The evaluation format is prescribed by the agency, and includes a description of the following items: programs and activities conducted with funds; progress made by English language learners as measured by State English language proficiency assessments; the number and percentage of children in programs and activities who meet the established target; and progress made by former English learners in meeting college- and career-ready academic content standards.

The evaluation is to be used by the entity and the State educational agency to determine program and activity effectiveness, to identify and inform potential improvement processes, and to ultimately determine award of continuation funding for specific programs or activities. The evaluation must provide information regarding program and activity enrollment, as well as any other required information by the State. The report must include the percentage of children with respect to the English proficiency progress, transition to classrooms not tailored to English learners, attainment of college- and career-ready standards, and finally, those not exempted from the State reading or language arts academic assessment. A State must approve any evaluation measures that are de-

signed to assess progress in attaining English proficiency, in meeting college- and career-ready student academic achievement standards, and progress in meeting the annual State performance targets.

On an annual basis, each entity and State educational agency must establish agreed upon performance targets for the percentage of English learners who are making progress in achieving proficiency not more than 5 years after identification as an English learner. In the case of a student who will graduate from secondary school in less than 5 years, the student would not be counted as a graduating student in the local educational agency's graduation rate calculation. If an entity fails to meet the local performance targets, the State educational agency must require the entity to develop and implement an improvement plan. The State educational agency must provide technical assistance to the entity during this time. If the entity fails to meet the local performance targets 1 year after identified as being in need of improvement, the State educational agency must identify the entity as needing State support and require the entity to develop and implement a plan to modify the existing curriculum, program and method of instruction. The entity must submit this plan for State approval. If, 1 year after being identified as needing State support, the entity again fails to meet performance targets, the State educational agency must identify the entity as in need of State action. The State educational agency must then manage the subgrant funds and programs for 4 years, or until the local performance target is reached. After 4 years—or after the goal is reached, if sooner than 4 years—the State educational agency institutes a 2-year probationary period. If the entity fails to meet the local performance target at any time during this period, the State educational agency must manage the subgrant funds and programs for the duration of the probationary period.

State Accountability

The committee bill describes in section 3122 the accountability measures for States, particularly in regards to State performance targets. Each State educational agency must establish a State performance target for the percentage of English learners served by the State who are making progress in achieving English proficiency not more than 5 years after being identified as an English learner. State performance targets are subject to approval by the Secretary. Each State educational agency is responsible for ensuring that local performance targets result in overall achievement of the State's performance target.

If a State educational agency fails to meet the performance target for 2 consecutive years, the Secretary must require the State to develop and implement an improvement plan. The Secretary must provide technical assistance to the State educational agency during the development and implementation of the improvement plan. If a State educational agency fails to meet the performance target for 4 consecutive years, the Secretary must require modification of the State plan and methods of instruction. Additionally, the Secretary must require a State educational agency to identify low-performing local educational agencies and then develop and implement a plan to partner low-performing local educational agencies

with high-performing local educational agencies. This would entail reallocation of any grant funding that would have been distributed to the low-performing local educational agency, to the high-performing partner local educational agency. In the case of a student who will graduate from secondary school in less than 5 years, the student would not be counted as a graduating student in the local educational agency's graduation rate calculation.

Reporting Requirements

The committee bill describes in section 3123 the reporting requirements for State educational agencies, as well as the U.S. Department of Education. Each State educational agency that receives assistance must provide an annual report to the Secretary that includes information on the following four areas: progress in the development and implementation of English language proficiency standards; student progress in achievement of English language proficiency; a description of State programs and activities; and the effectiveness of such programs and activities as related to improving the education provided to English learners.

Every 2 years, the Secretary must submit a comprehensive report to the authorizing committees of Congress. This report must contain the types and descriptions of educational and instructional programs and activities carried out to serve English learners, as well as the effectiveness of these programs. It must also include a critical synthesis of data reported to States, including the number of programs or activities subject to accountability measures due to a failure to meet local performance targets (as described in section 3121(b)(4)). A description of any technical assistance provided by States must also be included. This report must also contain an estimate of the number of certified or licensed teachers working with English learners, as well as an estimate of the number of such teachers needed for the succeeding 5 fiscal years. Lastly, any major findings of evidence-based research carried out under this title and any other pertinent information gathered from reports submitted to the Secretary shall be included.

Professional Development Grants

The committee bill describes in section 3131 discretionary grant funding to institutions of higher education or nonprofit institutions in consortia with State or local educational agencies to provide for relevant professional development activities in the area of English language instruction. These grants are awarded on a competitive basis and are not to exceed a period of 5 years. They are to provide for professional development activities that will improve classroom instruction for English learners and to assist educational personnel working with English learners to meet high professional standards, including certification and licensure standards.

Grants awarded under this section may be used to support partnerships between State or local educational agencies and institutions of higher education, support research on relevant promising practices, support strategies that promote school readiness and high school graduation, and support strategies that strengthen family and community engagement. Additionally, grant funds may be used to support the development of appropriate curricula, the

dissemination of evidence-based best practices and technical assistance.

Commission on Assessment of English Learners

The committee bill describes in section 3132 the establishment of an independent commission on the assessment and advancement of English learners. The members of the commission must be appointed within 6 months of the date of enactment of SASA. The commission must be comprised of individuals with experience and expertise in the educational advancement and development of English learners. The Secretary must ensure that selected individuals are deemed competent experts. The commission must provide the Secretary with advice and recommendations regarding proficiency standards, assessments—including early learning assessment strategies—accommodations, and accountability systems. Additionally, the commission must provide guidance related to the formation of relevant peer review panels and ensure that research, development and dissemination activities of the Department address identified gaps. The commission will also help to identify ways to address the needs of English learners in Departmental program planning, and to support capacity-building efforts to assist local educational agencies and schools.

English Language Acquisition Technology Innovation Grants

The committee recognizes that new innovations are necessary to address the needs of SEAs and LEAs when instructing English learners. SASA provides for the use of funds for grants in the area of English language acquisition technology for purposes of pursuing research and development to improve English proficiency and academic achievement for English learners. The Secretary is authorized to establish processes for the development and execution of the English language acquisition technology innovation grant projects and the solicitation of entities to carry out the projects. The Secretary may award grants, contracts, cooperative agreements, and cash prizes, as well as enter into other approved transactions with entities pursuing research and development in this area. Additionally, the Secretary may obtain evaluations of the award processes and gauge the effectiveness of individual projects funded by the grant program. The Secretary may use funds made available for the grants to pay for the cost of these evaluations.

Dissemination of evidence-based, effective practices and technologies developed with the support of these English language acquisition technology innovation grants is to occur through comprehensive centers, the regional educational laboratories system, or other appropriate dissemination means. To the maximum extent possible, the Secretary shall ensure that activities funded through this grant program are not duplicative of activities under programs carried out under Federal law by the Department or other Federal agencies.

TITLE IV: SUPPORTING SUCCESSFUL, WELL-ROUNDED STUDENTS

Improving Literacy Instruction and Student Achievement

The first foundational element of the Improving Literacy Instruction and Student Achievement program is to reinforce that literacy

is a set of skills that build from birth to grade 12 and must be addressed in a comprehensive and consistent manner. Research and best practice over the past 20 years has clearly shown the links between oral and written language, vocabulary development and reading achievement. Therefore, becoming an effective learner requires literacy instruction targeting a comprehensive set of skills. Under previous systems, if children were on grade level in reading by the fourth grade, they were assumed ready to become learners of more complex content. However, experience has demonstrated that reading and writing instruction only becomes more complex, and many children who need additional assistance in the early grades will continue to need selective assistance as the academic content becomes more complex. Therefore, the bill calls for effective literacy instruction from birth through grade 12, ensuring that children are appropriately supported at each stage in their academic development.

A second critical element of this program is a strengthened comprehensive approach to ensuring that students leave high school with advanced reading and writing skills needed to succeed in college and a career. In order to accomplish this, teachers and school leaders must be trained and confident in using evidence-based instruction beginning in the early grades through middle and high school. This will assure that more students are instructed in higher levels of reading and writing that correspond to the full range of State English language arts standards that will support the higher literacy skills that today's postsecondary education and the advanced, global workplace demand.

A third component of the program creates a comprehensive approach to assessment. The committee's bill includes requirements for both summative and formative assessments to create critical tools for understanding if a program is effective (summative) and to inform and improve ongoing instruction (formative). These requirements complement other aspects of assessment included in the bill.

A fourth component of the program is for States and school districts to develop and implement plans that both make use of State and local strengths as well as to reflect the unique needs of each community. Needs vary related to improving literacy instruction in nearly every State and often needs vary within a State. A thoughtful planning process is integral to assure all populations of students and the setting in which they live and attend school must be taken into consideration. The planning requirement directs States to reflect the wide range of literacy service providers and literacy expertise within the State.

The bill articulates that federally supported professional development programs must include important key components to be successful. For example, the program must be specific to an area of instruction especially literacy instruction from birth to grade 12. Another component is job-embedded professional development that reflects what teachers and school leaders believe they need to be effective, including a needs assessments and implementation of evidence-based instruction.

The bill targets high-poverty communities. Head Start, community childcare block grants and State-supported programs for assisting high poverty families have traditionally not included a focus

on education. To develop effective learners, the literacy program must support evidence-based concepts that stem from an early learning program. Similarly, a blended and integrated reading and writing program is ideal to assure students achieve a deeper understanding of more complex content.

Additionally, the committee would like to clarify that eligible entities that receive subgrants in support of birth through kindergarten entry literacy may utilize funding to provide targeted instruction for children whose early literacy skills are below the appropriate age or developmental level as demonstrated by a screening assessment.

Improving Science, Technology, Engineering, and Math Instruction and Student Achievement

To ensure future competitiveness in the global economy, America requires a workforce highly skilled in science, technology, engineering and mathematics (STEM). Yet, our education efforts in these critical areas lag behind those of other advanced nations. The committee bill includes a new Improving Science, Technology, Engineering, and Math Instruction and Student Achievement program as part B of title IV that will improve student academic achievement in STEM by:

- Getting students engaged and excited about STEM subjects through high-quality instruction, opportunities to participate in STEM competitions, and exposure to STEM careers;
- Helping more students access high-quality STEM courses and learning opportunities;
- Improving the quality and effectiveness of classroom instruction by recruiting, training, and supporting excellent STEM teachers and providing robust tools and supports for students and teachers; and
- Closing student achievement gaps and preparing more students to be on track to college- and career-readiness and success in STEM subjects.

Grants will be distributed to States (alone or in partnership with other States, non-profit entities, institutions of higher education or educational service agencies) by formula if the annual appropriation exceeds \$500 million; below this amount, grants will be awarded to States competitively.

The committee recognizes STEM education as a national priority in the country's elementary and secondary education system. For the purposes of this title, the committee would like to clarify that "STEM education" encompasses science, technology, engineering and mathematics as well as other academic subjects, such as computer science, that build on these disciplines, are important to scientific discovery, business and industry and that States identify as part of the State analysis required by section 4204 (b)(1).

The committee recognizes the importance of increasing access for students who are members of groups underrepresented in STEM areas and requires that States describe how grant activities will increase access for such students. It is the intent of the committee that such efforts include female students, minority students, students who are English language learners, children with disabilities, and students from low-income families.

The committee also recognizes that individuals with strong STEM skills have opportunities for much more lucrative careers outside of teaching. At the same time, research shows that well implemented mentoring programs help provide opportunities for teachers to learn from their colleagues and help provide the support that new teachers need to remain in teaching. In recognition of the need to invest in strategies to retain excellent STEM teachers and supporting novice STEM teachers, the committee bill includes a set-aside for a STEM Master Teacher Corps program. The intent of the STEM Master Teacher Corps program is to improve the ability of *all* teachers to teach strong STEM skills to their students by offering career advancement opportunities and higher pay to the top 5 percent of K–12 STEM teachers in return for their mentorship of and sharing best practices with other, less experienced STEM teachers.

Improving Access to a Well-Rounded Education

Current Federal approaches to helping State efforts toward enriching the curriculum have been in the form of separate, uncoordinated discretionary grant programs for individual academic subjects that had significant benefits for a relatively small number of LEAs that were able to successfully compete for funding. But these single-subject competitive programs did not leverage broader change in State and local policies and practices in ways that considered all academic subjects offered, as a whole. Therefore, the committee authorizes the Increasing Access to a Well-Rounded Education program as part C of Title IV. This program requires applicants to provide access to a well-rounded curriculum by giving grants to States, in partnership with LEAs, educational service agencies, and non-profit organizations, to increase the access of low-income students to a well-rounded education. The grants will be distributed by formula when appropriations for the program reach \$500 million, and will be awarded competitively below that. The committee bill eliminates a number of programs that promote instruction in a variety of subjects, including Arts in Education, Civics, Teaching American History, Economics Education, and the Foreign Language Assistance Program. This program will allow States to continue to build teacher capacity and increase the access of low-income students to a well-rounded education, including in the arts and music, civics and government, economics, environmental education, financial literacy, foreign languages, geography, health education, history, physical education, and social studies. The committee recognizes that arts and music include a range of disciplines including, but not limited to, dance, media arts, music, theater, and visual arts.

Successful, Safe, and Healthy Students

The committee believes that all children should attend schools that are safe, drug-free and that foster a positive learning environment.

As such, the committee bill authorizes the Successful, Safe, and Healthy Students program as part D of title IV, which will advance student achievement and positive child and youth development by promoting student health and wellness, preventing bullying and harassment, violence, and drug use, and fostering a positive school

climate. States receiving grants must have established a statewide physical education requirement, and require all LEAs to have in place anti-bullying and harassment policies to be eligible.

To support positive conditions for learning, States will receive funding to implement programs to promote student health, fitness, and mental health, and to prevent drug abuse and school violence. To support data-driven prevention and foster student success, the committee bill authorizes a minimum of \$30 million for formula grants to help all States develop or enhance systems that will give local leaders the information they need to improve the conditions for learning in their schools and communities.

These data systems will provide to each State the support necessary to measure the conditions for learning in each school. Resources will also be available for grants to LEAs to establish policies and activities to improve the conditions for learning in each of their schools. This legislation gives State and LEAs the resources and opportunities to create safe, healthy schools that will enhance the academic achievement of students.

SASA also authorizes the Successful, Safe and Healthy Students State Grants program to implement programs to support positive conditions for learning by promoting student health and fitness, mental health and counseling services, and drug and violence prevention. The committee intends that funds for this program will be distributed by competitive grants procedures if appropriated funds are less than \$500 million. States receiving funding under this program must distribute subgrants competitively to LEAs or partnerships of LEAs and non-profit organizations. It is the intent of the committee that these partnerships would enhance an LEA's capacity to implement health, mental health, and prevention programs. The committee intends for States to distribute subgrant funds in the following manner: not less than 20 percent for programs to promote physical activity, education, and fitness and nutrition; not less than 20 percent for drug and violence prevention; and not less than 20 percent for programs to promote mental health.

The committee expects that grantees will use data from the conditions for learning measurement system to target funding and program design. In addition, grantees must annually report to the public on data regarding the conditions for learning.

It is the committee's intent that grant funds provided by the Successful, Safe and Healthy Students program support the creation of the essential conditions for learning in schools, including adequate physical activity, positive mental health, good nutrition, and safe environments. Those conditions include physical and emotional safety for both students and school personnel and promote positive character development in our youth. Schools with the essential conditions for learning also provide for opportunities for good nutrition, and are free of violence, harassment, and bullying. These schools are free of weapons and prevent the use and abuse of drugs and alcohol. The committee understands that students experience violence in many forms, including dating violence. It is the intention of the committee that funds allocated for violence prevention activities could include activities to reduce incidences of dating violence between students.

Student Non-Discrimination Act

The committee bill authorizes the Student Non-Discrimination Act (SNDA) with the intent to ensure all students have access to a public education in a safe environment, free from discrimination. This includes freedom from harassment, bullying, intimidation and violence on the basis of sexual orientation or gender identity. SASA establishes a comprehensive Federal prohibition of discrimination in public schools based on actual or perceived sexual orientation or gender identity. It provides LGBT students similar civil rights and protections against bullying and harassment as those that currently apply to students based on race and gender. It is the committee's intent to ensure these protections for LGBT students and ensure that all students have access to public education in a safe environment free from discrimination, including harassment, bullying, intimidation and violence. It is also the committee's intent to provide students with meaningful and effective remedies for discrimination that occurs in public schools based on actual or perceived sexual orientation or gender identity, modeled after the guarantees in title IX. Like other civil rights laws, it is the intent of this provision of SASA to prompt schools to avoid liability by taking proactive steps to prevent the discrimination and bullying of students protected by the bill.

21st Century Community Learning Centers

The committee recognizes that students, particularly those who are furthest behind, benefit from more time for learning. Programs that significantly increase the total number of hours in a regular school schedule can lead to gains in student academic achievement. Yet American students spend about 30 percent less time in school than students in other leading nations. Students in China, Japan, and South Korea who attend school 40 days more on average than American students significantly outperform American students in math and science.

As such, the committee bill gives eligible applicants the authority to apply for grants to fund (1) the activities currently allowed under the program (before-school, after-school, and summer-learning programs); (2) school-based extended learning programs that are optional or for targeted groups of students; or (3) a redesign and expansion of the school day, week or year, for all students across all grades, to creatively integrate academic and enrichment strategies. The bill expands the current uses of the program to include expanded learning time because the committee believes that it is a separate, but related concept, in that the goal is to extend, rather than supplement learning time.

Additionally, the committee believes that evaluation data will yield valuable information on the models and their implementation. The committee has directed the U.S. Department of Education from prioritizing one 21st century community learning center model over others. The committee does, however, emphasize that this should not be construed to prohibit the Department from providing best practice information and technical assistance under the 21st Century Community Learning Centers program.

The committee believes that strong partnerships between schools and communities is an important aspect of this program. To make partnerships between community-based organizations and LEAs

most effective, the committee believes partnerships between local education agencies, schools and community-based organizations should be marked by active collaboration, including the appropriate sharing of relevant student data among the schools and organizations, and any partnering entities, while complying with applicable laws relating to privacy and confidentiality. Additionally, while the committee supported Senator Whitehouse's amendment to clarify that either the LEA or the community partner could be the lead applicant and fiscal agent, the committee believes that public agencies are important partners and suitable lead applicants and fiscal agents and intends to rectify this omission.

Finally, it is the committee's intent that funds provided under this section can be used for high quality mentoring activities. Mentoring programs based on scientifically valid research have shown to be a cost-effective strategy for improving academic performance, reducing dropout rates, preventing substance abuse, and promoting mental health and self-esteem.

Promise Neighborhoods

The committee believes that authorizing the Promise Neighborhoods program will allow communities to leverage Federal funds to design and implement a comprehensive pipeline of existing educational and community supports that fits their community's unique strengths and responds to their unique needs, with the goal of ensuring college- and career-readiness for all children in the neighborhood.

The committee bill requires grantees to combine high-quality education with community- and family-based supports, coordinating a continuum of services from birth through college to career. Research demonstrates that young people are more likely to succeed in school when their comprehensive needs are met. The committee's Promise Neighborhoods program requires grantees to provide high-quality early learning programs, effective family and community engagement, and better services for special populations; to leverage public and private sector support; and to coordinate the services and resources of local nonprofits, schools, health centers, universities, and foundations. It authorizes 5-year, renewable, grants to ensure that communities scale up their services and support a new generation of educated workers.

Promise Neighborhoods Partnership Grants

The Partnership Grants program is intended to support grantees as they build continuums of care and is modeled after the Harlem Children's Zone (HCZ) in New York City. The HCZ began as a single-block pilot in the 1990s and has since expanded to 96 blocks, covering most of Harlem. Today HCZ operates two charter schools and leverages a wide range of public, nonprofit, and philanthropic funds to provide wrap-around services to over 10,000 youth and about the same number of adults each year. The committee recognizes that Federal funds and direction were not the cause of HCZ's success. Therefore, in order to replicate this work in other eligible neighborhoods, it requires local community leaders to combine available Federal resources with private, State, and local funding. Thus, the program includes a significant matching-funds requirement.

As they offer pipeline services, as defined in the committee bill, the committee anticipates a wide range of working arrangements in the Promise Neighborhoods Partnerships Grants in subpart 1, with different roles and responsibilities carried out by community-based organizations (CBOs) and LEAs in different applications, though all eligible entities must include an LEA in partnership with at least one nonprofit. The requirement for partnership in application exists because: (1) the performance metrics for the program are intended to span the full continuum of care; (2) the education-reform aspects of the Promise Neighborhoods program can be carried out most effectively with local schools as a willing partner.

The services grantees would coordinate are all directed toward giving all children in the neighborhood the skills they need to succeed in school, college, and careers. Grantees can use funds to coordinate existing services including:

- pre-natal education and support for expectant parents;
- high-quality childhood education and care and education opportunities, including by strengthening the early care workforce in the neighborhood and improving data systems;
- high-quality schools and before- and after-school programs;
- support for the transition to elementary school, between elementary school and middle school, and from middle school to high school;
- family and community supports; and
- college- and career-readiness activities, such as help with the college admissions process.

However, the committee does not intend for grantees to be required to track or provide assistance to participants throughout their careers.

Promise School Grants

The Promise School Grants described in subpart 2 are intended to support partnerships as they create continuums of care revolving around schools in poor communities. As with the Partnership Grants, the committee anticipates a wide range of working arrangements in the Promise School Grants. These are school-centered grants, though the number of schools initially included in the applicant's plan will vary consistent with the requirement to provide sufficient size and scope to serve the entire neighborhood. The extent to which pipeline services will be located in or provided at the school may also vary, especially in the case of applications led by charter schools that are their own LEA. However, the committee intends for Promise School grantees to ensure the sustainability of the programs they offer and consider ways to expand the area served over time. The committee anticipates that LEAs leading Promise School applications will have a successful record of partnership with CBOs; other Federal, State, and local agencies; and local employers or philanthropies. The committee encourages LEAs applying for Promise School grants to see them as an opportunity for transformation rooted in a distressed neighborhood that may catalyze partnerships and systemic reform throughout the LEA.

Performance Metrics

The committee bill requires the Secretary to establish performance metrics for both grant programs. The committee intends for any such metrics to span the continuum of care, from prenatal care and parent education to college entry and retention; to hold grantees accountable for successful transitions, such as by tracking rates of kindergarten readiness or through the use of early warning indicators in the middle grades; and to encompass measures of community partnership and family engagement, such as the percent of parents and family members who participate in school events or the number of local businesses engaged by partnerships.

The committee, in authorizing Promise Neighborhoods, recognizes that many communities struggle to align resources to create the pipeline services envisioned under this program, but believes that successful examples—such as HCZ or the hundreds of Community Schools located around the Nation provide guidance on successful implementations and can be instructive to other communities as they consider applying for these grants. As such, great emphasis is placed on applicants seeking and securing non-Federal and non-public funds in applying for this grant, as well as a full accounting of the services that already exist that can be aligned with grantee goals. Once again, the Federal investment should not be viewed as the driver of the services envisioned under this program, but a contributor and catalyst for communities to take stock of their existing resources and deploy them in a coherent, comprehensive way.

Parent and Family Information and Resource Centers

SASA renames the Parent and Family Information and Resource Centers (PFIRCs) to acknowledge the role that both parents and non-custodial family members play in supporting children's educational progress. The committee bill narrows the program's goals and functions to supporting States. PFIRCs are also required to help support the community of practice related to effective parent and family engagement strategies, and to work, to a lesser extent, with LEAs, schools, parents, family members, and community members. The bill requires PFIRCs to engage in a selection of high-impact activities, such as supporting States as they work with high-need LEAs to improve their local parent and family engagement plans, providing parent institutes or other leadership training for low-income families, and coordinating parent and family engagement strategies statewide. Grantees also must now meet performance goals to receive continued funding and be eligible for future competitions.

It is the committee's intent that, while applications for grants from consortia consisting of nonprofit organizations (including statewide organizations) and State or LEAs are welcome, the nonprofit organization is to serve as the fiscal agent.

Programs of National Significance

The committee notes that while many programs in this Act are targeted at the State level, certain national providers can also play a role by employing an infrastructure that reaches across State lines. The committee bill authorizes grants to States, LEAs, institutions of higher education, or other public and private non-profit

agencies, organizations, and institutions to carry out programs to increase students' college- and career-readiness, to improve instruction, and to invest in activities that improve student achievement in a variety of domains and subjects. The committee notes that, in the past, award recipients with similar capabilities as those sought under the Programs of National Significance have been funded through congressionally-directed, earmarked spending. The Programs of National Significance's funds are not an opportunity for these traditionally specified groups to continue dedicated funding, but an opportunity for those groups and other groups of similar missions and capabilities to apply and receive funding through the competitive process.

Competency-based Assessment and Accountability Demonstration

With respect to section 4111, the committee recognizes the emergence of competency education in many parts of the country. According to a 2012 report by the National Governor's Association, 36 States now permit districts to award credits based on student mastery instead of seat time. Given this important shift, the committee intends for this pilot to a small number of States the flexibility to develop accountability and assessment policies that align with this approach to academic achievement.

The committee recognizes that States and LEAs that are experimenting with or transitioning to competency-based accountability systems will require assessment systems that may have different characteristics than current systems in order to ensure the continuous improvement in academic achievement for all students. Competency-based assessments measure student learning outcomes that emphasize the application and creation of knowledge along with the development of important skills, such as critical thinking, problem-solving, and effective communication. They also provide multiple opportunities to demonstrate learning that provide teachers with the information they need to ensure students receive timely, differentiated support based on their individual learning needs. Formative and interim assessments ensure students make sufficient progress throughout the year while summative assessments enable students to demonstrate that they are ready to advance to the next academic level.

With respect to the activities described in (c)(2), the committee intends that States selected for the pilot be permitted to use funds reserved in title I, part A for the development of the competency-based assessment systems described in subsection (C)(2)(A) of this section. States may use these resources to support the development and implementation of their system, including activities identified in (a)(2)(B) of section 1141, such as the development of the competencies and assessments aligned to State college- and career-ready standards and post-secondary admissions requirements, professional development activities aligned with competencies and assessments, and the dissemination of information in real-time to stakeholders about student progress and performance to ensure all students remain on track or get back on track to graduation.

In developing a process for review of the State assurances in (c)(1)(A) and the State's plan under (c)(2)(E) of this section, the committee intends for the Secretary to take into account the availability of assessments that meet the requirements of section

1111(a)(2)(B), in particular requirements around comparability. If assessments that meet these requirements are not widely available and easily adopted by the States as part of the initial implementation of this pilot authority, the committee intends for States, while working toward the adoption of these assessments, to use interim assessments that are the most rigorous in striving to meet these requirements, are effective in driving instructional practice, and provide reliable evidence of student learning across testing contexts and scorers. The committee also intends for the State assessment system to incorporate the following elements: (1) Scoring rubrics that are task-specific; (2) Piloted through task-item analysis; (3) Student learning targets that represent mastery of State-approved competencies; and (4) Indicators that measure the full range of academic content and student achievement standards, including mastery of content knowledge and the ability to think critically, solve problems, and communicate effectively.

The committee also intends for States to have the flexibility to dedicate funds from the amount reserved in title II, part A, section 2111 to prepare the State's education workforce to implement a competency-based accountability and assessment system. The committee recognizes that competency education emphasizes elements of teaching and learning that are different from traditional methods. As such, the committee intends that States include a plan for high-quality professional development that emphasizes collaboration and builds educator capacity to do the following: (1) Provide timely, differentiated support to students based on individual learning needs, moving each student along an individual learning trajectory at a sufficient pace to achieve college- and career-readiness in time for graduation; (2) Align instruction to the explicit, measurable, transferable learning objectives; (3) Score formative and summative assessments and participate in their development; (4) Use formative assessments to regularly assess student progress to mastery; (5) Use data on individual student learning in a timely, ongoing manner to inform instruction and support student progress to mastery; and (6) Use technology, including blended or online learning, to support student progress to mastery along individual learning trajectories.

The committee believes this commitment to equity is critically important and intends for States participating in this demonstration to ensure local education agencies develop robust intervention systems that provide all students with the extra time and instructional supports they need to master the standards and competencies necessary for success. States should help local education agencies develop flexible scheduling and identify effective early intervention strategies to ensure that any student that falls behind his or her peers makes sufficient progress to remain on track to graduation including over age and under accredited youth.

TITLE V: PROMOTING INFORMED PARENTAL CHOICE AND INNOVATIVE PROGRAMS

Race to the Top

The committee believes that the Race to the Top program, part A of title V, has shown promising results in bringing State and local leaders together to address education reforms. To build upon

this promise and build toward meaningful reform, this Act authorizes a new competitive grant program to incentivize comprehensive reforms and innovative strategies that are designed to lead to improved academic achievement for all students. Each year that funds are available, the Secretary will choose at least one priority from among the following critical educational goals for each competition:

- increasing the access of children from low-income families to highly-rated teachers and school leaders, including by developing and implementing a teacher and principal evaluation system;
- strengthening the availability and use of high-quality and timely data to improve instructional practices, policies, and student outcomes;
- implementing college- and career-ready academic standards and strategies that translate such standards into classroom practice;
- turning around the schools served by the lowest-performing schools;
- support successful conditions for the creation, expansion, and replication of high-performing public and autonomous charter schools that serve students from low-income families;
- providing equitable resources to high-poverty schools; and
- improving school readiness by increasing access of children from low-income families to high-quality early learning programs and creating an integrated system of high-quality early learning programs and services.

As with the funding priorities, the Secretary will also choose what entities will be eligible for each year's competition. Eligible entities may include States, high-need LEAs and consortia of either, on the basis of their record of innovation and reform, the quality of their plan, and evidence of collaboration, among others. The application review and selection process must be equitable and transparent, and priority will be granted to rural high-need LEAs or consortia, as well as any eligible entity that provides a full-day, full-year kindergarten program to all kindergarten students, or to all kindergarten students from low-income families. The duration of the grants will be up to 4 years and continued funding will be conditional upon the grantees' demonstrated progress in implementing their plans for reaching the performance targets and their objectives on time.

The committee believes that Race to the Top applications from States and consortia of States must be signed by each State's governor, the State's chief school officer, and the president of the State board of education (if applicable). For any grant competition with the goal of improving early childhood education and care, States and consortia of States can award subgrants only to public or private nonprofit agencies and organizations; however, it is the committee's intent that any public or private early childhood education program, as defined in the Higher Education Opportunity Act (P.L. 110-315), is eligible to receive funds from such subgrants for activities consistent with any purpose included in the eligible entity's plan described in section 5104(a)(3).

Investing in Innovation

The Investing in Innovation program, part B of title V, was initially authorized under the American Recovery and Reinvestment Act. In codifying and building upon the program, the committee recognizes the importance of expanding the implementation of, and investment in, innovative practices with a demonstrated impact on improving student achievement, closing achievement gaps, increasing high school graduation rates, improving teacher and school leader effectiveness, or improving school readiness. In including a set-aside for rural LEAs the committee recognizes the unique needs of such LEAs and intends to ensure the development of innovative practices targeted toward their needs.

The committee bill establishes the Advanced Research Projects Agency—Education (ARPA-ED). The entity is modeled after the Defense Advanced Research Projects Agency (DARPA), which makes investments in high-risk, high-return research and development (R&D). It is the committee’s intent to fund ARPA-ED through the use of up to 30 percent of I3 funding or a maximum of \$100,000,000. It is the committee’s belief that ARPA-ED will have a similar capability to accelerate transformative innovation in education and learning.

Public Charter Schools

The Federal charter schools program, part D of title V, has been an instrumental complement to the State and local development of innovative and successful public school models across the Nation. In this Act, the program is updated to reflect lessons learned since the last reauthorization and to address the overwhelming demand, as evidenced by growing waiting lists, for the expansion and replication of high-performing charter schools. The program provides 85 percent of funding for the charter school grants and 15 percent for charter school facilities.

The committee believes that Federal charter school dollars should fund high-performing charter schools, ensuring that scarce resources support schools that raise student academic achievement. With a focus on improving the quality of the sector and investing in proven models of success, the charter school grants program will support the creation, expansion, and replication of high-performing charter schools through competitive grants to States, LEAs, authorizers, and charter management organizations.

The definition of a “high-performing charter school” requires applicants to have goals that are higher (new schools) or results that are significantly higher (existing schools) than demographically similar schools in the State for all students and for subgroups of students in student academic achievement and growth, consistent with section 1111, and in the case of a high school, graduation rates and college enrollment and persistence. The definition also requires such charter schools to have similar or higher student retention rates. A minimum of 25 percent of funds available for the charter school grants must be awarded to States. It is the committee’s belief that States are ultimately responsible for authorizing charter schools and, as the recipient of the Charter Schools Program funds, still provide the innovative approaches to chartering that can inform best practices in other States. Grants will be awarded for an initial period of 3 years, and may be renewed for

an additional 2 years if the grantee is making satisfactory progress in meeting the grant's objectives.

To ensure that limited Federal resources are targeted to charter schools with a commitment to, or a record of, strong academic results, the reauthorized program requires high goals of student academic achievement for all student subgroups and meaningful community outreach to parents and families. It also incentivizes sound State policies for supporting charter schools but also for overseeing, monitoring and holding them accountable; promotes strong performance-based authorizing policies that are transparent and effective in closing down unsuccessful schools, and ensures that charter schools ensure equitable access to, and effectively serve the needs of, students with disabilities and English learners. Priority will be granted to applicants that propose to serve students from low-income families.

The legislation establishes rigorous application requirements and selection criteria, with an emphasis on authorizing. For example, the selection process must examine the applicant's record of closing low-performing charter schools and the State's requirements for, and enforcement of, high-quality standards for charter school authorizers, including standards for rigorous and periodic reviews. Priority is given to States that ensure that all charters go thorough review at least every 5 years.

The committee encourages the enrollment of students with disabilities and English language learners in charter schools and, recognizing the under-enrollment of such students in charter schools nationally, seeks to ensure that charter schools are accessible to all students on an equitable basis. To this end, the legislation includes critical provisions so students with disabilities and English learners are served effectively by charter schools. In addition to subgroup performance contract goals, the legislation requires all applicants to describe how they will ensure that each charter school provides equitable access and effectively serves the needs of all students, including children with disabilities and English learners, and implements outreach and recruitment practices that include families of such students.

In addition, the selection process must examine the quality of the application for supporting charter schools, through such activities as technical assistance, to improve student academic achievement and growth for each subgroup and to promote effective outreach to, and recruitment of, students with disabilities and English learners, and their parents and families.

The legislation also requires that grantees provide support and technical assistance in effectively serving the needs of students with disabilities and English learners, implement outreach and recruitment practices that includes the families of students who are children with disabilities and English learners, and directly, or through a partnership with a nonprofit, develops and implements parent, family, and student information, outreach, and recruitment programs to provide information and support to parents, families, and students about the public school choice options available to them. Overall, this legislation reflects the committee's commitment that students with disabilities and English language learners have equal access to high-performing charter schools.

The charter school facilities program will support eligible entities to improve access to facilities financing high-performing charter schools and assist them in addressing the cost of acquiring, constructing, and renovating facilities. Eligible entities include States, LEAs, nonprofit organizations, State financing authorities, or a consortium of such entities. Competitive grants will be made for innovative facilities financing programs, including credit enhancement, open-facilities-access programs, making available renovated or adapted space, leveraging State and local facilities funding, and State per-pupil facilities aid programs. At least 65 percent of the funds must be expended for credit enhancement grants.

TITLE VI: PROMOTING FLEXIBILITY; RURAL EDUCATION

The committee recognizes the Federal Government's declining capacity to maintain historically high levels of education funding. It further recognizes the challenges LEAs face in coordinating and using the current Federal funding for their own distinct, LEA-specific needs with specific requirements under each Federal formula grant program. SASA builds upon the current law transferability provisions allowing LEAs to transfer as much as 100 percent of funding between SASA formula grant programs. The committee maintains current law restrictions on moving funding out of certain formula funds, but updated to place restrictions on moving funds out of titles I, III, VII, or VIII.

The committee, recognizing the continued unique challenges facing rural LEAs reauthorizes the Rural Education Achievement Program (REAP), with changes. Since the 2000 Decennial Census, improvements have been made to the geocoding technology necessary to more accurately determine which areas are rural and which areas are urban based upon proximity to metropolitan areas, rather than on population figures alone. Technological advancements as well as further work in accurately determining rural areas of the country by the Office of Management and Budget (OMB) provides greater confidence to the committee that rural education program funds will be better targeted and focused on truly rural areas, far from urban and metropolitan fringes.

Of significance, the committee added the locale code of 32 and updated the locale codes to 33 (territory 35 miles away from an urban cluster), 41 (Census territory that is less than or equal to 5 miles from an urbanized area, as well as rural territory that is less than or equal to 2½ miles from an urban cluster), 42 (Census territory that is more than 5 miles but less than or equal to 25 miles from an urbanized area, and rural territory that is more than 2½ miles but less than or equal to 10 miles from an urban cluster), and 43 (Census rural territory that is more than 25 miles from an urbanized area and is almost more than 10 miles from an urban cluster).

Further, the committee provided flexibility for LEAs that qualify both for the Rural Low-Income Schools (RLIS) and Small Rural School Achievement (SRSA) programs by providing LEAs the option of choosing the program for which they would prefer to receive funding.

TITLE VII: INDIAN, NATIVE HAWAIIAN, AND ALASKA NATIVE EDUCATION

The changes reflected in title VII of the committee bill are designed to better focus the use of funds on programs and activities that meet the unique cultural, language, and educational needs of American Indian students to ensure that such students graduate college- and career-ready.

Key reforms included in this reauthorization include additional flexibility to enable tribes and tribal educational agencies more authority over the education and development of Native students; a focus on the provision of high quality early childhood education and care services to ensure that children begin school ready to learn and recognition of the critical role tribal leaders can play in the education and development of Native students.

This title authorizes the use of funds to support the preservation, reclamation and restoration of Native languages, acknowledging the role that these practices can have in supporting the academic achievement and also directs the Secretary of Education and the Director of the Bureau of Indian Education to conduct a study to improve collaboration among these two entities to better support the provision of educational services to tribes and Native students. Recognizing the challenges facing Native students and communities, it is the committee's intent that these improvements strengthen collaboration between the Department of Education and the Bureau of Indian Education in ways that recognize and preserve tribal sovereignty and that support student achievement and development.

Improvements made to part B are designed to better focus the Native Hawaiian Education Council's efforts on addressing the education and workforce needs of Native Hawaiian students through redesigning the composition of the Native Hawaiian Education Council and refocusing its purpose to ensure proper coordination of educational and related services and programs available to Native Hawaiian students. It is the intent of the committee that Council members are responsible for carrying out the activities of the Council, not the executive director.

The committee amended the definition of the Alaska Native Organization to highlight the importance of having or committing to acquire experience in the education of Native Alaskans and to ensure Native Alaskans have substantive policymaking positions. The committee also added to part C a provision designed to leverage existing assets in Alaska to improve academic achievement as well as college- and career-readiness.

TITLE VIII: IMPACT AID

SASA makes significant changes to the Impact Aid program. First, the committee removed the overly complicated "highest and best uses" standard for identifying and then calculating the tax assessment classifications of taxable adjacent property. In exchange, the committee supports a simplified calculation based upon the total taxable value of property within the local education agency by then multiplying that value by the federally impacted acreage.

The committee recognizes there is a burden on both the local educational agency and the Department of Education in determining the number of children relocated off-base during the dura-

tion of a housing renovation, repair, modernization, or demolition project. The SASA establishes a hold harmless student count based on the number of on-base children enrolled prior to the project start date. In addition, the SASA defines what is considered a renovation, repair, and/or modernization project. Such terms do not include normal “sustainment projects” such as painting, carpeting or minor repairs. An eligible project must also be one that will last more than 30 days. Together it is the intent of the committee to lessen the time the department now spends in conducting annual audits of students claimed as on-base students.

The committee also added language to support the transition of consolidated LEAs related to their eligibility for the Impact Aid program.

Finally, the committee adds language within section 8010 requiring the Secretary of Education to pay LEAs the full amount that the agency is eligible to receive for a fiscal year by September 30 of the following fiscal year for which the payment is based. Many of these changes were made in the 2012 National Defense Authorization Act, but with a sunset of 2 years.

TITLE IX: GENERAL PROVISIONS

Definitions

SASA contains several new definitions, the most notable of which are discussed below.

The committee bill modifies the definition of “Advanced Placement or International Baccalaureate” to provide potentially more options for States and LEAs in achieving the goals of college- and career-readiness by allowing them to choose another evidence-based program model. The committee bill incorporates language enacted by Congress in the America COMPETES Act of 2007 and maintained in the reauthorization of that Act in 2010 [Sec. 6122(1)(B)]. With these provisions, Congress has already acknowledged much advancement from evidence-based program models showing large increases in academic success for students who had access to rigorous high school core courses benchmarked to college readiness.

The updated definition of a “Charter School” requires charter schools to have independent governance and significant autonomy in the areas of management, personnel, budget, schedule, and instructional program; allows charter schools to provide early childhood education and care or adult education; requires charter schools to comply with Title II of the Americans with Disabilities Act of 1990; provides an exception to the lottery requirement under the restart strategy and school closure strategy under section 1116(c)(6)(B); requires charter schools to comply instead of just agreeing to comply with the same Federal and State audit requirements as do other elementary schools; and requires a charter school to have a performance contract that uses school-wide and subgroup student academic achievement and growth, consistent with section 1111, as a primary factor in decisions about the renewal or revocation of the charter, and describes the obligations and responsibilities of the charter school and the charter school authorizer, as well as the autonomy granted to the charter school.

The committee has established the new term “Conditions for Learning”, which describes school factors that advance student achievement and positive child and youth development. This bill-wide definition allows for a more cross-cutting use of the term.

The committee renamed “Family Literacy Services”, “Family Literacy Activities”, and also added a new subparagraph that acknowledges the link between parents receiving family literacy instruction and their capacity for supporting their children’s learning needs. The committee also added a definition of “Family Member,” used in sections 1111 and 1118 and part G of title IV to acknowledge the important role that noncustodial family members and other caring adults (whether mentors, tutors, afterschool providers, or other community members involved in education) play in the lives of children.

The committee bill creates a new bill-wide definition for “High-Need Local Education Agency” as a number of programs in the bill require a focus on students attending schools in these LEAs. This definition uses population and poverty as determining factors. The term is currently only defined in Title II of ESEA in the Teacher and Principal Training program (based on poverty and teachers in certain subjects) and in the Educational Technology program (based on poverty and need for technology.)

The committee renamed “Pupil Services Personnel” “Specialized Instructional Support Personnel” and expanded the definition to include school nurses. In doing so, the committee wishes to recognize the critical link to school success that school nurses play for many students.

In addition to the above new definitions, the terms “professional growth and improvement system,” “positive behavioral interventions and supports,” and “young child” are defined.

Unsafe School Choice Option

The committee has amended the Unsafe School Choice Policy. The previous reauthorization of this Act required each State to identify “persistently dangerous” schools, as defined by the State, and allow students attending such schools to transfer to a school determined as “safe” by the State. The committee holds that, though well-intentioned, the “persistently dangerous” designation did not result in increases in school safety. Rather, in many cases it created disincentives for schools to accurately report data on violent criminal incidents. The committee has eliminated the “persistently dangerous” designation, while maintaining a provision allowing students who become victims of violent criminal offenses to transfer to a “safe” school, and including a new provision allowing students who are threatened with a violent criminal offense to do the same. This change empowers students and families to make educational choices based on their own experiences of school safety, and removes disincentives for schools to accurately report violent incident data.

Evaluation Authority

The committee intends for the Secretary to reserve not less than 1 percent and not more than 3 percent of the amount appropriated for each categorical program and demonstration project authorized under the Act for the purpose of evaluation. The Secretary, acting

through the Director of the Institute of Education Sciences, must use the funds to conduct high quality evaluations, provide technical assistance, evaluate the aggregate short- and long-term effects and cost efficiencies across Federal programs under the bill and identify and disseminate research and best practices. It also requires the Secretary to submit an annual plan to Congress.

The committee intends for all authorized programs under this Act to be evaluated in a rigorous manner through the Institute of Education Science under the guidance of the Director and in consultation with the appropriate programmatic staff in the Department of Education. The committee recognizes evaluation of programs intended to serve a broad range of students as comprehensively as possible is sometimes in conflict with the most rigorous methodologies for determining program effectiveness. The committee's intent in setting aside funds for evaluation, under the evaluation authority in part F of title IX, is to create program evaluations designed to allow for conclusions to be made regarding the programs' effectiveness and whether the investment of limited Federal dollars is still merited for programs that have not met program expectations. While experimental and quasi-experimental designs are preferred, the committee recognizes that those designs are sometimes impractical and alternatives need to be used. The committee's intent is for the Director of the Institute of Education Science to conduct program evaluations with the strongest possible design to provide researchers and policymakers with reliable and valid information upon which future decisions can be made regarding the effectiveness of the programs under this Act.

TITLE X: COMMISSION ON EFFECTIVE REGULATION AND ASSESSMENT SYSTEMS FOR PUBLIC SCHOOLS

The committee established a Commission on Effective Regulation and Assessment Systems for Public Schools. The Commission will: (1) examine the regulatory requirements on elementary and secondary education at the Federal, State, and local levels, with an aim to identify unnecessary, redundant, or conflicting laws, rules, and regulations; (2) investigate how Federal, State, and local interpretations of laws and regulations create additional or unnecessary burden and are used as rationale for imposing requirements that are not actually mandated by law; (3) make recommendations on how to align and improve requirements in such regulations; (4) examine the quality and purpose of current assessment requirements; and (5) make recommendations to improve and align assessment systems to provide meaningful information and improve student achievement, teacher performance, and innovation.

TITLE XI: AMENDMENTS TO OTHER LAWS & MISCELLANEOUS PROVISIONS

Homeless Education (McKinney-Vento Homeless Assistance Act)

The committee recognizes the unique challenges to academic achievement faced by the growing population of homeless students. In the 2010–11 school year, 1,065,794 homeless children and youth were enrolled in public schools. This is a 57 percent increase since the 2006–7 school year. The McKinney-Vento Homeless Education Reauthorization Act of 2011, Title X of SASA, helps these vulner-

able children and youth become college- and career-ready by removing barriers to their identification, enrollment, attendance, and success in school. The amendments build on current law to enhance school stability and access to educational opportunities. The committee acknowledges the special difficulties of unaccompanied homeless youth, who struggle to obtain an education without a parent or a home. The bill includes provisions to ensure that these youth are enrolled in school, able to earn credits, and informed of their status as independent students for financial aid. Young children who are homeless also face unique barriers to accessing early childhood programs; the committee adopted provisions to ensure that these children are identified and prioritized for enrollment in public preschool programs. Further, to ensure uninterrupted education, the committee clarified that, in the case of a dispute, homeless children and youth must remain enrolled in school until the final resolution of the dispute.

Amendments to title I, part A, make permissible the use of title I funds for transportation to assist homeless children and youth to stay in their school of origin, thus providing greater flexibility to LEAs on how title I reservations for homeless students may be spent.

ARPA-ED

The committee adopted an amendment offered by Senator Benet to establish the Advanced Research Projects Agency—Education (ARPA-ED). The entity is modeled after the Defense Advanced Research Projects Agency (DARPA), which makes investments in high-risk, high-return research and development (R&D). It is the committee's belief that ARPA-ED will have a similar capability to accelerate transformative innovation in education and learning.

IV. REGULATORY IMPACT STATEMENT

The committee has determined there will be reduced demands upon States, local educational agencies, and other recipients of ESEA funds, due largely to the more targeted accountability features and reduced number of programs contained in the Elementary and Secondary Education Reauthorization Act (SASA).

SASA requires States to adopt college- and career-ready academic content standards, and assessments tied to those standards. Many States have already undertaken this work. SASA maintains the No Child Left Behind (NCLB) Act's requirement that all public school students in grades three through eight be tested annually in mathematics and reading. SASA also maintains requirements that States participate in annual State assessments under the National Assessment of Educational Progress (NAEP) in fourth and eighth grade mathematics and reading and issue annual report cards that include assessment and student achievement information.

With regard to the title I accountability system, SASA limits federally prescribed interventions to the lowest performing 5 percent of schools in a State, and an additional 5 percent of schools with large subgroup achievement gaps. In contrast, NCLB required interventions in all schools that were not making adequate yearly progress.

In general, recipients of ESEA funds will be expected to use those funds on programs which have proven to be effective in improving student achievement and performance and in meeting other program objectives. The committee believes that it is appropriate to demand results and accountability in exchange for Federal investments in programs authorized under the Elementary and Secondary Education Act. However, in this reauthorization the committee has sought to target Federal mandates to those areas that the implementation of NCLB has shown are effective.

Finally, SASA cuts the number of programs in ESEA and consolidates many into broader program authorities. This program consolidation is expected to reduce the administrative time and expense involved in developing, processing, and awarding separate grants—and to result in funding applicants with more capacity to efficiently and effectively carry out grant activities. SASA also maintains the authority for small, rural school districts to combine funds from several separate formula grant programs and apply these funds toward local initiatives designed to improve student achievement.

V. APPLICATION OF LAW TO THE LEGISLATIVE BRANCH

The committee bill reauthorizes and amends the Elementary and Secondary Education Act of 1965 to continue programs primarily offering assistance to States and local educational agencies on behalf of elementary and secondary school students and teachers and, as such, has no application to the legislative branch.

U.S. Senate,
Washington, DC 20510.

DEAR MR. CHAIRMAN: The Congressional Budget Office has prepared the enclosed cost estimate for S.1094, the Strengthening America's Schools Act of 2013.

If you wish further details on this estimate, we will be pleased to provide them. The CBO staff contact is Justin Humphrey, who can be reached at 226–2820.

Sincerely,

DOUGLAS W. ELMENDORF,
Director.

Enclosure.

S. 1094—Strengthening America's Schools Act of 2013

Summary: S. 1094 would amend and reauthorize most programs in the Elementary and Secondary Education Act of 1965 (the ESEA, commonly referred to, in its most recently reauthorized form, as No Child Left Behind). The underlying authorizations for those programs have expired, although most have received appropriations since their authorizations have expired. For almost all of

the programs, the bill would authorize the appropriation of such sums as may be necessary for fiscal years 2014 through 2018. The bill also would amend and reauthorize the McKinney-Vento Homeless Assistance Act and amend the Department of Education Organization Act.

CBO estimates that S. 1094 would authorize the appropriation of about \$24 billion in 2014 and \$127 billion over the 2014–18 period. Implementing the bill would have discretionary costs of \$93 billion over the 2014–18 period, assuming appropriation of the estimated amounts.

Enacting the bill also would increase direct spending by \$10 million over the 2014–23 period; therefore, pay-as-you-go procedures apply. Enacting the bill would not affect revenues.

S. 1094 contains no intergovernmental mandates as defined in the Unfunded Mandates Reform Act (UMRA).

S. 1094 would impose a private-sector mandate, as defined in UMRA, on parents and guardians of unaccompanied youth by shielding schools from liability that might result from enrolling unaccompanied youth without parental or guardian consent. CBO expects that the costs of the mandate would not exceed the annual threshold established in UMRA for private-sector mandates (\$150 million in 2013, adjusted annually for inflation).

Estimated cost to the Federal Government: The estimated budgetary impact of the bill is shown in the following table. The costs of this legislation fall within budget 500 (education, training, employment, and social services).

Notes: Some programs received advance appropriations for fiscal year 2014, but those amounts are not reflected in the table. Components may not sum to totals because of rounding.

* = less than \$500,000.

¹ CBO estimates that enacting the bill would increase direct spending by \$10 million over the 2014–23 period.

Basis of estimate: Unless otherwise noted, the bill would authorize the appropriation of such sums as may be necessary for each of fiscal years 2014 through 2018 for programs discussed below. (All authorizations in the bill would automatically be extended 1 year under the General Education Provisions Act.) Estimated authorization levels are based on the funding levels for previous fiscal years for the same or similar programs or, for some new programs, the level of funding proposed in the President's fiscal year 2014 budget request. For this estimate, CBO assumes that the bill will be enacted near the start of fiscal year 2014, that the Congress will appropriate the estimated amounts, and that spending will follow historical patterns.

Direct Spending

S. 1094 would amend the definition of a highly qualified teacher and the definitions of levels of poverty in school districts. The Department of Education uses those definitions to determine eligibility for both forgiveness of Federal student loan debt for teachers and the TEACH Grant program. The amendments to the definitions would increase eligibility for both programs.

CBO estimates that the increase in eligibility would increase direct spending for the Federal student loan programs by \$10 million over the 2014–23 period. In addition, we estimate that the proposed changes would increase direct spending for the TEACH Grant program by a negligible amount.

Spending Subject to Appropriation

CBO estimates that fully funding the authorizations in this bill would require appropriations of approximately \$25 billion a year over the 2014–18 period of authorization, for a total of \$127 billion. Those appropriations would cost \$93 billion over the 2014–18 period and an additional \$34 billion after 2018, assuming the appropriation of the estimated amounts. The Congress appropriated about \$24 billion for similar activities authorized in the ESEA and

other legislation for fiscal year 2013. Sequestration under the Budget Control Act of 2011 reduced that total to about \$23 billion.

Title I—Improving the Academic Achievement of the Disadvantaged. Title I of the bill would reauthorize funding for most programs in Title I of the Elementary and Secondary Education Act as well as create new grant programs designed to support secondary school reform. CBO estimates that implementing this title would require \$15.6 billion in funding for fiscal year 2014 and would lead to discretionary costs of \$60.3 billion over the 2014–18 period, assuming the appropriation of the estimated amounts. The bill would authorize the appropriation of the following amounts:

- *Improving Basic Programs Operated by Local Educational Agencies.* Part A would reauthorize funding for grants to local educational agencies (LEAs), school improvement grants, various assessments of education progress, Centers for Excellence in Early Childhood Education, and administrative support. CBO estimates the authorization of appropriations for all of part A would total \$15.1 billion (of which about \$14.0 billion would be for grants to LEAs) in fiscal year 2014 and similar amounts (with adjustments for anticipated inflation) in subsequent years. Implementing those provisions would cost \$56.2 billion over the 2014–18 period. The bulk of the spending, \$54.1 billion, would be for grants to local educational agencies. The Congress appropriated about \$14.5 billion for grants to LEAs for fiscal year 2013, and that total was reduced to about \$13.8 billion by sequestration.

- *Pathways to College.* Part B would create a new set of grant programs to encourage school districts to implement strategies in secondary schools to prepare students for colleges and careers. The bill also would expand the program that currently supports grants to Advanced Placement programs to include International Baccalaureate programs. CBO estimates that this part would authorize the appropriation of slightly more than \$100 million for fiscal year 2014. We estimate that implementing those provisions would cost about \$400 million over the 2014–18 period.

- *Education of Migratory Children.* Part C would reauthorize programs that support the education of children of migrant workers. CBO estimates that provision would authorize the appropriation of almost \$400 million in fiscal year 2014, leading to estimated discretionary spending of \$1.5 billion over the 2014–18 period. The Congress appropriated about \$400 million for similar activities in fiscal year 2013, an amount that was reduced to about \$375 million by sequestration.

- *Prevention and Intervention Programs for Children and Youth Who Are Neglected, Delinquent, or At Risk.* Part D would reauthorize programs that support the education of at-risk children. CBO estimates that provision would authorize the appropriation of approximately \$50 million in fiscal year 2014. Implementing part D would cost about \$200 million over the 2014–18 period. For fiscal year 2013, available funding totaled almost \$50 million for at-risk children.

- *Educational Stability of Children in Foster Care.* Part E would require that State educational agencies that receive funding under this title coordinate with the responsible agencies when children in foster care programs move to different school attendance areas.

CBO estimates that part E would have no significant effect on Federal spending.

Title II—Supporting Teacher and Principal Excellence.

Title II would modify and reauthorize grant programs designed to support teacher training and improvement. CBO estimates that the bill would authorize the appropriation of \$3.1 billion for those activities in fiscal year 2014 and \$15.9 billion over the 2014–18 period. We estimate that fully funding those activities would cost \$10.5 billion over the 2014–18 period, assuming the appropriation of the estimated amounts.

- *Continuous Improvement and Support for Teachers and Principals.* Part A would reauthorize the State grant program for improving teacher quality and authorize funding for the recruitment and training of principals. CBO estimates the bill would authorize the appropriation of \$2.5 billion for those grants for fiscal year 2014, and that outlays would total \$8.7 billion over the 2014–18 period. The Congress appropriated about \$2.5 billion for State grants in 2013, and sequestration reduced that amount by about \$130 million.

- *Teacher Pathways to the Classroom.* Under part B, the bill would authorize funding for grants to partnerships of institutions of higher education and State or local educational agencies to support the recruitment and retention of teachers in high-need subjects at high-need schools. Those new grants would replace an existing program that provides grants specifically for mathematics and science partnerships, which received about \$140 million in funding for fiscal year 2013 after sequestration. CBO estimates this provision would have discretionary costs of about \$500 million over the 2014–18 period.

- *Teacher Incentive Fund Program.* Part C would reauthorize the Teacher Incentive Fund, which supports grants to LEAs and other organizations to develop and implement performance-based teacher and principal compensation systems in high-need schools.¹ CBO estimates that this provision would authorize the appropriation of about \$300 million for fiscal year 2014 and have discretionary costs of \$1.0 billion over the 2014–18 period. The Congress appropriated about \$300 million for State grants in 2013, and sequestration reduced this amount by about \$15 million.

- *Achievement Through Technology and Innovation.* Additionally, part D would reauthorize and modify the Enhancing Education Through Technology Program to improve teaching and learning through technology. CBO estimates that implementing this provision would cost about \$350 million over the 2014–18 period. No funding was provided for part D in fiscal year 2013. (In fiscal year 2010, education technology programs included under part D of this legislation received about \$100 million.)

Title III—Language and Academic Content Instruction for English Learners and Immigrant Students. Title III of the bill provides support for teaching of the English language, including to recent immigrants. CBO estimates the bill would authorize the ap-

¹The Departments of Labor, Health and Human Services, and Education, and Related Agencies Appropriations Act, 2006 (Public Law 109–149) originally authorized the Teacher Incentive Fund under the authority granted in the ESEA in Subpart 1, of Part D, of Title V, Fund for the Improvement of Education—Programs of National Significance.

appropriation of more than \$700 million for grants to States and for other activities in 2014 and \$3.7 billion over the 2014–18 period. Implementing this title would cost about \$2.5 billion over the 2014–18 period, assuming the appropriation of the necessary amounts. The Congress appropriated about \$730 million for similar activities in fiscal year 2013, an amount that was reduced to a little less than \$700 million under sequestration.

Title IV—Supporting Successful, Well-Rounded Students.

Title IV would authorize funding for various grant programs designed to improve literacy and math and science instruction. It also would support measures to improve the health and safety of students. CBO estimates this title would authorize the appropriation of approximately \$2.3 billion in fiscal year 2014 and \$11.9 billion over the 2014–18 period. Implementing Title IV would cost about \$8.2 billion over the 2014–18 period, assuming the appropriation of the necessary amounts.

- *Improving Literacy Instruction and Student Achievement.* Part A would authorize grants to support activities designed to increase literacy for individuals from birth through the end of high school, and it would authorize grants to improve school library programs. CBO estimates that spending for these purposes would total about \$750 million over the 2014–18 period.

- *Improving Science, Technology, Engineering, and Mathematics Instruction and Student Achievement.* Part B would authorize grants to States to increase access to science, technology, engineering, and mathematics, and to provide professional development for teachers. CBO estimates that implementing part B would have discretionary costs of about \$1.5 billion over the 2014–18 period.

- *Increasing Access to a Well-Rounded Education and Financial Literacy.* Part C would authorize grants to local educational agencies to support access for low-income students to education topics such as the arts, civics and government, economics, environmental education, and foreign languages. Part C also would authorize grants to State educational agencies to improve the teaching of financial literacy. CBO estimates that spending for those grants would cost almost \$300 million over the 2014–18 period.

- *Successful, Safe, and Healthy Students.* Part D would authorize a new grant program to promote student physical and mental health and well-being and to prevent violence and substance abuse, similar to activities funded by State grants for safe and drug-free schools under current law. The bill also would authorize funding for school districts in which the learning environment has been disrupted due to violence or another traumatic event to purchase or construct new facilities to maintain an appropriate learning environment. CBO estimates that those grants would have discretionary costs of about \$1.1 billion over the 2014–18 period.

- *Student Non-Discrimination.* Part E would require any Federal agency that terminates or refuses to provide financial assistance to an education program because that program discriminates on the basis of sexual orientation or gender identity to submit a report to the Congress detailing the action. CBO estimates this section would have a negligible impact on discretionary spending over the 2014–18 period.

- *21st Century Community Learning Centers.* Part F would reauthorize grants for 21st Century Community Learning Centers,

which support before- and after-school and summer school programs. CBO estimates this provision would authorize the appropriation of more than \$1.1 billion for fiscal year 2014 and would lead to discretionary costs of \$4.0 billion over the 2014–18 period. The Congress appropriated more than \$1.1 billion for this program in fiscal year 2013. Sequestration reduced that total by almost \$60 million.

- *Promise Neighborhoods.* Part G would reauthorize Promise Neighborhood grants, which go to organizations to provide family and community services and to support comprehensive education reforms in high-need areas.² CBO estimates that spending for part F over the 2014–18 period would total about \$200 million. About \$55 million was available for this program in fiscal year 2013.

- *Additional Programs.* Parts H, I, and J would reauthorize Parent and Family Information and Resource Centers, the Ready to Learn program, and Programs of National Significance. CBO estimates that the total authorization of appropriations for fiscal year 2014 for those programs would be about \$100 million and total spending for fiscal years 2014 through 2018 would be almost \$400 million. Part K would permit the Secretary of Education to grant demonstration authority to eligible entities to incorporate competency-based accountability into State accountability systems required under Title I. The bill also would require the Secretary to disseminate a report detailing best practices on the implementation of those systems. CBO estimates implementing part K would have a negligible effect on discretionary spending.

Title V—Promoting Innovation. CBO estimates that title V would authorize the appropriation of about \$1.1 billion in fiscal year 2014 and \$5.6 billion over the 2014–18 period. Implementing title V would cost about \$3.5 billion over the 2014–18 period, assuming the appropriation of the estimated amounts.

Race to the Top and Investing in Innovation. Parts A and B would authorize funding for the Race to the Top and Investing in Innovation programs, both created in the American Recovery and Reinvestment Act (Public Law 111–5). Those competitive grants programs are designed to encourage educational innovation and reform at the State and local levels. CBO estimates that the bill would authorize the appropriation more than \$500 million for Race to the Top and almost \$150 million for Investing in Innovation for fiscal year 2014. Implementing those two programs would cost \$1.7 billion and \$0.5 billion, respectively, over the 2014–18 period. The Congress appropriated about \$700 million for these two programs in fiscal year 2013, and about \$660 million was available after sequestration.

Magnet Schools, Charter Schools, and Public School Choice. Parts C, D, and E would reauthorize funding for Magnet Schools Assistance, Charter School Grants, and Voluntary Public School Choice. CBO estimates that the bill would authorize the appropriation of almost \$400 million for fiscal year 2014 and would have total discretionary costs of about \$1.3 billion over the 2014–18 period for those programs. The Congress appropriated about \$350 million for grants for magnet and charter schools in 2013, an

amount that was reduced by about \$20 million by sequestration. No funding was provided for public school choice in 2013.

College Information Demonstration Program. Part F would authorize funding for a demonstration program to encourage secondary students at high-need schools to apply to and enroll in post-secondary education and apply for and receive financial aid. CBO estimates implementing this provision would cost about \$90 million over the 2014–18 period.

Title VI—Promoting Flexibility; Rural Education. Title VI would reauthorize rural education achievement programs, which provide grants to assist rural school districts in improving teaching and learning outcomes. CBO estimates the bill would authorize the appropriation of about \$170 million in spending for fiscal year 2014 and approximately \$900 million over the 2014–18 period. Implementing this title would have discretionary costs of roughly \$600 million over the 2014–18 period, assuming the appropriation of the estimated amounts. The Congress appropriated about \$180 million for similar activities in fiscal year 2013, an amount that was reduced by about \$10 million by sequestration.

Title VII—Indian, Native Hawaiian, and Alaska Native Education. Title VII would reauthorize grant programs for Native Americans, Native Hawaiians, and Alaska Natives. Programs for Alaska Natives would be authorized through 2019. The bill would amend current law to authorize the repair and renovation of public schools that serve higher concentrations of Native Hawaiian students. CBO estimates the bill would authorize the appropriation of about \$200 million for fiscal year 2014 and \$1.1 billion over the 2014–18 period. Implementing this title would cost about \$700 million over the 2014–18 period, assuming the appropriation of the necessary amounts. The Congress appropriated almost \$200 million for these programs in 2013, an amount that was reduced by about \$10 million by sequestration.

Title VIII—Impact Aid. Title VIII would reauthorize impact aid programs, which provide funding to assist local educational agencies affected by the activities of the Federal Government, such as those on a military base or Indian reservation. CBO estimates that title VIII would authorize about \$1.2 billion in fiscal year 2014 and about \$6.5 billion over the 2014–18 period. We estimate that fully funding this title would result in discretionary costs of \$6.2 billion over the 2014–18 period, assuming the appropriation of the estimated amounts. The bulk of this spending, about \$5.8 billion over the 2014–18 period, would be for basic support payments to LEAs to assist in the education of certain children residing on Federal property. The additional \$400 million would be used to construct and maintain schools that educate those children. The Congress appropriated almost \$1.3 billion for impact aid in 2013, and a little more than \$1.2 billion was available after sequestration.

Title X—Committee on Effective Regulation and Assessment of Systems for Public Schools. Title X would require the Secretary of Education to establish a commission to examine Federal, State, and local regulations that affect elementary and secondary education. CBO estimates that this provision would authorize the appropriation of \$1 million in each year.

Title XI—Amendments to Other Laws; Miscellaneous Provisions. Subpart I of title XI would reauthorize the McKinney-

Vento Homeless Assistance Act, which authorizes grants to States to assist in the education of homeless children. The bill would authorize the appropriation of such sums as may be necessary for fiscal years 2014 through 2020. CBO estimates that this subpart would authorize the appropriation of more than \$60 million for fiscal year 2014 and have discretionary costs of about \$200 million for the 2014–18 period. Available funding under this Act totaled about \$60 million for fiscal year 2013.

Subpart II would amend the Department of Education Organization Act to create an agency within the department responsible for the research and development of educational technology to improve student achievement. Funding from the Investing in Innovation program, authorized in title IV, would be reserved to support this new agency. CBO estimates that this provision would authorize the appropriation of \$50 million in fiscal year 2014 and would cost almost \$200 million over the 2014–18 period.

Pay-as-you-go consideration: The Statutory Pay-As-You-Go Act of 2010 establishes budget-reporting and enforcement procedures for legislation affecting direct spending or revenues. The net changes in outlays under S. 1094, the Strengthening America’s Schools Act of 2013, that are subject to those pay-as-you-go procedures are shown in the following table.

CBO Estimate of Pay-As-You-Go Effects for S. 1094, the Strengthening America’s Schools Act of 2013, as Ordered Reported by the Senate Committee on Health, Education, Labor, and Pensions on June 12, 2013

	NET INCREASE IN THE DEFICIT														
Impact on the Deficit	0	3	0	0	1	1	1	1	1	1	1	5	10		

Estimated impact on State, local, and tribal governments: S. 1094 contains no intergovernmental mandates as defined in UMRA and would impose no costs on State, local, or tribal governments. Those governments would benefit from grants authorized in the bill for elementary and secondary education. Any costs associated with those grants would be incurred voluntarily as a result of complying with conditions of Federal assistance.

Estimated impact on the private sector: S. 1094 would shield schools from liability that might result from enrolling unaccompanied youth without parental or guardian consent. The bill would impose a private-sector mandate, as defined in UMRA, on parents and guardians of unaccompanied youth to the extent that they would be denied an existing right to compensation. However, such claims are very rare, and no damages have been awarded for such claims in the past 10 years. Therefore, CBO expects that the costs of the mandate would not exceed the annual threshold established in UMRA for private-sector mandates (\$150 million in 2013, adjusted annually for inflation).

Previous CBO estimate: On July 10, 2013, CBO transmitted a cost estimate for H.R. 5, the Student Success Act, as ordered reported by the House Committee on Education and the Workforce on June 19, 2013. CBO estimated that the bill, which also would

reauthorize the ESEA, would authorize the appropriation of about \$23 billion for fiscal year 2014 and \$114 billion over the 2014–18 period. Differences in the estimates reflect differences in the legislation.

VII. SECTION-BY-SECTION ANALYSIS

TITLE I—COLLEGE AND CAREER READINESS FOR ALL STUDENTS

Part A—Improving the Academic Achievement of the Disadvantaged

The committee bill refocuses title I to provide States and districts with the flexibility they need to ensure that all students, including students with disabilities and English learners, are college- and career-ready by the time they graduate from high school.

Standards

College- and Career-Ready Standards: States must adopt college- and career-ready standards in reading and mathematics that align with relevant career and technical standards, as well as credit-bearing, academic coursework at the State's public institutions of higher education. Students who meet these standards will not need remediation at the State's public institutions of higher education. States must also develop standards for science, but the Federal Government does not require that these be used for accountability purposes.

English Proficiency Standards: States must adopt English proficiency standards aligned with the State's college- and career-ready standards.

Early Learning Guidelines: The bill asks States who use title I funds to develop or certify the existence of guidelines that are developmentally appropriate for children aged birth through entry into kindergarten, which describe what children should know and be able to do.

Assessments

States must develop assessments in reading and math aligned with their college- and career-ready standards that are given not less than once in grades three through eight, not less than once in high school, and in all elementary and secondary schools. The assessments must include multiple measures of student achievement and measure individual student academic growth, which may be accomplished through computer adaptive tests. States must also establish assessments for English proficiency aligned with the State's English proficiency standards. The outcomes of these assessments will be incorporated into the State's accountability framework. States may develop alternate assessments for students with the most significant cognitive disabilities, but such assessments may not be given to more than 1 percent of all students in the State.

State Accountability

A State will set ambitious, but achievable, annual performance targets for student growth, academic proficiency and English proficiency for itself, its districts, and all its public elementary and secondary schools for each assessed subject and grade level.

Performance targets may be:

- Those adopted through the waiver agreements with the Secretary.
- The percentage of students meeting or exceeding grade-level standards at the highest 10 percent of schools in the State, subject to approval by the Secretary.
- Equally ambitious targets to the ones above, subject to approval by the Secretary.

To help States transition to this new accountability system, States will establish a new baseline for its assessments 2 years after the law is enacted. During the 2 year transition, States must continue to assess students, disaggregate data, and provide interventions for schools that were priority and focus schools on the date of enactment of the law.

Local Accountability

States will identify the following types of schools for different interventions:

- Priority Schools—5 percent of the bottom-performing elementary schools and 5 percent of the bottom performing high schools in the State. Districts must choose 1 of 6 interventions for schools in this category, which include a State-developed intervention that has a basis in evidence. Rural districts are given flexibility in administering the interventions.
- Focus Schools—the 10 percent of schools that are not priority schools with the greatest achievement gaps among student subgroups. States will develop and implement a data-driven correction plan to improve student performance in these schools.

Districts will identify schools that have missed their performance targets for student subgroups for 2 consecutive years and will, in collaboration with the school, implement a locally designed intervention to improve student performance.

State and Local Report Cards

Each district and State must provide a report card for each public elementary and secondary school in the State. The report cards must include, among other things: information relating to the State's accountability system; information relating to student achievement and graduation rates, disaggregated and cross-tabulated across income statute, ethnicity, gender, and ability; evaluation results for teachers and principals, when appropriate; discipline data; information related to access to, and participation in, Advanced Placement and International Baccalaureate programs; data related to pregnant and parenting students; and the number of military-connected students served by public schools in the districts and States.

Equity Report Card

Each district must provide a parent with the following information on each school:

- Student achievement data, disaggregated by subgroup;
- Information on the school's funding source (Federal , State, local, or donations);
- For each high school, the graduation rate and the rate students enroll in college;
- Information on educational opportunities at each school, including availability of:
 - Preschool and full-day kindergarten; Advanced Placement and International Baccalaureate courses; Dual enrollment and early college opportunities; and Gifted programming; and
- Information on the school's climate, including disciplinary data.

Blue Ribbon Schools

The bill continues to provide States the option of recognizing and rewarding schools with the highest student achievement and most growth. States must define the criteria for recognizing schools based on the percentage of making sufficient growth to achieve college- and career-readiness, graduation rate, and the performance of each subgroup of students. States may set-aside one-half percent of title I to reward Blue Ribbon schools. Identified title I schools may use reward funds to improve student achievement and to provide technical assistance to similar schools in the State. The bill gives schools flexibility in the use of these funds.

Centers of Excellence in Early Childhood

The bill authorizes a new program to designate and reward exemplary early childhood education programs that have a demonstrated track-record of success in getting low-income families ready for school. The governor of each State must nominate an early childhood education program that may apply for a grant from the Secretary. Centers of Excellence must use their grant to disseminate best practices to other early childhood education providers in their area. Centers of Excellence may also use funding to expand their services and increase access to their program. Subject to appropriations, the minimum grant for a Center of Excellence is \$200,000.

Comparability of Services

By the 2015–16 school year, local school districts must show that their average combined local and State funds per pupil for title I schools is equal to or greater than the average combined local and State funds per pupil for non-title I schools. If all schools in a district are eligible for title I funds, the local school district must demonstrate to the SEA that the average combined local and State funds expended per pupil in high-poverty schools is equal to or greater than the average combined local and State funds expended per pupil in the district's low-poverty schools.

Equitable Distribution of Teachers

Beginning with the 2015–16 school year, the State educational agency must provide for the equitable distribution of teachers within local school districts. Teachers who are new to the profession, have not completed a teacher preparation program, are not teaching in their certified field of study, who are not classified as highly qualified, and who are in the lowest or highest rating level of their local teacher evaluation system must be equally distributed among schools in high poverty areas and schools in lesser or low poverty areas.

Part B—Pathways to College

Subpart 1—Improving Secondary Schools

The committee bill authorizes a new competitive grant program that would award grants to implement innovative and effective secondary school reforms. These reforms are directed at title I high schools with graduation rates below 75 percent that do not receive priority schools resources.

Each targeted school would be required to implement one of the following reform strategies:

- Graduation Promise Academies, which include ninth grade academies taught by teams of teachers who work with small groups for extended learning periods, etc.;
- Career Academies, which implement a rigorous curriculum that integrates academics, career and technical education, and experiential learning in high-skill, high-demand industries;
- Dual enrollment programs that provide dual enrollment opportunities with college credit-bearing courses, including accelerated certificate programs with community colleges or other recognized postsecondary credentials; or
- Early College Schools, which allow students to simultaneously earn credits towards a high school diploma and either an associate degree or transferable postsecondary education credits toward a postsecondary degree at no cost to the student.

The High School Reform Program would replace the following existing programs: Comprehensive School Reform, School Dropout Prevention, and Smaller Learning Communities.

Grant stipulations:

- Duration: 5 years, with conditions after year 3 based on satisfactory progress.
- Eligible Entity: A high-need local education agency who partners with—
 - An institution of higher education, an employer, and an outside partner with a demonstrated track record of successful high school reform or an intermediary.

Subpart 2—Accelerated Learning

The committee bill continues a program that awards grants to States to reimburse students for Advanced Placement (AP) test fees and expands the program to include reimbursement for International Baccalaureate (IB) test fees. The bill also makes other minor changes to improve program quality, including creating a priority for applications that are part of a state-wide or district-

wide strategy to increase the availability of AP or IB courses in high-need schools.

Part C—Education of Migratory Children

The committee bill continues support for the Migratory Education Program, which attempts to address the unique needs of mobile migratory children who suffer, among other things, disrupted or interrupted education and who need special supplemental support. The program provides formula grants to States based primarily on their share of migratory children. The bill strengthens the program by:

- Ensuring that migratory children and youth are expected to meet the same college- and career-ready academic content standards that all children are expected to meet and requiring the collection of new performance data;
- Updating the grant formula to more accurately provide funding based on actual counts of migratory students, including students who receive services during the summer;
- Enhancing records transfer requirements to minimize the effects of mobility; and
- Prioritizing services towards migratory students who have moved within the previous 12 months and those that have dropped out of school, as well as those that are at risk of failing to meet academic content standards.

Part D—Programs for Children and Youth Who Are Neglected, Delinquent, or At-Risk

The committee bill continues support for the Neglected & Delinquent Program, which is designed to improve educational services for children and youth in local and State institutions for neglected and delinquent juveniles. This bill strengthens the program by:

- Ensuring that these children and youth are expected to meet the same college and career-ready academic content standards that all children are expected to meet and requiring the collection of new performance data;
- Targeting funding to students who are truly “at-risk” by changing the definition of “at-risk” to eliminate the inclusion of students based solely on academic issues; and
- Requiring the development of a transition plan for students entering certain facilities and consultation between facilities and local educational agencies upon release to ensure the students’ continued success.

Part E—Educational Stability of Children in Foster Care

The committee bill authorizes new provisions to ensure educational stability for foster children who experience a number of undue burdens in the course of their public school career, including having to re-enroll in schools when they change foster placements or leave foster care. This part would require that States receiving funding under title I must coordinate with the responsible agencies to ensure foster children—when leaving foster care, changing foster placements, or in foster care—remain enrolled in their school of origin to the maximum extent possible, are enrolled immediately in school, and have their records transferred in a timely fashion.

TITLE II—SUPPORTING TEACHER AND PRINCIPAL EXCELLENCE

Part A—Continuous Improvement and Support for Teachers and Principals

The committee bill makes several key changes to the title II—A formula program, including:

- **Professional Growth and Improvement Systems:** Districts that receive title II—A funds will develop teacher and principal evaluation systems based on academic achievement and growth, classroom observations, and other measures that inform teacher performance (for teachers) and on academic achievement and growth, instructional leadership, and, if districts choose, other measures of principal performance (for principals). The evaluation systems must be able to provide meaningful feedback to teachers and principals in a timely manner and provide data to inform decisions about professional development activities. The implementation of these systems does not alter the rights and remedies enjoyed by educators through their local collective bargaining agreements and States and districts with evaluation systems approved under ESEA waivers do not have to alter the components of their systems.

- **Professional Development and Support:** Districts will conduct professional development activities that are evidence-based and aligned with the results of evaluations in order to improve student academic achievement and increase students' abilities to meet college- and career-ready standards. Early childhood educators can also be included in professional development activities.

- **Early Childhood Transition:** States and local school districts may develop and implement programs and policies to improve the transition of children from early childhood education and care programs to elementary schools.

- **Recruitment, Preparation and Distribution of Great Teachers:** Funds from title II may be used to recruit, prepare, support, reward, and retain teachers and principals in the high-need and low-performing schools where they are needed most. The funds can also be used to improve the distribution of highly rated teachers to ensure that low-income students are not taught by disproportionate shares of low-rated teachers.

- **Class Size Reduction:** Restricts funds for class size reduction to the early grades. Previous class size reduction programs failed to produce significant results for students because they operated on the margins. The bill will ensure that funds are used for class size reduction to the early grades where they are most impactful.

- **Principal Set-aside:** Principals were one of the most significant omissions of No Child Left Behind. The bill acknowledges the impact of principal leadership in schools and ensures that of the 2 percent to 5 percent States set-aside for State-level activities, the improvement of principal performance is among the few activities in which a State can invest.

Part B—Teacher Pathways

The committee bill authorizes a new program designed to support the recruitment, selection, preparation, placement, retention, and support of teachers in high-need subjects or fields who will im-

prove student academic achievement and student outcomes at high-needs schools.

Grant Stipulations:

- Eligible entities—States or districts in partnership with institutions of higher education or a nonprofit organization.
- Priority: Programs that have a track record of:
 - Recruiting individuals with a demonstrated history of academic achievement;
 - Recruiting individuals from underrepresented backgrounds;
 - Preparing teachers who improve student achievement in high-need schools.

Part C—Teacher Incentive Fund

The Teacher Incentive Fund will provide competitive grants to develop, implement, improve, or expand strategies, including performance-based incentives, to increase the number of highly effective teachers and principals in high-need schools. Priority will be given to grantees who target placing highly effective teachers and principals in priority schools or who have already developed a professional growth and improvement system, as described in title II—A. Entities eligible for grants include: districts, States, or colleges in partnership with districts and States.

Part D—Achievement Through Technology and Innovation

The committee bill continues support for an educational technology program that will award formula grants to States through the title I formula. States can then award grants to districts, through formula and competitiveness, to provide professional development to educators on the effective use of technology to improve instruction.

TITLE III—LANGUAGE AND ACADEMIC CONTENT INSTRUCTION FOR
ENGLISH LEARNERS AND IMMIGRANT STUDENTS

The committee bill continues to fund formula grants to ensure that English learners and immigrant children achieve English proficiency while they attend public school. The committee bill better targets the use of funds to support the use of evidence-based instructional programs and practices to support the acquisition of English so that English learners make sufficient progress to graduate college and become career ready.

*Subpart 1—Grants & Subgrants for English Language Acquisition
& Language Enhancement*

States will receive grants based on their share of the percentage of English learners and Immigrant children they have relative to the rest of the States. States must then provide subgrants in an amount proportional to their share of English learners relative to the number of English learners in the State. Subgrants will be used to help English learners attain English proficiency and meet the State's college- and career-ready standards. Subgrantees must use approaches that are evidence-based and proven to be effective for teaching English learners and immigrant children, such as high-quality professional development for educators.

Each subgrantee will set individual targets for English learners that will set them on a path to achieve English proficiency in no less than 5 years.

State subgrant stipulations:

- Duration: Determined by the State.
- Eligible subgrantee:
 - One or more districts.
 - One or more districts in partnership with a college, a community organization, or a SEA.

Subpart 2—Accountability and Administration

States, with input from subgrantees and subject to approval by the Secretary, will set a performance target for the number of English learners served by the State who will achieve English proficiency not more than 5 years after they are identified as English learners. Subgrantees will also set performance targets for English proficiency. Also, each second year a subgrantee receives funds from the State they will be evaluated along several factors, including:

- The number & percentage of English learners becoming English proficient in 5 years;
- The number & percentage of children meeting college- and career-ready standards 2 years after receiving services;
- The progress made by former English learners in meeting college- and career-ready standards.

States will use information from the evaluation to determine the effectiveness of programs to decide whether to provide technical assistance or discontinue funding to the subgrantee.

Subpart 3—National Activities

The Secretary will reserve 3.5 percent of title III funds for activities that include:

- Competitive grants to nonprofits or colleges with the expertise and capacity to provide high-quality professional development to improve classroom instruction for English learners;
- The establishment of an independent commission on the assessment of English learners comprised of experts who can provide the Secretary with advice regarding the development of English learners and their inclusion in State assessments;
- Innovation grants to invest in research and development in educational technology to improve English proficiency and academic achievement for English learners.

TITLE IV—SUPPORTING SUCCESSFUL, WELL-ROUNDED STUDENTS

Part A—Improving Literacy Instruction and Achievement

Subpart 1—Improving Literacy Instruction

The committee bill authorizes a new grant program to support high-quality literacy instruction to help States strengthen the literacy skills of all students from birth through high school.

The committee bill includes non-renewable planning grants (that last for a period of 1 year) and implementation grants to States (that last for a period of 5 years with opportunities to renew). Grants will be distributed to States by formula if the appropriation

for this program exceeds \$500 million. The formula is based on the share of the State's share of children from birth to 17 who live at or below the poverty line. If appropriations are below \$500 million, grants are awarded to States competitively. States will competitively distribute funds to:

- Enhance State capacity to improve literacy instruction.
- Provide high-quality, research-based professional development to instructional staff.
- Support evidence-based practices to improve literacy and writing.

Ten percent of funds will be reserved to build the literacy skills of children aged birth to 5.

State subgrant stipulations:

- Eligible Entities: Districts and early childhood education providers.
- Priority: Granted to—
 - Entities that serve children living at or below poverty; and
 - Entities that serve school-aged students reading or writing below grade level.

Subpart 2—Improving Literacy and College and Career Readiness Through Effective School Library Programs

The committee bill authorizes a competitive program to improve students' readiness for college and careers by providing students with effective school library programs. The program funds effective school library programs, which are: staffed with licensed professionals; have up-to-date books, materials and technology; includes regular collaboration between classroom teachers and school librarians in the development of curriculum; and supports the development of digital literacy skills. Districts, or a consortium of districts, are eligible to compete for these grants.

Part B—Science, Technology, Engineering and Mathematics (STEM) Instruction and Support

Subpart 1—Improving STEM Instruction and Student Achievement

The committee bill authorizes a new STEM program that would award grants to States. Grants will be distributed to States by formula if the appropriation for this program exceeds \$500 million. The formula is based primarily on the share of the State's share of children from ages 5 to 17 who live at or below the poverty line. If appropriations are below \$500 million, grants are awarded to States competitively. States will competitively distribute funds to improve student academic achievement in STEM by:

- Increasing student access to high-quality STEM courses and learning opportunities.
- Improving the quality and effectiveness of classroom instruction by recruiting, training, and supporting highly effective STEM teachers.
- Preparing more students to be on track to college- and career-readiness and success in STEM subjects.

State subgrant stipulations:

- Eligible Entities: a high-need district, consortium of high-need districts, or an outside partner (business, nonprofit, or a college) working with a high-need district or consortium.
- Matching Requirement: 15 percent.

Subpart 2—STEM Master Teacher Corps

The committee bill requires the Secretary to set-aside 10 percent of STEM funding under Subpart 1 for the STEM Master Teacher Corps competitive grant program, which would offer career advancement and higher pay to the top 5 percent of K–12 STEM teachers in the United States. Members of the teaching corps would, in turn, mentor other STEM teachers and share best practices. The Secretary will administer the grants in consultation with the Director of the NSF.

Grant stipulations:

- Duration: Not more than 5 years.
- Eligible Entities:
 - Institutions of Higher Education.
 - Non-profits that recruit STEM teachers or improve STEM teacher effectiveness.
- Matching Requirement: 50 percent.
- Priority: Grantees that will—
 - Serve large numbers of teachers.
 - Serve rural areas, particularly high-need rural areas.

Part C—Increasing Access to a Well-Rounded Education and Financial Literacy

Subpart 1—Increasing Access to a Well-Rounded Education

The committee bill authorizes a new well-rounded program that would award grants to States. Grants will be distributed to States by formula if the appropriation for this program exceeds \$500 million. The formula is based primarily on the share of the State's share of children from ages 5 to 17 who live at or below the poverty line. If appropriations are below \$500 million, grants are awarded to States competitively.

This program will allow States to continue to build teacher capacity and allow access for low-income students to a well-rounded education, including in the arts, physical education, financial literacy, health education, foreign languages, civics, history, music, and environmental literacy.

The program requires States to identify and target gaps in low-income students' access to a high-quality, well-rounded education, including: the selection of courses provided; the capacity of teachers to provide excellent instruction in those subjects; and the quality of standards, assessments, curricula, accommodations, and other supports. States may provide subgrants to high-need districts, or a consortium of such districts, to improve the skills of teachers or build local capacity to provide a well-rounded education to low-income students, students with disabilities, or English learners.

The programs that consolidated into the well-rounded Education program include: Excellence in Economic Education; Teaching American History; Arts in Education; Foreign Language Assistance Program; and Academies for American History and Civics.

Subpart 2—Financial Literacy Education

The committee bill authorizes a new program where the Secretary can award grants to States to:

- Support professional development regarding financial literacy education to secondary school teachers;
- Integrate financial literacy education into elementary and secondary schools that receive support under title I.

A State that receives funds under this subpart must provide a match of 25 percent.

Part D—Successful, Safe and Healthy Students

Successful, Safe, and Healthy Students Program replaces a number of programs in current law that have not been as effective as they were intended, largely due to their limited reach. The consolidated programs are: Safe and Drug Free Schools State grants, Elementary School Counseling, Physical Education Program, Foundations for Learning, Mental Health Integration in Schools, and Alcohol Abuse Reduction.

The Successful, Safe, and Healthy Students Program will advance student achievement and positive child and youth development by promoting student health and wellness; preventing bullying, violence, and drug use; and fostering a positive school climate. The Successful, Safe, and Healthy Students Program would establish two State grant programs:

1. *Grants for State and local data systems:* The Secretary is authorized to reserve 30 percent of funds, or \$30 million, whichever is greater, for formula grants to States to develop or enhance systems that will give local leaders the information they need to improve the conditions for learning in their schools and communities. The formula will be based on title I. During years where the overall appropriation for Successful Safe and Healthy is less than \$30 million, the Secretary will direct all funds to States to develop conditions for learning systems. This grant will help build State capacity to develop a high-quality plan for the Successful, Safe, and Healthy Students State Grants.

2. *Successful, Safe, and Healthy Students State Grants:* States will receive funding to provide subgrants to implement programs to support positive conditions for learning by promoting student health and fitness, mental health and well-being, drug and violence prevention, and safe and supportive schools. Funds will be distributed by formula to States (through the title I formula) but if the appropriation for this program is below \$500 million, the grants would be awarded to States competitively. To be eligible to apply for funding under this program, States must:

- Establish a statewide physical education requirement.
- Require all districts to establish policies that prohibit bullying & harassment of students.

State subgrant stipulations:

- Eligible Entities: Districts, a consortium of districts, nonprofits working with districts.
- Priority: Entities that serve low-income students and demonstrate the greatest need.

- Funding Allocation: States must distribute the following percentage of subgrant funds:
 - Not less than 20 percent for programs to promote physical activity, education, and fitness and nutrition;
 - Not less than 20 percent for drug and violence prevention (including bullying prevention); and
 - Not less than 20 percent for programs to promote mental health.

3. *School Construction after a Violent or Traumatic Crisis*: The Secretary is authorized to provide financial assistance to districts that serve a school in which the learning environment has been disrupted due to a violent or traumatic crisis. Grants would support the acquisition or improvement of property as well as construction.

Part E—Student Non-Discrimination

The committee bill authorizes Senator Franken’s Student Non-Discrimination Act (SNDA), which ensures that all students have access to a public education in a safe environment, free from discrimination. This includes freedom from harassment, bullying, intimidation and violence on the basis of sexual orientation or gender identity.

SNDA provides a comprehensive Federal prohibition of discrimination in public school based on actual, or perceived, sexual orientation or gender identity. It also gives the Department of Education the authority to combat such discrimination through regulation and enforcement, much in the same way they did through title IX and other non-discrimination laws. SNDA also provides meaningful and effective remedies (loss of Federal funding and legal cause of action for victims) for discrimination in public schools based on actual or perceived sexual orientation or gender identity, modeled after title IX. SNDA also provides those students who feel they have experienced discrimination in violation of this part with a private right of action.

Part F—21st Century Community Learning Centers

The committee bill continues the authorization for the 21st Century Community Learning Centers (CCLC) Program, which currently funds before-school, after-school, or summer-learning programs. The committee bill will expand the program to give local communities authority to decide whether to use 21st CCLC funds for:

- before, after, or summer learning;
- a significantly increased school day, week or year to provide more time for academic and enrichment activities; or
- a redesigned school program with at least 300 hours of additional school time for academics, additional subjects and enrichment activities, and teacher collaboration and planning.

Funds will be distributed by formula to States (through the title I formula), which then award subgrants to districts competitively. State subgrant stipulations:

- Duration: 3 years with a chance to extend for 2 years if the entity gets positive outcomes.

- Eligible entities include partnerships between one or more high-need local educational agencies and one or more public entities or nonprofit organizations with a demonstrated record of success in designing and implementing before school, after school, summer learning, or expanded learning time activities.

Rural districts who cannot find a partner can apply on their own.

- Priority: Entities that—
 - Provide strong research evidence for their activities;
 - Propose to serve high percentages of low-income students;
 - Have strong partnership agreements; and
 - Provide matching funds.

Part G—Promise Neighborhoods

Subpart 1—Promise Neighborhoods Partnership Grants

The committee bill authorizes the new Promise Neighborhoods Partnership program, which is a comprehensive program to provide children with all the support they need from birth through college. The proposal is based on the Harlem Children’s Zone (HCZ), program that has been successful in increasing college success for students within a neighborhood in Harlem.

The program will fund national competitive grants to create cradle-to-career “continuums of care” for all children in low-income neighborhoods. The Promise Neighborhoods Program requires that community-based organizations partner with local institutions as they provide a wide range of services to children beginning at birth and continuing through college entry. The services provided must include elements that are essential to healthy development and, eventually, college and career readiness, including training for expectant parents, high-quality early care and education, and supportive services for children throughout their school years. Grantees must monitor data on a range of indicators and share best practices.

Grant stipulations:

- Duration: 5 years with a chance to extend for 1 year if the entity can demonstrate significant improvement across a number of performance metrics.
- Eligible Entity: A nonprofit that works with at least one of the following: a high-need district, a charter school, an institution of higher education, the mayor, or an Indian tribe.
- Match: 100 percent.

Subpart 2—Promise Neighborhoods Schools Grants

These are school-centered grants that allow schools to provide wrap-around services on-site by leveraging existing resources in the community. These grants will support the hiring of an on-site coordinator who will help connect students and their families to the academic and non-academic resources they need to experience success in and outside of the classroom.

Grant Stipulations:

- Duration: 5 years with a chance to extend for 1 year if the entity can demonstrate significant improvement across a number of performance metrics.
- Eligible Entity: a high-need district in partnership with a nonprofit or a college.

- Match: 100 percent.
- Priority: Entities that will—
 - Direct significant investment to high-quality early childhood education; and
 - Provide schools with autonomy over staff, school time, and budget.

Part H—Parent and Family Information Resource Centers

This committee bill continues support for parent and family information resource centers (PFIRCs) but refocuses the centers on providing support to SEAs in coordinating parent and family engagement policies, in supporting the lowest-performing districts as they engage parents and families, and in coordinating the activities of other relevant Federal programs and community-based organizations with SEAs and LEAs.

PFIRCs must set aside 30 percent of their funding to support parent and family engagement activities for families whose children attend early childhood education programs.

Grant Stipulations:

- Duration: 5 years.
- Eligible Entity: a high-need district in partnership with a non-profit or a college.
- Match: 100 percent.
- Priority: Entities that have a track record of increasing and enhancing parent and family engagement for children in high-need districts or who attend high-need schools.

Part I—Ready-to-Learn Television (RTLTV)

The committee bill continues to fund the Ready-to-Learn Television (RTLTV) program. RTLTV funds grants exclusively to public telecommunications entities to develop and distribute educational video for preschool- and elementary school-aged children and their parents, in an effort to increase student academic achievement. The program is unchanged in this bill.

Part J—Programs of National Significance

The committee bill authorizes a new Programs of National Significance grant program. The program will award competitive grants to non-profit organizations to carry out certain activities previously carried out with earmarks. The following types of programs or entities would be able to compete for funding under this program: Close Up; Civic education programs; National Board for Professional Teaching Standards; Teach for America; the National Writing Project; Reach Out and Read; Reading Is Fundamental; VSA Arts; Javits Gifted and Talented Program; and programs funded through the Women's Educational Equity Act.

This part also allows grants for programs not previously funded through earmarks, like programs that provide social, emotional, and academic support to students from military families.

Part K—Competency-Based Assessment and Accountability Demonstration Authority

The Secretary may provide States or a consortium of States with the authority to incorporate competency-based accountability into the State accountability system. This will allow States to create

summative assessments that test for higher order skills, critical thinking, problem solving, and self-directed learning aligned with college- and career-ready standards.

This authority is only available for 3 years and may only be awarded to a maximum of three States or a consortium of States.

TITLE V—PROMOTING INNOVATION

Part A—Race to the Top

The committee bill authorizes the Race to the Top competitive grant program to provide incentives for comprehensive reforms designed to lead to improved academic achievement for all students.

The Secretary will design a competition that advances one or more of the following critical priorities:

- Increasing the access of children from low-income families to highly rated teachers and school leaders;
- Strengthening the availability and use of data to improve instruction;
- Implementing college- and career-ready academic standards;
- Turning around the priority and focus schools;
- Creating successful conditions for the creation, expansion, and replication of high-performing public charter schools and autonomous schools that serve students from low-income families;
- Providing equitable resources to high-poverty schools; and
- Improving school readiness by increasing access to high-quality early childhood education programs for children from low-income families or creating an integrated system of programs and services.

Grant stipulations:

- Duration: No more than 4 years.
- Eligible Entities: States, high-need districts, or a consortium of either will be eligible to compete for funds.
- Priority: Granted to:
 - Rural high-need school districts or a consortium.
 - Grantees that offer full-day kindergarten, for those grantees who offer early childhood education programs and services.

Part B—Investing in Innovation

The committee bill authorizes the Investing in Innovation Program (I3), which is designed to develop and replicate promising programs in education. The program will expand the implementation of, and investment in innovative practices with a demonstrated impact on improving student achievement, closing achievement gaps, increasing high school graduation rates, improving teacher and school leader effectiveness, or improving school readiness.

The Secretary may choose to reserve 30 percent of the funds appropriated for I3 to fund ARPA-ED, modeled on the success of the Advanced Research Projects Agency at the Department of Defense. ARPA-ED will fund projects run by industry, universities, or other innovative organizations. Projects will be selected based on their potential to transform teaching and learning.

Grant stipulations for I3 (not ARPA-ED):

- Duration: No more than 3 years with a chance to extend for another 2 if it can demonstrate progress in improving student outcomes.

- Standard of Evidence: Applicants must show that their projects have a basis in evidence.
- Eligible entities include:
 - School districts.
 - Non-profit in partnership with a district or a consortium of districts.
- Set-aside: There will be a 22 percent set-aside for rural applicants.
- Priority: Applicants who plan to—
 - Address the needs of high-need districts.
 - Improve school readiness through early childhood education.
 - Address the learning needs of students with disabilities.

Part C—Magnet Schools Assistance Program

The committee bill maintains the magnet schools program as a competitive grant program with more emphasis on funding whole-school magnet programs or models that have demonstrated success in improving student academic achievement and reducing minority group isolation.

Grant Stipulations:

- Duration: No more than 3 years with a chance to extend for another 2 if it can demonstrate progress in improving student outcomes.
- Eligible Entities include: Districts.
- Priority: Applicants who:
 - Demonstrate the greatest need based on expense/difficulty in running a program.
 - Support programs that have improved achievement or a strong research basis.
 - Open their programs to students on the basis of lottery instead of examination.
 - Serve the entire student population of a school.

Part D—Public Charter Schools

Subpart 1—Successful Charter Schools Program

The committee bill continues the charter schools program with a focus on improving the quality of the sector and investing in proven models of success. The charter school grants program will provide competitive grants to support the creation, expansion, and replication of high-performing charter schools. To ensure that limited Federal resources are targeted to charter schools with a commitment to strong academic results, the program requires high goals of student academic achievement for all student subgroups, and meaningful community outreach to parents and families. In addition, the redesigned program:

- Promotes strong performance-based authorizing policies that are transparent and effective in closing down unsuccessful schools;
- Ensures quality control through performance-based accountability; and
- Ensures charter schools recruit and meet the needs of students with disabilities and English learners.

Grant Stipulations:

- Duration: No more than 3 years with a chance to extend for another 2 if it can demonstrate progress in improving student outcomes.
- Eligible Entities include: States, districts, charter school authorizers and nonprofit charter management organizations.
- Set-Aside: The program sets aside 15 percent for charter school facilities.
- Reservation: 25 percent of the charter school grant funding will be distributed to States.
- Priority: Applicants who will create, expand, or replicate charters that serve low-income students.

Subpart 2—Charter School Facility Acquisition, Construction, and Renovation

The committee bill continues support for the charter school facilities program, which will support eligible entities to improve access to facilities and facilities financing for high-performing charter schools and assist them in addressing the cost of acquiring, constructing, and renovating facilities.

Competitive grants will be made for innovative facilities financing programs, including credit enhancement, open-facilities-access programs, making available renovated or adapted space, leveraging State and local facilities funding, and State per-pupil facilities aid programs.

Grant Stipulations:

- Duration: 5 years.
- Eligible entities include: States, districts, nonprofit organizations, State financing authorities, or a consortium of such entities.
- Reservation: At least 65 percent of the funds must be expended for credit enhancement grants.

Part E—Voluntary Public School Choice

The Voluntary Public School Choice program currently provides competitive grants to support the establishment or expansion of inter- and intra-district public school choice. In the committee bill, we continue the competitive program with minor changes to improve quality, including expanding the application requirements to ask grantees how activities supported through the grant will lead to increased student achievement and access to high-quality schools for students attending the lowest-performing schools.

Grant Stipulations:

- Duration: No more than 3 years with a chance to extend for another 2 if it can demonstrate progress in improving student outcomes.
- Eligible Entities include: High-need districts applying in partnership with a State or another district.
- Priority: Applicants who will:
 - Expand or establish inter-district choice programs for low-income students.
 - Establish or expand a program that will increase diversity.

Part F—College Information Demonstration Program

This committee bill authorizes the Secretary to establish a demonstration program that provides funding to high-need schools to assess the effectiveness of providing college awareness and applica-

tion services and programs that will increase the chances that students will: apply to college, apply for financial aid, enroll in college, or receive financial aid.

At a minimum the Secretary will provide school districts that agree to participate in the demonstration with certain information for their students, including: guidance on how to apply to college and for financial aid, including availability of different types of Federal and State aid and application deadlines; information on the likely net cost of attending a local college or a State flagship; information about college application fee waivers.

TITLE VI—PROMOTING FLEXIBILITY; RURAL EDUCATION

Part A—Transferability

Current law allows up to 50 percent of non-administrative funds for State-level activities under several programs in titles II, IV, and V to be transferred to other programs in those same titles. This bill provides increased flexibility by allowing States to transfer their funds among all of the formula grant programs in the bill and increases this percentage to up to 100 percent; though, they cannot transfer funds out of titles I or III because of the robust State activities required under those formulas, such as implementing accountability systems under each respective title.

This provision also allows districts to transfer up to 100 percent of the funds they receive through formula for activities authorized under other formula programs. However, no funds may be transferred out of formula programs designated for particular student populations, which include titles I (Disadvantaged), III (English learners), VII (Native Hawaiian/Alaskan, Indian students), or VIII (Federally Impacted).

Part B—Rural Education Achievement Program

The committee bill continues support for the Rural Education Achievement Program (REAP), which is designed to address the unique challenges of rural schools. The program provides supplemental funds and flexibility with uses of funds, recognizing that formula grant amounts are often too small to make a major impact in rural districts. REAP currently awards two types of formula grants:

(1) The Small, Rural Schools Achievement (SRSA) Program, which provides grants directly to eligible districts. Under SRSA, there is a minimum and maximum grant amount that LEAs can receive; the grant award amount is offset by the amount of funds the LEA receives under other ESEA title funding.

(2) The Rural and Low Income Schools (RLIS) Program, which provides grants to States, which then award subgrants to districts.

The committee bill will continue REAP, with several key changes.

- The bill will update the locale codes used to classify rural district to be consistent with those developed by the U.S. Census Bureau and the National Center for Education Statistics. The locale codes for REAP will be: 32, 33, 41, 42, and 43.

- Currently, if a district is eligible for both the SRSA and RLIS programs, it must participate in only the SRSA program. In this

bill, dual-eligible districts will be able to choose which program they would rather participate in.

- Increase the minimum (from \$20,000 to \$25,000) and maximum (from \$60,000 to \$80,000) grant sizes for SRSA.

TITLE VII—INDIAN, NATIVE HAWAIIAN, AND ALASKA NATIVE
EDUCATION

Part A—Indian Education

Subpart 1—Formula Grants to Local Educational Agencies

Ninety-three percent of American Indians attend public schools not affiliated with the schools run by the Bureau of Indian Education (BIE) at the Department of the Interior. The committee bill continues support for formula grants directly to districts to help them improve the academic achievement of Indian students by meeting their unique cultural, language, and educational needs. The formula is based primarily on the number of Indian children the district serves.

The bill changes eligibility criteria for the program to allow for different organizations—specifically, community organizations made-up of tribal leaders—to apply for grants in the event that districts decide not to pursue formula grants under this part. The bill also encourages activities that—

- Support the restoration of Native American languages.
- Prevent violence, suicide, and substances abuse.
- Incorporate culturally and linguistically appropriate content into classroom instruction.
- Provide access to high-quality early childhood education programs.

Grant Stipulations:

- Eligible Entities:
 - Districts who serve at least 10 Indian students.
 - Indian Tribes (if districts do not apply).
 - Indian Community-Based Organizations (if districts and tribes do not apply).
 - A consortium of the above.

Subpart 2—Special Programs and Projects to Improve Educational Opportunities for Indian Children and Youth

The committee bill continues support for projects to develop, test, and demonstrate effectiveness of programs and services to improve the educational opportunities and achievement of Indian students.

The bill enhances an existing focus on early childhood by allowing grantees to support high-quality early childhood education programs that are effective in preparing children to be achieving at grade level by the end of elementary school.

Grant Stipulations:

- Duration: 3 years with an opportunity to extend for 2 additional years if the grantee meets objectives set by the Secretary.
- Eligible Entities: States, districts, tribes, tribal organizations, tribal colleges, and BIE schools.

Subpart 3—National Activities

The committee bill establishes a new program requiring the Secretary to award grants to States, districts, and Indian entities to support Native American language programs and Native American language restoration programs.

The bill also directs the Secretary to conduct a study to improve the collaboration between States and districts, other relevant State and local agencies, and Indian tribes in the provision of services to Indian students.

Part B—Native Hawaiian Education; Alaska Native Education

Subpart 1—Native Hawaiian Education

The committee bill continues support for a consolidated program of competitive grants to Native Hawaiian educational or community-based organizations, or other public or private nonprofit organizations with experience in operating Native Hawaiian programs. Changes in the bill expand the allowable uses of the grant to include the development of a statewide system of early childhood education programs to support the healthy development of Native Hawaiian children.

The committee bill also continues support for a Native Hawaiian Education Council. Changes in the bill focus the Native Hawaiian Education Council's efforts on addressing the educational and workforce needs of Native Hawaiian students by redesigning the composition of the Native Hawaiian Education Council and refocusing its purpose to ensure proper coordination of educational and related services and programs available to Native Hawaiian students. The council will also ensure that organizations that receive competitive grants under this part are regularly evaluated based on objective, quantifiable measures to determine effectiveness.

Subpart 2—Alaska Native Education

The committee bill continues support for programs to support educational opportunity for Alaska Native students. The bill adds maximizing Alaska Native participation in the planning and management of Native Alaskan programs to the purposes of Alaska Native Education grants. The bill prioritizes Alaska Native organizations in the awarding of grants and contracts. The bill also expands the list of permissive activities under the grant to include a focus on improving outcomes for at-risk students attending schools operated by tribes. Further, application requirements have been updated to promote accountable and meaningful partnerships with Alaska Native organizations.

Grant Stipulations:

- Duration:
- Eligible Entities:
 - Alaska native organizations.
 - Entities with experience in development or operating Alaska Native programs.
 - Cultural and community-based organizations.
 - A consortium of the above.

TITLE VIII—IMPACT AID

The committee bill continues to provide support for the Impact Aid program. The Impact Aid program currently provides payments to local educational agencies that are financially disadvantaged by Federal land ownership (e.g. school districts where large numbers of students live in non-taxable housing on a military base). For local educational agencies impacted by the Federal property in their districts, this program ensures an equitable allocation of dollars by eliminating the subjectivity caused by the requirement to determine the “highest and best use” of land. For local educational agencies impacted by the federally connected children in their districts, the bill addresses issues caused by the privatization of military housing. The bill also makes changes to foundation payments and the formula used when the program cannot be fully funded. This program has historically been behind in providing payments; this bill incorporates language from a bill introduced by Senator Murray requiring the Department of Education to pay the full amount due in a timely fashion. Many of these changes were made in the 2012 National Defense Authorization Act, but with a sunset of 2 years. This bill makes the changes permanent.

TITLE IX—GENERAL PROVISIONS

Evaluation of Programs

In current law, the Secretary’s evaluation authority for programs, and the amount he could reserve for such evaluation, was restricted either by title or by program. We have consolidated the evaluation authority for each program into one section giving the Secretary the authority to carry out high-quality evaluations of all programs and related policies, with a focus on rigorous impact evaluations where feasible and appropriate. For this purpose, the bill reserves not less than 1, and not more than 3 percent, from all other programs (only 1 percent from title I).

Definitions

This title includes the general definitions for the Act. Definitions of particular importance include: professional growth and improvement system (teacher and principal evaluation systems), young child (children aged birth to kindergarten), professional development, expanded learning time, graduation rate, highly qualified teacher, positive behavioral interventions and supports, high-need school, and early childhood education program.

Other Relevant Provisions

Other provisions include the authorization for the Secretary to issue waivers, school prayer guidance, and the unsafe school choice option. The unsafe school option allows the family of a child who has been a victim of a crime in or on the grounds of the school to choose to attend another school in the same LEA.

TITLE X: COMMISSION ON EFFECTIVE REGULATION AND ASSESSMENT SYSTEMS FOR PUBLIC SCHOOLS

This bill establishes a Commission on Effective Regulation and Assessment Systems for Public Schools. The Commission will: (1) examine the regulatory requirements on elementary and secondary

education at the Federal, State, and local levels; (2) make recommendations on how to align and improve requirements in such regulations; (3) examine the quality and purpose of current requirements; and (4) make recommendations to improve and align assessment systems to provide meaningful information and improve student achievement, teacher performance, and innovation.

TITLE XI—AMENDMENTS TO OTHER STATUTES

McKinney-Vento Homeless Assistance Program

The McKinney-Vento Act's Education for Homeless Children and Youth (EHCY) program was created to remove the barriers to education caused by homelessness. This bill improves the program by reinforcing and expanding key provisions, including school stability, enrollment, and support for academic achievement. Specifically, this reauthorization:

- Maintains the requirement for schools to keep homeless children and youth in their original schools, unless the parent, guardian, or unaccompanied youth wishes to change schools, or unless an individualized, best-interest determination by the school supports a change of schools;
- Addresses credit-accrual problems, increases access to credit-recovery opportunities, and supports the provision of high-quality early care and education programs and services to young homeless children;
- Clarifies the law to help defray costs associated with transporting homeless students to the school of origin;
- Describes a clear and accessible dispute resolution process for parents;
- Ensures homeless students access the full range of academic support opportunities offered by schools; and
- Enhances school districts' ability to identify and serve homeless children and youth by requiring professional development, training, resources and time for homeless liaisons so they can carry out the duties required by the Act.

VIII. ADDITIONAL VIEWS

Additional Views of Senators Alexander, Enzi, Burr, Isakson, Paul, Hatch, Roberts, Murkowski, Kirk, and Scott

INTRODUCTION

Over the last decade, the U.S. Department of Education has become so congested with Federal mandates that it has become, in effect, a National school board. This congestion of mandates is caused by three things: No Child Left Behind, Race to the Top, and the Obama administration's unprecedented use of waivers to impose on States new requirements not authorized in law.

In 2001, Republicans and Democrats in Congress and President George W. Bush worked together to enact a reauthorization of the Elementary and Secondary Education Act (ESEA) to improve our Nation's schools. They called it No Child Left Behind (NCLB). The law responded to concerns that our schools were not adequately preparing our young people for the future, that many students were being ignored, and that billions' of American taxpayer dollars were not producing good results. Among many things, it imposed

a complicated system for deciding whether schools were succeeding or failing based on State test results, sanctions for schools missing their performance targets, and a requirement that each of our Nation's 3.2 million teachers be "highly qualified" as defined by Washington. The goal was laudable enough: All 50 million students in nearly 100,000 public schools were to be proficient in reading and math by the end of the 2013–14 school year. Unfortunately, NCLB inserted too many Washington rules and regulations into matters that should have been left to communities, parents, and classroom teachers.

No Child Left Behind has had some positive results. It has helped create an environment in which many States have put in place challenging standards in reading and math and are conducting annual tests aligned with those standards. All States are participating in the National Assessment of Educational Progress—"the Nation's report card"—providing a reliable audit of the rigor of States' standards and tests. The law encouraged school choice and the growth of charter schools, giving more parents the opportunity to choose the best school for their child. Most importantly, States, local districts, and schools are now reporting annually on student achievement overall and for each subgroup of students based on race, ethnicity, family income, English proficiency, and disability status. As a result of this so-called "disaggregation" of data, parents, State legislators, and governors are better able to identify struggling schools and populations and are holding their districts, schools, principals, and teachers accountable.

However, data from the last 10 years confirm that the Federal mandates and regulations NCLB imposed upon local schools have not worked as well as the law's authors had hoped. Federal funding for programs under the Elementary and Secondary Education Act increased by 64 percent between 2000 and 2012, but insufficient progress was made toward the goal of universal student proficiency in core academic subjects. NCLB armed parents and policymakers with better data on which to base their decisions, but its prescriptive Federal mandates have too often hamstrung their ability to make the right decisions for their schools. This experience makes it clear that local schools cannot be fixed from Washington—only principals, teachers, parents, and communities can improve their schools.

In 2009, President Obama and congressional Democrats created the competitive grant program known as Race to the Top. This program provided grants to States to pursue aggressive education reforms such as raising standards, improving tests, evaluating and rewarding outstanding teaching, and expanding charter schools. Unfortunately, the Administration used the program to essentially mandate that the 46 applicant States, along with the District of Columbia, adopt the Common Core State Standards in reading and math, federally defined turnaround models for failing schools, and prescriptive teacher and principal evaluation systems.

Congress's failure to fix NCLB has now allowed the Administration to turn its waiver authority under Title IX of ESEA—under which States may request relief from unworkable Federal mandates—into a conditional process in which the U.S. Secretary of Education dictates what States must do in order to obtain that relief. To obtain a waiver today, States must either adopt the Com-

mon Core standards in reading and math or prove to the U.S. Department of Education's satisfaction that their standards would prepare a high school graduate for college or careers, accept new Federal definitions of how the State should measure a school's performance, and develop statewide teacher and principal evaluation systems that conform to Federal regulations. The law does not give the Secretary the authority to impose on States requirements that were developed in the executive branch without congressional approval. Yet the mandates in NCLB have become so dysfunctional that States are effectively forced into the waiver process: 47 States plus the District of Columbia have applied.

The latest developments in the Administration's waiver policy are even more troubling. In August 2013, the Secretary granted waivers to eight California school districts after previously denying a waiver application from the State of California itself, despite the fact that the law clearly States that school districts seeking waivers must apply to the Secretary through their States. This new policy threatens to undermine the ability of States to pursue a coherent reform agenda and is only the latest evidence of the Department of Education having assumed for itself the role of national school board.

STRENGTHENING AMERICA'S SCHOOLS ACT OF 2013

Instead of reversing the congestion of Federal mandates that has built up over the past decade, the 1,150-page Strengthening America's Schools Act of 2013 would not only freeze these mandates in place, it would expand the Federal role in elementary and secondary education. The committee-passed bill suggests Congress and the Federal Government do not trust parents, classroom teachers, school administrators, and States to care about and educate their children. It reinforces NCLB's mistaken notion that Washington must do it for them.

Although this bill eliminates NCLB's onerous Adequate Yearly Progress mandate, it replaces it with an equally unworkable regime requiring States to set prescriptive performance goals that meet Federal requirements and must be negotiated with Washington. It also would force States to identify and fix more than 20 percent of public schools based on federally defined measures of student performance and growth, achievement gaps, and high school graduation rates. Furthermore, this bill doubles down on the inflexible school turnaround strategies that are mandated under Race to the Top and the Administration's waiver program despite the absence of research to support their effectiveness. We believe school turnaround models cannot be so thoughtfully constructed from Washington to respond to the unique circumstances facing thousands of schools across the country. Any attempt to do so will either be overly prescriptive or produce a lowest-common-denominator compromise that forces local districts to engage in a meaningless exercise in complying with Federal regulations.

This bill further micromanages States by requiring them to receive Washington approval of their standards and measures of student growth, prove to the U.S. Department of Education the adequacy of their assessments, and force students with disabilities to take tests that may be inappropriate. We believe that these steps will only exacerbate concerns about the federalization of what was

initially a voluntary, State-led effort to adopt common standards and assessments.

Under this bill, every one of our approximately 15,000 local school districts in the United States would be required to implement the same federally defined approach to evaluating teachers and principals, based in significant part on student test scores and other prescribed elements. While we believe that strong evaluation systems are an essential component of education reform, the Federal Government should not mandate these systems or define how they are to be developed and implemented at the State or local level.

This bill purports to elevate the importance of teacher effectiveness over the paper credentials that are the basis of the current Federal definition of a "Highly Qualified Teacher." Yet it retains the Highly Qualified Teacher requirements from NCLB for almost all new teachers, providing only limited flexibility for teachers in rural schools. Under this bill, even if a teacher is found to be highly effective under a State or district evaluation system, that teacher would still have to go through a complicated bureaucratic process in order to demonstrate that they are "highly qualified" based on State licensure requirements, education credentials, and test results. There was no research evidence to support these Federal requirements when they were first put in place under NCLB, and there is none now. By continuing to include the Highly Qualified Teacher provision in Federal law, this bill would continue to keep many talented individuals from entering the teaching profession.

While NCLB demonstrated that focused data collection and reporting are important accountability tools, this bill adds more than 150 new reporting elements, including, but not limited to, school-level information on student pregnancy, college remediation rates, incidents of student drug use, detentions, suspensions, class size, and the salaries of inter-scholastic athletic coaches. The Council of Chief State School Officers estimates that the new reporting requirements in title I of this bill alone would require States to collect, analyze, and report almost 46,000 data elements annually. Aside from the burden this would place on our Nation's schools, it is doubtful that the U.S. Department of Education has the capacity to analyze all this data or to use it constructively.

This bill recognizes a legitimate concern about the inequitable distribution of Federal school funding, particularly the formula under title I-A, which is intended to distribute funds to the neediest students in low-income schools. Due to a flaw known as the "comparability loophole," the current formula often results in the money going to schools serving less disadvantaged students. However, this bill seeks to address this problem in the wrong way. Rather than improving the flawed Federal title I-A formula to ensure that Federal funds follow the poorest students to the schools they attend, this bill seeks to micromanage how States and local districts allocate their own State and local funds.

By requiring that "comparability" be demonstrated based on district expenditures, this bill would cause dramatic upheaval in our Nation's school finances and place a substantial burden on States and local school districts. According to the Council of Great City Schools, complying with this provision would cost 63 of our Nation's large urban districts \$2 billion of their own dollars. This

amounts to a direct tax on our Nation's poorest communities and is one of the starkest examples of how this bill moves towards establishing a national school board. It seeks to leverage the Federal Government's limited investment, which represents approximately 10 percent of public school funding, to tell local districts how they must allocate the 90 percent of funding that comes from State and local sources. As the U.S. Supreme Court explained in its 2012 decision, *National Federation of Independent Business v. Sebelius*, which struck down the expansion of Medicaid under the Patient Protection and Affordable Care Act, such Federal policies amount to a "gun to the head" that crosses the line between encouragement and coercion and represents "economic dragooning that leaves the States with no real option but to acquiesce."

In addition to further expanding the role and power of the U.S. Department of Education, the Strengthening America's Schools Act of 2013 fails to address the lack of return on the American taxpayer's education investment and the dire condition of the Federal purse. Rather than eliminating duplicative or ineffective programs and providing more flexibility to States and local school districts through program consolidation, this bill creates 28 new programs and dedicates nearly 500 pages to new competitive grant programs. Based on the President's budget proposal and bills that other members have introduced to authorize funding for these programs, these additions could increase Federal spending under ESEA by \$3 billion annually. This would only divert limited Federal resources away from the States, school districts, and schools that need it most.

Finally, this bill leaves the Secretary's waiver authority virtually untouched. If enacted into law, it would provide no relief to the 41 States and the District of Columbia with waivers until those waivers expire. And the nine States without waivers would have to implement most of the same Federal mandates. While disguised as offering flexibility from the requirements of NCLB, in reality this bill requires that all States submit to the subjective judgments of unelected bureaucrats and unaccountable peer review panels in Washington, DC.

A BETTER SCHOOLS PLAN

Republican members of this committee offered and unanimously supported a 220-page alternative proposal that moves in a different direction—toward helping children learn what they need to know by restoring responsibility to States and communities and giving teachers and parents freedom, flexibility, and choice. It is called the "Every Child Ready for College or Career Act."

The Every Child Ready for College or Career Act emphasizes State and local decisionmaking. It takes Washington out of the business of deciding whether local schools are succeeding or failing, freeing all schools from NCLB's Adequate Yearly Progress mandate. Rather than Federal rules on how States and local districts identify and fix public schools based on performance measures and turnaround strategies defined by Washington, this alternative proposal asks States to develop their own systems to identify schools that need assistance in meeting State-developed standards, as well as any other performance measures determined by States, and asks

local districts to develop their own strategies for improving these schools.

Instead of mandating that States adopt standards that conform to a new Federal definition of “college and career ready,” this proposal maintains the current requirement that States have challenging academic standards and annual assessments in reading, math, and science, including alternative and modified standards and assessments for students with disabilities. It prohibits the U.S. Secretary of Education from specifying, defining, or prescribing the standards or measures that States or school districts use to establish, implement, or improve their standards and assessments. The Secretary also may not require or coerce States or local districts to adopt common standards, assessments, or accountability systems.

This proposal recognizes that funding to local school districts under Title I of ESEA has drifted from its intended purpose of helping the poorest students and gives States the option to let title I funds follow low-income children to the public school they attend. In doing so it provides an opportunity for States to address the formula flaw that often diverts these funds to schools serving wealthier families. It does not, however, impose a new mandate that would either force involuntary teacher transfers or cause a dramatic upheaval in how local schools are funded, as would occur under the majority’s bill. It also makes it easier for States to offer low-income parents more choice in finding the right public school for their children.

The Every Child Ready for College or Career Act eliminates the Federal “Highly Qualified Teacher” requirement altogether, restoring States’ control over who is allowed to teach in their schools. It encourages, but does not require, States and local school districts to create teacher and principal evaluation systems that relate teacher performance to student achievement and other factors determined by the State, by allowing them to use funds under Title II of ESEA for that purpose. The Federal Teacher Incentive Fund grant program would continue to support innovative teacher and principal performance-based compensation programs.

Rather than allowing decisionmakers in Washington, DC, to determine funding priorities, the Every Child Ready for College or Career Act consolidates 62 existing programs authorized by NCLB or funded by subsequent appropriations bills. It gives those funds back to States and local school districts in the form of two flexible and streamlined block grants to better meet the unique and specific needs of students, as determined at the local level. It also eliminates the current “maintenance of effort” requirement, giving States more flexibility to decide where and when to make targeted investments in education.

Finally, this alternative proposal preserves the original intent of the waiver authority under title IX of the law. The Secretary is authorized to waive portions of the law that stifle State and local innovation, but that authority is limited. The Every Child Ready for College or Career Act specifies that States and local districts may submit applications that will enable them to improve student academic achievement. The Secretary may review those applications and shall approve them with deference to State and local judgments on the best way to do this. The Secretary may not, however, use the waiver authority to become a national school board and

mandate performance targets, standards and assessments, growth models, teacher and principal evaluations, or any other conditions not already specified in the law. Furthermore, while local school districts may individually or collectively apply for waivers with the support of their State, the Secretary is prohibited from circumventing the legal authority of States and their governors when granting waiver requests.

CONCLUSION

The accumulation of Federal mandates over the past decade has turned the U.S. Department of Education into a national school board for our 100,000 public schools. Today, States must come to Washington to get approval for their plans to improve their schools, and unelected bureaucrats make decisions that determine how 50 million students will be educated. This unfortunate situation is partly attributable to the failure of Congress to fix the problems with No Child Left Behind. It also reflects this Administration's use of competitive grants and waivers to coerce and impose restrictive mandates on States and local districts.

The Democrats on this committee have offered a 1,150-page plan that would not only maintain these mandates, but expand them, by setting Federal performance targets, mandating common standards and assessments, requiring federally defined teacher and principal evaluation systems, creating 28 new programs and 150 new reporting requirements, and maintaining the Secretary of Education's unchecked power to grant waivers based on conditions not specified in the law. Their Strengthening America's Schools Act of 2013 seeks to codify a range of policies that have supplanted the judgment of governors, legislators, school boards, teachers, and parents.

Committee Republicans offered instead a 220-page proposal that emphasizes State and local decisionmaking. It gets Washington out of the business of deciding whether local schools are succeeding or failing, prohibits the U.S. Secretary of Education from prescribing standards or accountability systems for States, makes it easier for States to offer low-income parents more choice in finding the right public school for their children, encourages States and local districts to create teacher and principal evaluation programs free of Federal mandates, and offers more flexibility in spending Federal education dollars, while cutting waste.

This is not a proposal just for Republicans. We believe this proposal represents the views of governors leading the charge for education reform, State legislators who are working to improve their local schools, teachers who value the freedom to teach, and parents who want the best education possible for their children.

While the process and product of this committee markup was decidedly partisan, with majority and minority members offering fundamentally different views about the role of the Federal Government in elementary and secondary education, Senate Republicans are committed to moving forward on reauthorizing ESEA and fixing NCLB.

We welcome an opportunity to have a full and vigorous debate through regular order that enables the entire Senate to participate in shaping this legislation. We look forward to such a debate and hope that it leads to a product that frees States, local school districts, teachers, parents, and students from the outdated and unwarranted mandates of NCLB.

【(1) ensuring that high-quality academic assessments, accountability systems, teacher preparation and training, curriculum, and instructional materials are aligned with challenging State academic standards so that students, teachers, parents, and administrators can measure progress against common expectations for student academic achievement;

【(2) meeting the educational needs of low-achieving children in our Nation’s highest-poverty schools, limited English proficient children, migratory children, children with disabilities, Indian children, neglected or delinquent children, and young children in need of reading assistance;

【(3) closing the achievement gap between high- and low-performing children, especially the achievement gaps between minority and nonminority students, and between disadvantaged children and their more advantaged peers;

【(4) holding schools, local educational agencies, and States accountable for improving the academic achievement of all students, and identifying and turning around low-performing schools that have failed to provide a high-quality education to their students, while providing alternatives to students in such schools to enable the students to receive a high-quality education;

【(5) distributing and targeting resources sufficiently to make a difference to local educational agencies and schools where needs are greatest;

【(6) improving and strengthening accountability, teaching, and learning by using State assessment systems designed to ensure that students are meeting challenging State academic achievement and content standards and increasing achievement overall, but especially for the disadvantaged;

【(7) providing greater decisionmaking authority and flexibility to schools and teachers in exchange for greater responsibility for student performance;

【(8) providing children an enriched and accelerated educational program, including the use of schoolwide programs or additional services that increase the amount and quality of instructional time;

【(9) promoting schoolwide reform and ensuring the access of children to effective, scientifically based instructional strategies and challenging academic content;

【(10) significantly elevating the quality of instruction by providing staff in participating schools with substantial opportunities for professional development;

【(11) coordinating services under all parts of this title with each other, with other educational services, and, to the extent

feasible, with other agencies providing services to youth, children, and families; and

[(12) affording parents substantial and meaningful opportunities to participate in the education of their children.]

(2) supporting high-quality teaching to continuously improve instruction and encourage new models of teaching and learning;

(3) focusing on increasing student achievement and closing achievement gaps;

(4) providing additional resources and supports to meet the needs of disadvantaged students, including children from low-income families and those attending high-poverty schools, English learners, migratory children, children with disabilities, Indian children, and neglected or delinquent children;

(5) providing young children with greater access to high-quality early learning experiences to ensure they enter school ready to learn;

(6) removing barriers to, and encouraging State and local innovation and leadership in, education based on the evaluation of success and continuous improvement;

(7) removing barriers and promoting integration across all levels of education, and across Federal education programs;

(8) streamlining Federal requirements to reduce burdens on States, local educational agencies, schools, and educators; and

[(e) SPECIAL RULE.—Notwithstanding any other provision of this section, the amount of funds reserved by the State educational agency under subsection (a) in any fiscal year shall not decrease the amount of funds each local educational agency receives under subpart 2 below the amount received by such local educational agency under such subpart for the preceding fiscal year.

[(f) REPORTING.—The State educational agency shall make publicly available a list of those schools that have received funds or services pursuant to subsection (b) and the percentage of students from each school from families with incomes below the poverty line.

[(g) ASSISTANCE FOR LOCAL SCHOOL IMPROVEMENT.—

[(1) PROGRAM AUTHORIZED.—The Secretary shall award grants to States to enable the States to provide subgrants to local educational agencies for the purpose of providing assistance for school improvement consistent with section 1116.

[(2) STATE ALLOTMENTS.—Such grants shall be allotted among States, the Bureau of Indian Affairs, and the outlying areas, in proportion to the funds received by the States, the Bureau of Indian Affairs, and the outlying areas, respectively, for the fiscal year under parts A, C, and D of this title. The Secretary shall expeditiously allot a portion of such funds to States for the purpose of assisting local educational agencies and schools that were in school improvement status on the date preceding the date of enactment of the No Child Left Behind Act of 2001.

[(3) REALLOCATIONS.—If a State does not receive funds under this subsection, the Secretary shall reallocate such funds to other States in the same proportion funds are allocated under paragraph (2).

[(4) STATE APPLICATIONS.—Each State educational agency that desires to receive funds under this subsection shall submit an application to the Secretary at such time, and containing such information, as the Secretary shall reasonably require, except that such requirement shall be waived if a State educational agency submitted such information as part of its State plan under this part. Each State application shall describe how the State educational agency will allocate such funds in order to assist the State educational agency and local educational agencies in complying with school improvement, corrective action, and restructuring requirements of section 1116.

[(5) LOCAL EDUCATIONAL AGENCY GRANTS.—A grant to a local educational agency under this subsection shall be—

[(A) of sufficient size and scope to support the activities required under sections 1116 and 1117, but not less than \$50,000 and not more than \$500,000 for each participating school;

[(B) integrated with other funds awarded by the State under this Act; and

[(C) renewable for two additional 1-year periods if schools are meeting the goals in their school improvement plans developed under section 1116.

[(6) PRIORITY.—The State, in awarding such grants, shall give priority to local educational agencies with the lowest-achieving schools that demonstrate—

[(A) the greatest need for such funds; and

[(B) the strongest commitment to ensuring that such funds are used to provide adequate resources to enable the lowest-achieving schools to meet the goals under school and local educational agency improvement, corrective action, and restructuring plans under section 1116.

[(7) ALLOCATION.—A State educational agency that receives a grant under this subsection shall allocate at least 95 percent of the grant funds directly to local educational agencies for schools identified for school improvement, corrective action, or restructuring to carry out activities under section 1116(b), or may, with the approval of the local educational agency, directly provide for these activities or arrange for their provision through other entities such as school support teams or educational service agencies.

[(8) ADMINISTRATIVE COSTS.—A State educational agency that receives a grant award under this subsection may reserve not more than 5 percent of such grant funds for administration, evaluation, and technical assistance expenses.

[(9) LOCAL AWARDS.—Each local educational agency that applies for assistance under this subsection shall describe how it will provide the lowest-achieving schools the resources necessary to meet goals under school and local educational agency improvement, corrective action, and restructuring plans under section 1116.]

[SEC. 1004]SEC. 1002. STATE ADMINISTRATION AND STATE ACCOUNTABILITY AND SUPPORT.

(a) [IN GENERAL.—Except as provided in subsection (b)]*STATE ADMINISTRATION.*—

(1) *IN GENERAL.*—*Except as provided in paragraph (2), to carry out administrative duties assigned under parts A, C, and D of this title, each State may reserve the greater of—*

[(1)](A) 1 percent of the amounts received under such parts; or

[(2)](B) \$400,000 (\$50,000 in the case of each outlying area).

[(b)](2) *EXCEPTION.*—*If the sum of the amounts appropriated for parts A, C, and D of this title is equal to or greater than \$14,000,000,000, then the reservation described in [subsection (a)(1)]paragraph (1)(A) shall not exceed 1 percent of the amount the State would receive, if \$14,000,000,000 were allocated among the States for parts A, C, and D of this title.*

(b) *ACCOUNTABILITY AND SUPPORT.*—

(1) *IN GENERAL.*—*Each State may reserve not more than 6 percent of the amount the State receives under subpart 2 of part A to carry out paragraph (2) and to carry out the State and local educational agency responsibilities under section 1116, which may include carrying out a statewide system of technical assistance and support for local educational agencies and identifying and disseminating evidence-based practices.*

(2) *USES.*—

(A) *IN GENERAL.*—*Of the amount reserved under paragraph (1) for any fiscal year, the State educational agency shall use not less than 90 percent of that amount by allocating such sums directly to local educational agencies for activities required under section 1116.*

(B) *OPTION.*—*Notwithstanding subparagraph (A), the State educational agency may, with the approval of the local educational agency, directly provide for the activities required under section 1116 or arrange for their provision through other entities such as educational service agencies and external providers with expertise in using strategies based on scientifically valid research to improve teaching, learning, and schools.*

(3) *PRIORITY.*—*The State educational agency, in allocating funds to local educational agencies under this subsection, shall give priority to local educational agencies that—*

(A) *serve the lowest-performing schools, including schools identified as focus schools or priority schools under subsection (c) or (d) of section 1116;*

(B) demonstrate the greatest need for such funds; and
 (C) demonstrate the strongest commitment to use the funds to enable the lowest-achieving schools to improve student achievement and outcomes through the use of evidence-based practices that are consistent with the evidence standards described in section 5203(e).

(4) *UNUSED FUNDS.*—If, after consultation with local educational agencies, the State educational agency determines the amount of funds reserved to carry out this subsection is greater than the amount needed to provide the assistance described in this subsection, the State educational agency shall allocate the excess amount to local educational agencies in accordance with—

(A) the relative allocations the State educational agency made to those agencies for that fiscal year under subpart 2 of part A; or

(B) section 1126(c).

(5) *SPECIAL RULE.*—Notwithstanding any other provision of this subsection, the amount of funds reserved by the State educational agency under this subsection in any fiscal year shall not decrease the amount of funds each local educational agency receives under subpart 2 of part A below the amount received by such local educational agency under such subpart for the preceding fiscal year.

(6) *REPORTING.*—Each State educational agency shall make publicly available a list of those schools that have received funds or services pursuant to this subsection and the percentage of students from each such school from families with incomes below the poverty line.

PART A—IMPROVING BASIC PROGRAMS OPERATED BY LOCAL EDUCATIONAL AGENCIES

Subpart 1—Basic Program Requirements

[SEC. 1111. [20 U.S.C. 6311] STATE PLANS.

[(a) PLANS REQUIRED.—

[(1) IN GENERAL.—For any State desiring to receive a grant under this part, the State educational agency shall submit to the Secretary a plan, developed by the State educational agency, in consultation with local educational agencies, teachers, principals, pupil services personnel, administrators (including administrators of programs described in other parts of this title), other staff, and parents, that satisfies the requirements of this section and that is coordinated with other programs under this Act, the Individuals with Disabilities Education Act, the Carl D. Perkins Career and Technical Education Act of 2006, the Head Start Act, the Adult Education and Family Literacy Act, and the McKinney-Vento Homeless Assistance Act.

[(2) CONSOLIDATED PLAN.—A State plan submitted under paragraph (1) may be submitted as part of a consolidated plan under section 9302.

[(b) ACADEMIC STANDARDS, ACADEMIC ASSESSMENTS, AND ACCOUNTABILITY.—

[(1) CHALLENGING ACADEMIC STANDARDS.—

[(A) IN GENERAL.—Each State plan shall demonstrate that the State has adopted challenging academic content standards and challenging student academic achievement standards that will be used by the State, its local educational agencies, and its schools to carry out this part, except that a State shall not be required to submit such standards to the Secretary.

[(B) SAME STANDARDS.—The academic standards required by subparagraph (A) shall be the same academic standards that the State applies to all schools and children in the State.

[(C) SUBJECTS.—The State shall have such academic standards for all public elementary school and secondary school children, including children served under this part, in subjects determined by the State, but including at least mathematics, reading or language arts, and (beginning in the 2005–2006 school year) science, which shall include the same knowledge, skills, and levels of achievement expected of all children.

[(D) CHALLENGING ACADEMIC STANDARDS.—Standards under this paragraph shall include—

[(i) challenging academic content standards in academic subjects that—

[(I) specify what children are expected to know and be able to do;

[(II) contain coherent and rigorous content; and

[(III) encourage the teaching of advanced skills; and

[(ii) challenging student academic achievement standards that—

[(I) are aligned with the State’s academic content standards;

[(II) describe two levels of high achievement (proficient and advanced) that determine how well children are mastering the material in the State academic content standards; and

[(III) describe a third level of achievement (basic) to provide complete information about the progress of the lower-achieving children toward mastering the proficient and advanced levels of achievement.

[(E) INFORMATION.—For the subjects in which students will be served under this part, but for which a State is not required by subparagraphs (A), (B), and (C) to develop, and has not otherwise developed, such academic standards, the State plan shall describe a strategy for ensuring that students are taught the same knowledge and skills in such subjects and held to the same expectations as are all children.

[(F) EXISTING STANDARDS.—Nothing in this part shall prohibit a State from revising, consistent with this section,

any standard adopted under this part before or after the date of enactment of the No Child Left Behind Act of 2001.

[(2) ACCOUNTABILITY.—

[(A) IN GENERAL.—Each State plan shall demonstrate that the State has developed and is implementing a single, statewide State accountability system that will be effective in ensuring that all local educational agencies, public elementary schools, and public secondary schools make adequate yearly progress as defined under this paragraph. Each State accountability system shall—

[(i) be based on the academic standards and academic assessments adopted under paragraphs (1) and (3), and other academic indicators consistent with subparagraph (C)(vi) and (vii), and shall take into account the achievement of all public elementary school and secondary school students;

[(ii) be the same accountability system the State uses for all public elementary schools and secondary schools or all local educational agencies in the State, except that public elementary schools, secondary schools, and local educational agencies not participating under this part are not subject to the requirements of section 1116; and

[(iii) include sanctions and rewards, such as bonuses and recognition, the State will use to hold local educational agencies and public elementary schools and secondary schools accountable for student achievement and for ensuring that they make adequate yearly progress in accordance with the State's definition under subparagraphs (B) and (C).

[(B) ADEQUATE YEARLY PROGRESS.—Each State plan shall demonstrate, based on academic assessments described in paragraph (3), and in accordance with this paragraph, what constitutes adequate yearly progress of the State, and of all public elementary schools, secondary schools, and local educational agencies in the State, toward enabling all public elementary school and secondary school students to meet the State's student academic achievement standards, while working toward the goal of narrowing the achievement gaps in the State, local educational agencies, and schools.

[(C) DEFINITION.—"Adequate yearly progress" shall be defined by the State in a manner that—

[(i) applies the same high standards of academic achievement to all public elementary school and secondary school students in the State;

[(ii) is statistically valid and reliable;

[(iii) results in continuous and substantial academic improvement for all students;

[(iv) measures the progress of public elementary schools, secondary schools and local educational agencies and the State based primarily on the academic assessments described in paragraph (3);

[(v) includes separate measurable annual objectives for continuous and substantial improvement for each of the following:

[(I) The achievement of all public elementary school and secondary school students.

[(II) The achievement of—

[(aa) economically disadvantaged students;

[(bb) students from major racial and ethnic groups;

[(cc) students with disabilities; and

[(dd) students with limited English proficiency;

except that disaggregation of data under subclause (II) shall not be required in a case in which the number of students in a category is insufficient to yield statistically reliable information or the results would reveal personally identifiable information about an individual student;

[(vi) in accordance with subparagraph (D), includes graduation rates for public secondary school students (defined as the percentage of students who graduate from secondary school with a regular diploma in the standard number of years) and at least one other academic indicator, as determined by the State for all public elementary school students; and

[(vii) in accordance with subparagraph (D), at the State's discretion, may also include other academic indicators, as determined by the State for all public school students, measured separately for each group described in clause (v), such as achievement on additional State or locally administered assessments, decreases in grade-to-grade retention rates, attendance rates, and changes in the percentages of students completing gifted and talented, advanced placement, and college preparatory courses.

[(D) REQUIREMENTS FOR OTHER INDICATORS.—In carrying out subparagraph (C)(vi) and (vii), the State—

[(i) shall ensure that the indicators described in those provisions are valid and reliable, and are consistent with relevant, nationally recognized professional and technical standards, if any; and

[(ii) except as provided in subparagraph (I)(i), may not use those indicators to reduce the number of, or change, the schools that would otherwise be subject to school improvement, corrective action, or restructuring under section 1116 if those additional indicators were not used, but may use them to identify additional schools for school improvement or in need of corrective action or restructuring.

[(E) STARTING POINT.—Each State, using data for the 2001–2002 school year, shall establish the starting point for measuring, under subparagraphs (G) and (H), the percentage of students meeting or exceeding the State's proficient level of academic achievement on the State assess-

ments under paragraph (3) and pursuant to the timeline described in subparagraph (F). The starting point shall be, at a minimum, based on the higher of the percentage of students at the proficient level who are in—

[(i) the State's lowest achieving group of students described in subparagraph (C)(v)(II); or

[(ii) the school at the 20th percentile in the State, based on enrollment, among all schools ranked by the percentage of students at the proficient level.

[(F) TIMELINE.—Each State shall establish a timeline for adequate yearly progress. The timeline shall ensure that not later than 12 years after the end of the 2001–2002 school year, all students in each group described in subparagraph (C)(v) will meet or exceed the State's proficient level of academic achievement on the State assessments under paragraph (3).

[(G) MEASURABLE OBJECTIVES.—Each State shall establish statewide annual measurable objectives, pursuant to subparagraph (C)(v), for meeting the requirements of this paragraph, and which—

[(i) shall be set separately for the assessments of mathematics and reading or language arts under subsection (a)(3);

[(ii) shall be the same for all schools and local educational agencies in the State;

[(iii) shall identify a single minimum percentage of students who are required to meet or exceed the proficient level on the academic assessments that applies separately to each group of students described in subparagraph (C)(v);

[(iv) shall ensure that all students will meet or exceed the State's proficient level of academic achievement on the State assessments within the State's timeline under subparagraph (F); and

[(v) may be the same for more than 1 year, subject to the requirements of subparagraph (H).

[(H) INTERMEDIATE GOALS FOR ANNUAL YEARLY PROGRESS.—Each State shall establish intermediate goals for meeting the requirements, including the measurable objectives in subparagraph (G), of this paragraph and that shall—

[(i) increase in equal increments over the period covered by the State's timeline under subparagraph (F);

[(ii) provide for the first increase to occur in not more than 2 years; and

[(iii) provide for each following increase to occur in not more than 3 years.

[(I) ANNUAL IMPROVEMENT FOR SCHOOLS.—Each year, for a school to make adequate yearly progress under this paragraph—

[(i) each group of students described in subparagraph (C)(v) must meet or exceed the objectives set by the State under subparagraph (G), except that if any group described in subparagraph (C)(v) does not meet

those objectives in any particular year, the school shall be considered to have made adequate yearly progress if the percentage of students in that group who did not meet or exceed the proficient level of academic achievement on the State assessments under paragraph (3) for that year decreased by 10 percent of that percentage from the preceding school year and that group made progress on one or more of the academic indicators described in subparagraph (C)(vi) or (vii); and

[(ii) not less than 95 percent of each group of students described in subparagraph (C)(v) who are enrolled in the school are required to take the assessments, consistent with paragraph (3)(C)(xi) and with accommodations, guidelines, and alternative assessments provided in the same manner as those provided under section 612(a)(16)(A) of the Individuals with Disabilities Education Act and paragraph (3), on which adequate yearly progress is based (except that the 95 percent requirement described in this clause shall not apply in a case in which the number of students in a category is insufficient to yield statistically reliable information or the results would reveal personally identifiable information about an individual student).

[(J) UNIFORM AVERAGING PROCEDURE.—For the purpose of determining whether schools are making adequate yearly progress, the State may establish a uniform procedure for averaging data which includes one or more of the following:

[(i) The State may average data from the school year for which the determination is made with data from one or two school years immediately preceding that school year.

[(ii) Until the assessments described in paragraph (3) are administered in such manner and time to allow for the implementation of the uniform procedure for averaging data described in clause (i), the State may use the academic assessments that were required under paragraph (3) as that paragraph was in effect on the day preceding the date of enactment of the No Child Left Behind Act of 2001, provided that nothing in this clause shall be construed to undermine or delay the determination of adequate yearly progress, the requirements of section 1116, or the implementation of assessments under this section.

[(iii) The State may use data across grades in a school.

[(K) ACCOUNTABILITY FOR CHARTER SCHOOLS.—The accountability provisions under this Act shall be overseen for charter schools in accordance with State charter school law.

[(3) ACADEMIC ASSESSMENTS.—

[(A) IN GENERAL.—Each State plan shall demonstrate that the State educational agency, in consultation with

local educational agencies, has implemented a set of high-quality, yearly student academic assessments that include, at a minimum, academic assessments in mathematics, reading or language arts, and science that will be used as the primary means of determining the yearly performance of the State and of each local educational agency and school in the State in enabling all children to meet the State's challenging student academic achievement standards, except that no State shall be required to meet the requirements of this part relating to science assessments until the beginning of the 2007–2008 school year.

[(B) USE OF ASSESSMENTS.—Each State educational agency may incorporate the data from the assessments under this paragraph into a State-developed longitudinal data system that links student test scores, length of enrollment, and graduation records over time.

[(C) REQUIREMENTS.—Such assessments shall—

[(i) be the same academic assessments used to measure the achievement of all children;

[(ii) be aligned with the State's challenging academic content and student academic achievement standards, and provide coherent information about student attainment of such standards;

[(iii) be used for purposes for which such assessments are valid and reliable, and be consistent with relevant, nationally recognized professional and technical standards;

[(iv) be used only if the State educational agency provides to the Secretary evidence from the test publisher or other relevant sources that the assessments used are of adequate technical quality for each purpose required under this Act and are consistent with the requirements of this section, and such evidence is made public by the Secretary upon request;

[(v)(I) except as otherwise provided for grades 3 through 8 under clause vii, measure the proficiency of students in, at a minimum, mathematics and reading or language arts, and be administered not less than once during—

[(aa) grades 3 through 5;

[(bb) grades 6 through 9; and

[(cc) grades 10 through 12;

[(II) beginning not later than school year 2007–2008, measure the proficiency of all students in science and be administered not less than one time during—

[(aa) grades 3 through 5;

[(bb) grades 6 through 9; and

[(cc) grades 10 through 12;

[(vi) involve multiple up-to-date measures of student academic achievement, including measures that assess higher-order thinking skills and understanding;

[(vii) beginning not later than school year 2005–2006, measure the achievement of students against the challenging State academic content and student

academic achievement standards in each of grades 3 through 8 in, at a minimum, mathematics, and reading or language arts, except that the Secretary may provide the State 1 additional year if the State demonstrates that exceptional or uncontrollable circumstances, such as a natural disaster or a precipitous and unforeseen decline in the financial resources of the State, prevented full implementation of the academic assessments by that deadline and that the State will complete implementation within the additional 1-year period;

[(viii) at the discretion of the State, measure the proficiency of students in academic subjects not described in clauses (v), (vi), (vii) in which the State has adopted challenging academic content and academic achievement standards;

[(ix) provide for—

[(I) the participation in such assessments of all students;

[(II) the reasonable adaptations and accommodations for students with disabilities (as defined under section 602(3) of the Individuals with Disabilities Education Act) necessary to measure the academic achievement of such students relative to State academic content and State student academic achievement standards; and

[(III) the inclusion of limited English proficient students, who shall be assessed in a valid and reliable manner and provided reasonable accommodations on assessments administered to such students under this paragraph, including, to the extent practicable, assessments in the language and form most likely to yield accurate data on what such students know and can do in academic content areas, until such students have achieved English language proficiency as determined under paragraph (7);

[(x) notwithstanding subclause (III), the academic assessment (using tests written in English) of reading or language arts of any student who has attended school in the United States (not including Puerto Rico) for three or more consecutive school years, except that if the local educational agency determines, on a case-by-case individual basis, that academic assessments in another language or form would likely yield more accurate and reliable information on what such student knows and can do, the local educational agency may make a determination to assess such student in the appropriate language other than English for a period that does not exceed two additional consecutive years, provided that such student has not yet reached a level of English language proficiency sufficient to yield valid and reliable information on what such student knows and can do on tests (written in English) of reading or language arts;

[(xi) include students who have attended schools in a local educational agency for a full academic year but have not attended a single school for a full academic year, except that the performance of students who have attended more than 1 school in the local educational agency in any academic year shall be used only in determining the progress of the local educational agency;

[(xii) produce individual student interpretive, descriptive, and diagnostic reports, consistent with clause (iii) that allow parents, teachers, and principals to understand and address the specific academic needs of students, and include information regarding achievement on academic assessments aligned with State academic achievement standards, and that are provided to parents, teachers, and principals, as soon as is practicably possible after the assessment is given, in an understandable and uniform format, and to the extent practicable, in a language that parents can understand;

[(xiii) enable results to be disaggregated within each State, local educational agency, and school by gender, by each major racial and ethnic group, by English proficiency status, by migrant status, by students with disabilities as compared to nondisabled students, and by economically disadvantaged students as compared to students who are not economically disadvantaged, except that, in the case of a local educational agency or a school, such disaggregation shall not be required in a case in which the number of students in a category is insufficient to yield statistically reliable information or the results would reveal personally identifiable information about an individual student;

[(xiv) be consistent with widely accepted professional testing standards, objectively measure academic achievement, knowledge, and skills, and be tests that do not evaluate or assess personal or family beliefs and attitudes, or publicly disclose personally identifiable information; and

[(xv) enable itemized score analyses to be produced and reported, consistent with clause (iii), to local educational agencies and schools, so that parents, teachers, principals, and administrators can interpret and address the specific academic needs of students as indicated by the students' achievement on assessment items.

[(D) DEFERRAL.—A State may defer the commencement, or suspend the administration, but not cease the development, of the assessments described in this paragraph, that were not required prior to the date of enactment of the No Child Left Behind Act of 2001, for 1 year for each year for which the amount appropriated for grants under section 6113(a)(2) is less than—

[(i) \$370,000,000 for fiscal year 2002;

- [(ii) \$380,000,000 for fiscal year 2003;
- [(iii) \$390,000,000 for fiscal year 2004; and
- [(iv) \$400,000,000 for fiscal years 2005 through 2007.

[(4) SPECIAL RULE.—Academic assessment measures in addition to those in paragraph (3) that do not meet the requirements of such paragraph may be included in the assessment under paragraph (3) as additional measures, but may not be used in lieu of the academic assessments required under paragraph (3). Such additional assessment measures may not be used to reduce the number of or change, the schools that would otherwise be subject to school improvement, corrective action, or restructuring under section 1116 if such additional indicators were not used, but may be used to identify additional schools for school improvement or in need of corrective action or restructuring except as provided in paragraph (2)(I)(i).

[(5) STATE AUTHORITY.—If a State educational agency provides evidence, which is satisfactory to the Secretary, that neither the State educational agency nor any other State government official, agency, or entity has sufficient authority, under State law, to adopt curriculum content and student academic achievement standards, and academic assessments aligned with such academic standards, which will be applicable to all students enrolled in the State's public elementary schools and secondary schools, then the State educational agency may meet the requirements of this subsection by—

[(A) adopting academic standards and academic assessments that meet the requirements of this subsection, on a statewide basis, and limiting their applicability to students served under this part; or

[(B) adopting and implementing policies that ensure that each local educational agency in the State that receives grants under this part will adopt curriculum content and student academic achievement standards, and academic assessments aligned with such standards, which—

[(i) meet all of the criteria in this subsection and any regulations regarding such standards and assessments that the Secretary may publish; and

[(ii) are applicable to all students served by each such local educational agency.

[(6) LANGUAGE ASSESSMENTS.—Each State plan shall identify the languages other than English that are present in the participating student population and indicate the languages for which yearly student academic assessments are not available and are needed. The State shall make every effort to develop such assessments and may request assistance from the Secretary if linguistically accessible academic assessment measures are needed. Upon request, the Secretary shall assist with the identification of appropriate academic assessment measures in the needed languages, but shall not mandate a specific academic assessment or mode of instruction.

[(7) ACADEMIC ASSESSMENTS OF ENGLISH LANGUAGE PROFICIENCY.—Each State plan shall demonstrate that local educational agencies in the State will, beginning not later than school year 2002–2003, provide for an annual assessment of

English proficiency (measuring students' oral language, reading, and writing skills in English) of all students with limited English proficiency in the schools served by the State educational agency, except that the Secretary may provide the State 1 additional year if the State demonstrates that exceptional or uncontrollable circumstances, such as a natural disaster or a precipitous and unforeseen decline in the financial resources of the State, prevented full implementation of this paragraph by that deadline and that the State will complete implementation within the additional 1-year period.

[(8) REQUIREMENT.—Each State plan shall describe—

[(A) how the State educational agency will assist each local educational agency and school affected by the State plan to develop the capacity to comply with each of the requirements of sections 1112(c)(1)(D), 1114(b), and 1115(c) that is applicable to such agency or school;

[(B) how the State educational agency will assist each local educational agency and school affected by the State plan to provide additional educational assistance to individual students assessed as needing help to achieve the State's challenging academic achievement standards;

[(C) the specific steps the State educational agency will take to ensure that both schoolwide programs and targeted assistance schools provide instruction by highly qualified instructional staff as required by sections 1114(b)(1)(C) and 1115(c)(1)(E), including steps that the State educational agency will take to ensure that poor and minority children are not taught at higher rates than other children by inexperienced, unqualified, or out-of-field teachers, and the measures that the State educational agency will use to evaluate and publicly report the progress of the State educational agency with respect to such steps;

[(D) an assurance that the State educational agency will assist local educational agencies in developing or identifying high-quality effective curricula aligned with State academic achievement standards and how the State educational agency will disseminate such curricula to each local educational agency and school within the State; and

[(E) such other factors the State educational agency determines appropriate to provide students an opportunity to achieve the knowledge and skills described in the challenging academic content standards adopted by the State.

[(9) FACTORS AFFECTING STUDENT ACHIEVEMENT.—Each State plan shall include an assurance that the State educational agency will coordinate and collaborate, to the extent feasible and necessary as determined by the State educational agency, with agencies providing services to children, youth, and families, with respect to local educational agencies within the State that are identified under section 1116 and that request assistance with addressing major factors that have significantly affected the academic achievement of students in the local educational agency or schools served by such agency.

[(10) USE OF ACADEMIC ASSESSMENT RESULTS TO IMPROVE STUDENT ACADEMIC ACHIEVEMENT.—Each State plan shall de-

scribe how the State educational agency will ensure that the results of the State assessments described in paragraph (3)—

[(A) will be promptly provided to local educational agencies, schools, and teachers in a manner that is clear and easy to understand, but not later than before the beginning of the next school year; and

[(B) be used by those local educational agencies, schools, and teachers to improve the educational achievement of individual students.

[(c) OTHER PROVISIONS TO SUPPORT TEACHING AND LEARNING.—Each State plan shall contain assurances that—

[(1) the State educational agency will meet the requirements of subsection (h)(1) and, beginning with the 2002–2003 school year, will produce the annual State report cards described in such subsection, except that the Secretary may provide the State educational agency 1 additional year if the State educational agency demonstrates that exceptional or uncontrollable circumstances, such as a natural disaster or a precipitous and unforeseen decline in the financial resources of the State, prevented full implementation of this paragraph by that deadline and that the State will complete implementation within the additional 1-year period;

[(2) the State will, beginning in school year 2002–2003, participate in biennial State academic assessments of 4th and 8th grade reading and mathematics under the National Assessment of Educational Progress carried out under section 303(b)(2) of the National Assessment of Educational Progress Authorization Act if the Secretary pays the costs of administering such assessments;

[(3) the State educational agency, in consultation with the Governor, will include, as a component of the State plan, a plan to carry out the responsibilities of the State under sections 1116 and 1117, including carrying out the State educational agency's statewide system of technical assistance and support for local educational agencies;

[(4) the State educational agency will work with other agencies, including educational service agencies or other local consortia, and institutions to provide technical assistance to local educational agencies and schools, including technical assistance in providing professional development under section 1119, technical assistance under section 1117, and technical assistance relating to parental involvement under section 1118;

[(5)(A) where educational service agencies exist, the State educational agency will consider providing professional development and technical assistance through such agencies; and

[(B) where educational service agencies do not exist, the State educational agency will consider providing professional development and technical assistance through other cooperative agreements such as through a consortium of local educational agencies;

[(6) the State educational agency will notify local educational agencies and the public of the content and student academic achievement standards and academic assessments developed under this section, and of the authority to operate schoolwide programs, and will fulfill the State educational

agency's responsibilities regarding local educational agency improvement and school improvement under section 1116, including such corrective actions as are necessary;

[(7) the State educational agency will provide the least restrictive and burdensome regulations for local educational agencies and individual schools participating in a program assisted under this part;

[(8) the State educational agency will inform the Secretary and the public of how Federal laws, if at all, hinder the ability of States to hold local educational agencies and schools accountable for student academic achievement;

[(9) the State educational agency will encourage schools to consolidate funds from other Federal, State, and local sources for schoolwide reform in schoolwide programs under section 1114;

academic growth, as described in subclause (V);

(ii) includes statewide assessments in science, not less than once during each of the grade spans of grades 3 through 5, 6 through 9, and 10 through 12, that—

(I) assess the student's academic achievement based on the State's student academic achievement standards in science in order to measure—

(ii) be used only for purposes for which such assessments are valid and reliable, and be consistent with relevant, nationally recognized professional and technical standards;

(vii) notwithstanding clause (v)(II), include the academic assessment (using tests written in English) of reading or language arts of any student who has attended school in the United States (not including Puerto Rico) for 3 or more consecutive school years, except that, if the local educational agency determines, on a case-by-case individual basis, that academic assessments in another language or form would likely yield more accurate and reliable information on what such student knows and can do, the local educational agency may make a determination to assess such student in the appropriate language other than English for a period that does not exceed 2 additional consecutive years, if such student has not yet reached a level of English language proficiency sufficient to yield valid and reliable information on what such student knows

and can do on tests (written in English) of reading or language arts;

(viii) include students who have attended schools in a local educational agency for a full academic year but have not attended a single school for a full academic year, except the performance of students who have attended more than 1 school in the local educational agency in any academic year shall be used only in determining the progress of the local educational agency;

(ix) produce individual student interpretive, descriptive, and diagnostic reports that—

(I) allow parents, teachers, and principals to understand and address the specific academic needs of students and include information regarding achievement on the academic assessments aligned with State academic achievement standards; and

(II) are provided to parents, teachers, and principals as soon as is practicably possible after the assessment is given, in an understandable and uniform format, and to the extent practicable, in a language that parents can understand;

(x) enable results to be disaggregated within the State, local educational agency, and school by gender, each major racial and ethnic group, English proficiency status, migrant status, status as a student with a disability, and economically disadvantaged status, except that disaggregation shall not be required for any subgroup that would include 15 or less students, so as to not reveal personally identifiable information about an individual student;

(xi) be consistent with widely accepted professional testing standards and objectively measure academic achievement, knowledge, and skills;

(xii) enable itemized score analyses to be produced and reported, consistent with clause (ii), to local educational agencies and schools, so that parents, teachers, principals, and administrators can interpret and address the specific academic needs of students as indicated by the students' achievement on assessment items;

(xiii) produce student achievement and other student data that can be used to inform determinations of individual principal and teacher effectiveness for purposes of evaluation and for determining the needs of principals and teachers for professional development and support;

(xiv) be administered to not less than 95 percent of all students, and not less than 95 percent of each subgroup of students described in clause (x), who are enrolled in the school; and

(xv) in the case of digital assessments or any digital assessment content that is adopted, procured, purchased, or developed for the assessments, incorporate

the principles of universal design, as defined in section 3 of the Assistive Technology Act of 1998 (29 U.S.C. 3002) and be interoperable and accessible for all students, including students who are children with disabilities.

(C) *LANGUAGES OF ASSESSMENTS.—The State shall identify the languages other than English that are present in the participating student population in the State and indicate, in the State’s plan under subsection (b), the languages for which yearly student academic assessments included in the State’s accountability system under paragraph (3) are not available and are needed. The State shall make every effort to develop assessments in such languages and may request assistance from the Secretary if linguistically accessible academic assessments are needed. Upon request, the Secretary shall assist with the identification of appropriate academic assessments in such languages, but shall not mandate a specific academic assessment or mode of instruction.*

education program teams (as defined in section 614(d)(1)(B) of the Individuals with Disabilities Education Act) to apply in determining, on a subject-by-subject basis, when a child's significant cognitive disability justifies assessment based on alternate academic achievement standards;

(iii) ensures that parents of the students whom the State plans to assess using alternate assessments are involved in the decision that their child's academic achievement will be measured against alternate academic achievement standards, consistent with section 614(d)(1)(A)(i)(VI)(bb) of the Individuals with Disabilities Education Act, and are informed whether participation in such assessment may preclude the student from completing the requirements for a regular secondary school diploma, as determined by the State;

(vi) develops, disseminates information about, makes available, and promotes the use of reasonable adaptations and valid and reliable accommodations to increase the number of students with the most significant cognitive disabilities participating in grade-level academic instruction and assessments aligned with grade-level academic standards, and promotes the use of appropriate accommodations to increase the number of students with the most significant cognitive disabilities who are tested against grade-level academic achievement standards;

(vii) takes steps to ensure regular and special education teachers and other appropriate staff know how to administer assessments, including how to make appropriate use of reasonable adaptations and valid and reliable accommodations for such assessments, for students with the most significant cognitive disabilities; and

(viii) requires separate determinations about whether a student should be assessed using an alternate assessment for each subject assessed.

(F) **COMPUTER ADAPTIVE ASSESSMENT.**—A State may develop and administer computer adaptive assessments as the assessments required under subparagraph (A). If a State develops and administers a computer adaptive assess-

(III) A category consisting of students whose proficiency in a subject is below grade level and who are not achieving sufficient academic growth, as described in clause (iii).

(iii) *SUFFICIENT ACADEMIC GROWTH.*—For purposes of this section, sufficient academic growth for a student means—

(II) a rate of academic growth, based on a comparison of the student's performance on the most recent State academic assessment with the preceding State academic assessment or combina-

(iv) *ADDITIONAL MEASURES AND PERFORMANCE TARGETS.*—A State may develop other measures and performance targets to provide school personnel, parents, and community members with information about the effectiveness of schools in closing performance gaps among subgroups and bringing all students to proficiency, except that any such measure shall not classify individuals who have not attained a high school diploma but have earned a recognized equivalent of such diploma as graduating from high school.

(D) *SUBGROUPS OF STUDENTS.*—The subgroups described in this subparagraph shall be obtained by disaggregating students enrolled in a school by each major racial and ethnic group, English proficiency status, status as a child with a disability, and economically disadvantaged status, except that a school shall not be required to disaggregate for any subgroup that includes 15 or less students if such disaggregation would result in the disclosure of personally identifiable information.

(E) *SUBJECTS COVERED.*—The State shall include in the accountability system the subjects of reading or language arts and mathematics, and may include science and any other subject that the State chooses through its State plan, if the State has adopted academic content standards and student academic achievement standards under paragraph (1)(C) and assessments under subparagraphs (A)(iv) and (B) of paragraph (2) for the subject.

[SEC. 1116. ACADEMIC ASSESSMENT AND LOCAL EDUCATIONAL AGENCY AND SCHOOL IMPROVEMENT.

[(a) LOCAL REVIEW.—

[(1) IN GENERAL.—Each local educational agency receiving funds under this part shall—

[(A) use the State academic assessments and other indicators described in the State plan to review annually the progress of each school served under this part to determine whether the school is making adequate yearly progress as defined in section 1111(b)(2);

[(B) at the local educational agency's discretion, use any academic assessments or any other academic indicators described in the local educational agency's plan under

section 1112(b)(1)(A) and (B) to review annually the progress of each school served under this part to determine whether the school is making adequate yearly progress as defined in section 1111(b)(2), except that the local educational agency may not use such indicators (other than as provided for in section 1111(b)(2)(I)) if the indicators reduce the number or change the schools that would otherwise be subject to school improvement, corrective action, or restructuring under section 1116 if such additional indicators were not used, but may identify additional schools for school improvement or in need of corrective action or restructuring;

[(C) publicize and disseminate the results of the local annual review described in paragraph (1) to parents, teachers, principals, schools, and the community so that the teachers, principals, other staff, and schools can continually refine, in an instructionally useful manner, the program of instruction to help all children served under this part meet the challenging State student academic achievement standards established under section 1111(b)(1); and

[(D) review the effectiveness of the actions and activities the schools are carrying out under this part with respect to parental involvement, professional development, and other activities assisted under this part.

[(2) AVAILABLE RESULTS.—The State educational agency shall ensure that the results of State academic assessments administered in that school year are available to the local educational agency before the beginning of the next school year.

[(b) SCHOOL IMPROVEMENT.—

[(1) GENERAL REQUIREMENTS.—

[(A) IDENTIFICATION.—Subject to subparagraph (C), a local educational agency shall identify for school improvement any elementary school or secondary school served under this part that fails, for 2 consecutive years, to make adequate yearly progress as defined in the State's plan under section 1111(b)(2).

[(B) DEADLINE.—The identification described in subparagraph (A) shall take place before the beginning of the school year following such failure to make adequate yearly progress.

[(D) TARGETED ASSISTANCE SCHOOLS.—To determine if an elementary school or a secondary school that is conducting a targeted assistance program under section 1115 should be identified for school improvement, corrective action, or restructuring under this section, a local educational agency may choose to review the progress of only the students in the school who are served, or are eligible for services, under this part.

[(E) PUBLIC SCHOOL CHOICE.—

[(i) IN GENERAL.—In the case of a school identified for school improvement under this paragraph, the local educational agency shall, not later than the first day of the school year following such identification, provide all students enrolled in the school with the option to transfer to another public school served by the local educational agency, which may include a public charter school, that has not been identified for school improvement under this paragraph, unless such an option is prohibited by State law.

[(B) EVIDENCE.—If the principal of a school proposed for identification under paragraph (1), (5)(A), (7), or (8) believes, or a majority of the parents of the students enrolled in such school believe, that the proposed identification is in error for statistical or other substantive reasons, the principal may provide supporting evidence to the local educational agency, which shall consider that evidence before making a final determination.

[(C) FINAL DETERMINATION.—Not later than 30 days after a local educational agency provides the school with the opportunity to review such school-level data, the local educational agency shall make public a final determination on the status of the school with respect to the identification.

[(3) SCHOOL PLAN.—

[(A) REVISED PLAN.—After the resolution of a review under paragraph (2), each school identified under paragraph (1) for school improvement shall, not later than 3 months after being so identified, develop or revise a school plan, in consultation with parents, school staff, the local educational agency serving the school, and outside experts, for approval by such local educational agency. [(4) **TECHNICAL ASSISTANCE.**—

[(A) **IN GENERAL.**—For each school identified for school improvement under paragraph (1), the local educational agency serving the school shall ensure the provision of technical assistance as the school develops and implements the school plan under paragraph (3) throughout the plan's duration.

[(B) **SPECIFIC ASSISTANCE.**—Such technical assistance—

[(i) shall include assistance in analyzing data from the assessments required under section 1111(b)(3), and other examples of student work, to identify and address problems in instruction, and problems if any, in implementing the parental involvement requirements described in section 1118, the professional development requirements described in section 1119, and the responsibilities of the school and local educational agency under the school plan, and to identify and address solutions to such problems;

[(7) CORRECTIVE ACTION.—

[(A) IN GENERAL.—In this subsection, the term “corrective action” means action, consistent with State law, that—

[(ii) is designed to increase substantially the likelihood that each group of students described in 1111(b)(2)(C) enrolled in the school identified for corrective action will meet or exceed the State's proficient levels of achievement on the State academic assessments described in section 1111(b)(3).

[(B) SYSTEM.—In order to help students served under this part meet challenging State student academic achievement standards, each local educational agency shall implement a system of corrective action in accordance with subparagraphs (C) through (E).

[(IV) Appoint an outside expert to advise the school on its progress toward making adequate yearly progress, based on its school plan under paragraph (3).

[(V) Extend the school year or school day for the school.

[(D) DELAY.—Notwithstanding any other provision of this paragraph, the local educational agency may delay, for a period not to exceed 1 year, implementation of the requirements under paragraph (5), corrective action under this paragraph, or restructuring under paragraph (8) if the school makes adequate yearly progress for 1 year or if its failure to make adequate yearly progress is due to exceptional or uncontrollable circumstances, such as a natural disaster or a precipitous and unforeseen decline in the financial resources of the local educational agency or school. No such period shall be taken into account in determining the number of consecutive years of failure to make adequate yearly progress.

[(E) PUBLICATION AND DISSEMINATION.—The local educational agency shall publish and disseminate information regarding any corrective action the local educational agency takes under this paragraph at a school—

[(12) DURATION.—If any school identified for school improvement, corrective action, or restructuring makes adequate yearly progress for two consecutive school years, the local educational agency shall no longer subject the school to the requirements of school improvement, corrective action, or restructuring or identify the school for school improvement for the succeeding school year.

[(13) SPECIAL RULE.—A local educational agency shall permit a child who transferred to another school under this subsection to remain in that school until the child has completed the highest grade in that school. The obligation of the local educational agency to provide, or to provide for, transportation for the child ends at the end of a school year if the local educational agency determines that the school from which the

child transferred is no longer identified for school improvement or subject to corrective action or restructuring.

[(14) STATE EDUCATIONAL AGENCY RESPONSIBILITIES.—The State educational agency shall—

[(A) make technical assistance under section 1117 available to schools identified for school improvement, corrective action, or restructuring under this subsection consistent with section 1117(a)(2);

[(3) IDENTIFICATION OF LOCAL EDUCATIONAL AGENCY FOR IMPROVEMENT.—A State shall identify for improvement any local educational agency that, for 2 consecutive years, including the period immediately prior to the date of enactment of the No Child Left Behind Act of 2001, failed to make adequate yearly progress as defined in the State's plan under section 1111(b)(2).

[(4) TARGETED ASSISTANCE SCHOOLS.—When reviewing targeted assistance schools served by a local educational agency, a State educational agency may choose to review the progress of only the students in such schools who are served, or are eligible for services, under this part.

[(5) OPPORTUNITY TO REVIEW AND PRESENT EVIDENCE.—

[(A) REVIEW.—Before identifying a local educational agency for improvement under paragraph (3) or corrective action under paragraph (10), a State educational agency shall provide the local educational agency with an opportunity to review the data, including academic assessment data, on which the proposed identification is based.

[(B) EVIDENCE.—If the local educational agency believes that the proposed identification is in error for statistical or other substantive reasons, the agency may provide supporting evidence to the State educational agency, which shall consider the evidence before making a final determination not later than 30 days after the State educational agency provides the local educational agency with the opportunity to review such data under subparagraph (A).

[(6) NOTIFICATION TO PARENTS.—The State educational agency shall promptly provide to the parents (in a format and, to the extent practicable, in a language the parents can understand) of each student enrolled in a school served by a local educational agency identified for improvement, the results of the review under paragraph (1) and, if the agency is identified for improvement, the reasons for that identification and how parents can participate in upgrading the quality of the local educational agency.

[(7) LOCAL EDUCATIONAL AGENCY REVISIONS.—

[(A) PLAN.—Each local educational agency identified under paragraph (3) shall, not later than 3 months after being so identified, develop or revise a local educational agency plan, in consultation with parents, school staff, and others. Such plan shall—

(B) ensure that such school, in collaboration with the local educational agency, develops and implements a locally designed intervention to improve student achievement in each such subgroup.

(2) REPORTING.—Each local educational agency that implements locally designed interventions under paragraph (1) to support schools that have not met performance targets for a subgroup will report to the State educational agency regarding the resources and interventions used to address the achievement of students in the subgroup, and the outcomes of those efforts. The State educational agency shall annually select the interventions with exemplary outcomes, share such interventions and outcomes with the public, and communicate such interventions and outcomes to the Secretary.

PART E—STUDENT NON-DISCRIMINATION

SEC. 4501. SHORT TITLE.

This part may be cited as the “Student Non-Discrimination Act of 2013”.

SEC. 4502. FINDINGS AND PURPOSES.

(a) *FINDINGS.*—Congress finds the following:

(1) Public school students who are lesbian, gay, bisexual, or transgender (referred to in this part as “LGBT”), or are perceived to be LGBT, or who associate with LGBT people, have been and are subjected to pervasive discrimination, including harassment, bullying, intimidation, and violence, and have been deprived of equal educational opportunities, in schools in every part of the Nation.

(2) While discrimination of any kind is harmful to students and to the education system, actions that target students based on sexual orientation or gender identity represent a distinct and severe problem that remains inadequately addressed by current Federal law.

(3) Numerous social science studies demonstrate that discrimination at school has contributed to high rates of absenteeism, academic underachievement, dropping out, and adverse physical and mental health consequences among LGBT youth.

(4) When left unchecked, discrimination in schools based on sexual orientation or gender identity can lead, and has led, to life-threatening violence and to suicide.

(5) Public school students enjoy a variety of constitutional rights, including rights to equal protection, privacy, and free expression, which are infringed when school officials engage in or fail to take prompt and effective action to stop discrimination on the basis of sexual orientation or gender identity.

(6) Provisions of Federal statutory law expressly prohibit discrimination on the basis of race, color, sex, religion, disability, and national origin. The Department of Education and the Department of Justice, as well as numerous courts, have correctly interpreted the prohibitions on sex discrimination to include discrimination based on sex stereotypes and gender identity, even when that sex-based discrimination coincides or overlaps with discrimination based on sexual orientation. However, the absence of express Federal law prohibitions on discrimination on the basis of sexual orientation and gender identity has created unnecessary uncertainty that risks limiting access to legal remedies under Federal law for LGBT students and their parents.

(b) PURPOSES.—The purposes of this part are—

(1) to ensure that all students have access to public education in a safe environment free from discrimination, including harassment, bullying, intimidation, and violence, on the basis of sexual orientation or gender identity;

(2) to provide a comprehensive Federal prohibition of discrimination in public schools based on actual or perceived sexual orientation or gender identity;

(3) to provide meaningful and effective remedies for discrimination in public schools based on actual or perceived sexual orientation or gender identity;

(4) to invoke congressional powers, including the power to enforce the 14th Amendment to the Constitution and to provide for the general welfare pursuant to section 8 of article I of the Constitution and the power to make all laws necessary and proper for the execution of the foregoing powers pursuant to section 8 of article I of the Constitution, in order to prohibit discrimination in public schools on the basis of sexual orientation or gender identity; and

(5) to allow the Department of Education and the Department of Justice to effectively combat discrimination based on sexual orientation and gender identity in public schools, through regulation and enforcement, as the Departments have issued regulations under and enforced title IX of the Education Amendments of 1972 and other nondiscrimination laws in a manner that effectively addresses discrimination.

[Subpart 12—Educational, Cultural, Apprenticeship, and Exchange Programs for Alaska Natives, Native Hawaiians, and Their Historical Whaling and Trading Partners in Massachusetts]

[SEC. 5521. [20 U.S.C. 7265] SHORT TITLE.

[(This subpart may be cited as the “Alaska Native and Native Hawaiian Education Through Cultural and Historical Organizations Act”).]

[SEC. 5522. [20 U.S.C. 7265a] FINDINGS AND PURPOSES.

[(a) FINDINGS.—Congress finds the following:

[(1) Alaska Natives and Native Hawaiians have been linked for over 200 years to the coastal towns of Salem, Massachusetts, and New Bedford, Massachusetts, through the China trade from Salem and whaling voyages from New Bedford.

[(2) Nineteenth-century trading ships sailed from Salem, Massachusetts, around Cape Horn of South America, and up the Northwest coast of the United States to Alaska, where their crews traded with Alaska Native people for furs, and then went on to Hawaii to trade for sandalwood with Native Hawaiians before going on to China.

[(3) During the 19th century, over 2,000 whaling voyages sailed out of New Bedford, Massachusetts to the Arctic region of Alaska, and joined Alaska Natives from Barrow, Alaska and other areas in the Arctic region in subsistence whaling activities.

[(4) Many New Bedford whaling voyages continued on to Hawaii, where they joined Native Hawaiians from the neighboring islands.

[(5) From those commercial and whaling voyages, a rich cultural exchange and strong trading relationships developed among the three peoples involved.

[(6) In the past decades, awareness of the historical trading, cultural, and whaling links has faded among Alaska Natives, Native Hawaiians, and the people of the continental United States.

[(7) In 2000, the Alaska Native Heritage Center in Alaska, the Bishop Museum in Hawaii, and the Peabody-Essex Museum in Massachusetts initiated the New Trade Winds project to use 21st-century technology, including the Internet, to educate students and their parents about historic and contemporary cultural and trading ties that continue to link the diverse cultures of the peoples involved.

[(8) The New Bedford Whaling Museum, in partnership with the New Bedford Whaling National Historical Park, has developed a cultural exchange and educational program with the Inupiat Heritage Center in Barrow, Alaska to bring together the children, parents, and elders from the Arctic region of Alaska with children and families of Massachusetts to learn about their historical ties and about each other's contemporary cultures.

[(9) Within the fast-growing cultural sector, meaningful educational and career opportunities based on traditional relationships exist for Alaska Natives, Native Hawaiians, and low-income youth in Massachusetts.

[(10) Cultural institutions can provide practical, culturally relevant, education-related internship and apprentice programs, such as the Museum Action Corps at the Peabody-Essex Museum and similar programs at the New Bedford Oceanarium and other institutions, to prepare youths and their families for careers in the cultural sector.

[(11) The resources of the institutions described in paragraphs (7) and (8) provide unique opportunities for illustrating and interpreting the contributions of Alaska Natives, Native Hawaiians, the whaling industry, and the China trade to the economic, social, and environmental history of the United States, for educating students and their parents, and for providing opportunities for internships and apprenticeships leading to careers with cultural institutions.

[(b) PURPOSES.—The purposes of this subpart are the following:

[(1) To authorize and develop innovative culturally-based educational programs and cultural exchanges to assist Alaska Natives, Native Hawaiians, and children and families of Massachusetts linked by history and tradition to Alaska and Hawaii to learn about shared culture and traditions.

[(2) To authorize and develop internship and apprentice programs to assist Alaska Natives, Native Hawaiians, and children and families of Massachusetts linked by history and tradition with Alaska and Hawaii to prepare for careers with cultural institutions.

[(3) To supplement programs and authorities in the area of education to further the objectives of this subpart.

[(4) To authorize and develop cultural and educational programs relating to any Federally recognized Indian tribe in Mississippi.]

[(8) Cultural and educational organizations with experience in developing or operating programs that illustrate and interpret the contributions of Alaska Natives, Native Hawaiians, the whaling industry, and the China trade to the economic, social, and environmental history of the United States.

[(9) Consortia of the organizations and entities described in this subsection.

[(b) USES OF FUNDS.—Activities provided through programs carried out under this subpart may include one or more of the following:

[(2) Development and implementation of programs using modern technology, including the Internet, to educate students, their parents, and teachers about historic and contemporary cultural and trading ties that continue to link the diverse cultures of Alaska Natives, Native Hawaiians, and the people of Massachusetts.

[(3) Cultural exchanges of elders, students, parents, and teachers among Alaska Natives, Native Hawaiians, and the people of Massachusetts to increase awareness of diverse cultures among each group.

[(4) Sharing of collections among cultural institutions designed to increase awareness of diverse cultures and links among them.

[(5) Development and implementation of internship and apprentice programs in cultural institutions to train Alaska Natives, Native Hawaiians, and low-income students in Massachusetts for careers with cultural institutions.

Subpart 1—Native Hawaiian Education

This [part]*subpart* may be cited as the “Native Hawaiian Education Act”.

* * * * *

[SEC. 7202. [20 U.S.C. 7512] FINDINGS.

【Congress finds the following:

【(1) Native Hawaiians are a distinct and unique indigenous people with a historical continuity to the original inhabitants of the Hawaiian archipelago, whose society was organized as a nation and internationally recognized as a nation by the United States, Britain, France, and Japan, as evidenced by treaties governing friendship, commerce, and navigation.

【(2) At the time of the arrival of the first nonindigenous people in Hawaii in 1778, the Native Hawaiian people lived in a highly organized, self-sufficient subsistence social system based on a communal land tenure system with a sophisticated language, culture, and religion.

【(3) A unified monarchal government of the Hawaiian Islands was established in 1810 under Kamehameha I, the first King of Hawaii.

【(4) From 1826 until 1893, the United States recognized the sovereignty and independence of the Kingdom of Hawaii, which was established in 1810 under Kamehameha I, extended full and complete diplomatic recognition to the Kingdom of Hawaii, and entered into treaties and conventions with the Kingdom of Hawaii to govern friendship, commerce and navigation in 1826, 1842, 1849, 1875, and 1887.

【(5) In 1893, the sovereign, independent, internationally recognized, and indigenous government of Hawaii, the Kingdom of Hawaii, was overthrown by a small group of non-Hawaiians, including United States citizens, who were assisted in their efforts by the United States Minister, a United States naval representative, and armed naval forces of the United States. Because of the participation of United States agents and citizens in the overthrow of the Kingdom of Hawaii, in 1993 the United States apologized to Native Hawaiians for the overthrow and the deprivation of the rights of Native Hawaiians to self-determination through Public Law 103–150 (107 Stat. 1510).

【(6) In 1898, the joint resolution entitled “Joint Resolution to provide for annexing the Hawaiian Islands to the United States”, approved July 7, 1898 (30 Stat. 750), ceded absolute title of all lands held by the Republic of Hawaii, including the government and crown lands of the former Kingdom of Hawaii, to the United States, but mandated that revenue generated from the lands be used “solely for the benefit of the inhabitants

of the Hawaiian Islands for educational and other public purposes”.

[(7) By 1919, the Native Hawaiian population had declined from an estimated 1,000,000 in 1778 to an alarming 22,600, and in recognition of this severe decline, Congress enacted the Hawaiian Homes Commission Act, 1920 (42 Stat. 108), which designated approximately 200,000 acres of ceded public lands for homesteading by Native Hawaiians.

[(8) Through the enactment of the Hawaiian Homes Commission Act, 1920, Congress affirmed the special relationship between the United States and the Native Hawaiians, which was described by then Secretary of the Interior Franklin K. Lane, who said: “One thing that impressed me . . . was the fact that the natives of the island who are our wards, I should say, and for whom in a sense we are trustees, are falling off rapidly in numbers and many of them are in poverty.”.

[(9) In 1938, Congress again acknowledged the unique status of the Hawaiian people by including in the Act of June 20, 1938 (52 Stat. 781, chapter 530; 16 U.S.C. 391b, 391b-1, 392b, 392c, 396, 396a), a provision to lease lands within the National Parks extension to Native Hawaiians and to permit fishing in the area “only by native Hawaiian residents of said area or of adjacent villages and by visitors under their guidance.”.

[(10) Under the Act entitled “An Act to provide for the admission of the State of Hawaii into the Union”, approved March 18, 1959 (73 Stat. 4), the United States transferred responsibility for the administration of the Hawaiian Home Lands to the State of Hawaii but reaffirmed the trust relationship between the United States and the Hawaiian people by retaining the exclusive power to enforce the trust, including the power to approve land exchanges and amendments to such Act affecting the rights of beneficiaries under such Act.

[(11) In 1959, under the Act entitled “An Act to provide for the admission of the State of Hawaii into the Union”, the United States also ceded to the State of Hawaii title to the public lands formerly held by the United States, but mandated that such lands be held by the State “in public trust” and reaffirmed the special relationship that existed between the United States and the Hawaiian people by retaining the legal responsibility to enforce the public trust responsibility of the State of Hawaii for the betterment of the conditions of Native Hawaiians, as defined in section 201(a) of the Hawaiian Homes Commission Act, 1920.

[(12) The United States has recognized and reaffirmed that—

[(A) Native Hawaiians have a cultural, historic, and land-based link to the indigenous people who exercised sovereignty over the Hawaiian Islands, and that group has never relinquished its claims to sovereignty or its sovereign lands;

[(B) Congress does not extend services to Native Hawaiians because of their race, but because of their unique status as the indigenous people of a once sovereign nation as to whom the United States has established a trust relationship;

[(C) Congress has also delegated broad authority to administer a portion of the Federal trust responsibility to the State of Hawaii;

[(D) the political status of Native Hawaiians is comparable to that of American Indians and Alaska Natives; and

[(E) the aboriginal, indigenous people of the United States have—

[(i) a continuing right to autonomy in their internal affairs; and

[(ii) an ongoing right of self-determination and self-governance that has never been extinguished.

[(13) The political relationship between the United States and the Native Hawaiian people has been recognized and reaffirmed by the United States, as evidenced by the inclusion of Native Hawaiians in—

[(A) the Native American Programs Act of 1974 (42 U.S.C. 2991 et seq.);

[(B) the American Indian Religious Freedom Act (42 U.S.C. 1996);

[(C) the National Museum of the American Indian Act (20 U.S.C. 80q et seq.);

[(D) the Native American Graves Protection and Repatriation Act (25 U.S.C. 3001 et seq.);

[(E) the National Historic Preservation Act (16 U.S.C. 470 et seq.);

[(F) the Native American Languages Act (25 U.S.C. 2901 et seq.);

[(G) the American Indian, Alaska Native, and Native Hawaiian Culture and Art Development Act (20 U.S.C. 4401 et seq.);

[(H) the Workforce Investment Act of 1998 (29 U.S.C. 2801 et seq.); and

[(I) the Older Americans Act of 1965 (42 U.S.C. 3001 et seq.).

[(14) In 1981, Congress instructed the Office of Education to submit to Congress a comprehensive report on Native Hawaiian education. The report, entitled the “Native Hawaiian Educational Assessment Project”, was released in 1983 and documented that Native Hawaiians scored below parity with regard to national norms on standardized achievement tests, were disproportionately represented in many negative social and physical statistics indicative of special educational needs, and had educational needs that were related to their unique cultural situation, such as different learning styles and low self-image.

[(15) In recognition of the educational needs of Native Hawaiians, in 1988, Congress enacted title IV of the Augustus F. Hawkins-Robert T. Stafford Elementary and Secondary School Improvement Amendments of 1988 (102 Stat. 130) to authorize and develop supplemental educational programs to address the unique conditions of Native Hawaiians.

[(16) In 1993, the Kamehameha Schools Bishop Estate released a 10-year update of findings of the Native Hawaiian Educational Assessment Project, which found that despite the

successes of the programs established under title IV of the Augustus F. Hawkins-Robert T. Stafford Elementary and Secondary School Improvement Amendments of 1988, many of the same educational needs still existed for Native Hawaiians. Subsequent reports by the Kamehameha Schools Bishop Estate and other organizations have generally confirmed those findings. For example—

【(A) educational risk factors continue to start even before birth for many Native Hawaiian children, including—

【(i) late or no prenatal care;

【(ii) high rates of births by Native Hawaiian women who are unmarried; and

【(iii) high rates of births to teenage parents;

【(B) Native Hawaiian students continue to begin their school experience lagging behind other students in terms of readiness factors such as vocabulary test scores;

【(C) Native Hawaiian students continue to score below national norms on standardized education achievement tests at all grade levels;

【(D) both public and private schools continue to show a pattern of lower percentages of Native Hawaiian students in the uppermost achievement levels and in gifted and talented programs;

【(E) Native Hawaiian students continue to be over-represented among students qualifying for special education programs provided to students with learning disabilities, mild intellectual disabilities, emotional impairment, and other such disabilities;

【(F) Native Hawaiians continue to be underrepresented in institutions of higher education and among adults who have completed four or more years of college;

【(G) Native Hawaiians continue to be disproportionately represented in many negative social and physical statistics indicative of special educational needs, as demonstrated by the fact that—

【(i) Native Hawaiian students are more likely to be retained in grade level and to be excessively absent in secondary school;

【(ii) Native Hawaiian students have the highest rates of drug and alcohol use in the State of Hawaii; and

【(iii) Native Hawaiian children continue to be disproportionately victimized by child abuse and neglect; and

【(H) Native Hawaiians now comprise over 23 percent of the students served by the State of Hawaii Department of Education, and there are and will continue to be geographically rural, isolated areas with a high Native Hawaiian population density.

【(17) In the 1998 National Assessment of Educational Progress, Hawaiian fourth-graders ranked 39th among groups of students from 39 States in reading. Given that Hawaiian students rank among the lowest groups of students nationally in reading, and that Native Hawaiian students rank the lowest among Hawaiian students in reading, it is imperative that

greater focus be placed on beginning reading and early education and literacy in Hawaii.

[(18) The findings described in paragraphs (16) and (17) are inconsistent with the high rates of literacy and integration of traditional culture and Western education historically achieved by Native Hawaiians through a Hawaiian language-based public school system established in 1840 by Kamehameha III.

[(19) Following the overthrow of the Kingdom of Hawaii in 1893, Hawaiian medium schools were banned. After annexation, throughout the territorial and statehood period of Hawaii, and until 1986, use of the Hawaiian language as an instructional medium in education in public schools was declared unlawful. The declaration caused incalculable harm to a culture that placed a very high value on the power of language, as exemplified in the traditional saying: “I ka ‘ōlelo nō ke ola; I ka ‘ōlelo nō ka make. In the language rests life; In the language rests death.”.

[(20) Despite the consequences of over 100 years of non-indigenous influence, the Native Hawaiian people are determined to preserve, develop, and transmit to future generations their ancestral territory and their cultural identity in accordance with their own spiritual and traditional beliefs, customs, practices, language, and social institutions.

[(21) The State of Hawaii, in the constitution and statutes of the State of Hawaii—

[(A) reaffirms and protects the unique right of the Native Hawaiian people to practice and perpetuate their culture and religious customs, beliefs, practices, and language;

[(B) recognizes the traditional language of the Native Hawaiian people as an official language of the State of Hawaii, which may be used as the language of instruction for all subjects and grades in the public school system; and

[(C) promotes the study of the Hawaiian culture, language, and history by providing a Hawaiian education program and using community expertise as a suitable and essential means to further the program.】

[(6) *The sheer magnitude of the geographic barriers to be overcome in delivering educational services in rural Alaska and Alaska villages should be addressed through the development and implementation of innovative, model programs in a variety of areas.*

[(7) *Native children should be afforded the opportunity to begin their formal education on a par with their non-Native peers. The Federal Government should lend support to efforts developed by and undertaken within the Alaska Native community to improve educational opportunity for all students.*]

[Subtitle B—Education for Homeless Children and Youths]

[SEC. 721. STATEMENT OF POLICY.

[The following is the policy of the Congress:

[(1) Each State educational agency shall ensure that each child of a homeless individual and each homeless youth has equal access to the same free, appropriate public education, including a public preschool education, as provided to other children and youths.

[(2) In any State that has a compulsory residency requirement as a component of the State's compulsory school attendance laws or other laws, regulations, practices, or policies that may act as a barrier to the enrollment, attendance, or success in school of homeless children and youths, the State will review and undertake steps to revise such laws, regulations, practices, or policies to ensure that homeless children and youths are afforded the same free, appropriate public education as provided to other children and youths.

[(3) Homelessness alone is not sufficient reason to separate students from the mainstream school environment.

[(4) Homeless children and youths should have access to the education and other services that such children and youths need to ensure that such children and youths have an opportunity to meet the same challenging State student academic achievement standards to which all students are held.

[SEC. 722. GRANTS FOR STATE AND LOCAL ACTIVITIES FOR THE EDUCATION OF HOMELESS CHILDREN AND YOUTHS.

[(a) GENERAL AUTHORITY.—The Secretary is authorized to make grants to States in accordance with the provisions of this section to enable such States to carry out the activities described in subsections (d) through (g).

[(c) ALLOCATION AND RESERVATIONS.—

[(1) ALLOCATION.—(A) Subject to subparagraph (B), the Secretary is authorized to allot to each State an amount that bears the same ratio to the amount appropriated for such year under section 726 that remains after the Secretary reserves funds under paragraph (2) and uses funds to carry out section 724(d) and (h), as the amount allocated under section 1122 of the Elementary and Secondary Education Act of 1965 to the State for that year bears to the total amount allocated under section 1122 of such Act to all States for that year, except that no State shall receive less than the greater of—

[(i) \$150,000;

[(ii) one-fourth of 1 percent of the amount appropriated under section 726 for that year; or

[(iii) the amount such State received under this section for fiscal year 2001.

[(B) If there are insufficient funds in a fiscal year to allot to each State the minimum amount under subparagraph (A), the Secretary shall ratably reduce the allotments to all States based on the proportionate share that each State received under this subsection for the preceding fiscal year.

[(2) RESERVATIONS.—(A) The Secretary is authorized to reserve 0.1 percent of the amount appropriated for each fiscal year under section 726 to be allocated by the Secretary among the United States Virgin Islands, Guam, American Samoa, and the Commonwealth of the Northern Mariana Islands, according to their respective need for assistance under this subtitle, as determined by the Secretary.

[(B)(i) The Secretary shall transfer 1 percent of the amount appropriated for each fiscal year under section 726 to the Department of the Interior for programs for Indian students served by schools funded by the Secretary of the Interior, as determined under the Indian Self-Determination and Education Assistance Act (25 U.S.C. 450 et seq.), that are consistent with the purposes of the programs described in this subtitle.
